The Department of Natural Resources is providing this report to satisfy the requirements of the "Procedures Concerning Certain Licenses Act", IC 14-11-4, and its associated administrative rule, 312 IAC 2-3. The application files are available for public inspection at the Division of Water's office in Indianapolis. Please contact the Division's Technical Services Section at (317) 232-4160 or the toll free number 1-877-928-3755 to make an appointment for file review. Photocopies may be made for a nominal charge of $0.10 per 8 1/2" X 11" copy.

A pre-action public hearing on an application may be requested by filing a written petition with the Director, Division of Water:

Michael W. Neyer, P.E., Director
Division of Water
Room W264
402 West Washington Street
Indianapolis, Indiana 46204

For a petition to be considered valid it must:

1. Contain the typed or legibly printed name and complete mailing address of each petitioner;
2. Be signed by a minimum of 25 individuals who are at least 18 years old and either reside in the county where the project will take place or own real property within 1 mile of the project site;
3. Affirm that each signatory to the petition satisfies the requirements of item 2; and
4. Identify the application for which the public hearing is being requested either by the application # or the applicant's name and the project description.

A petition which does not meet these requirements will be considered invalid and the hearing request will not be granted.

A person may request that the Department provide written notice of its action on an application by filing a written request with:

Division of Water
Room W264
402 West Washington Street
Indianapolis, Indiana 46204

The request must identify the application by either the application # or the applicant's name and the project description.

Application #  :  FW-27689

Stream       :  Zentsmaster Drain

Applicant    :  Indiana Department of Transportation
                Lisa Herber
                100 North Senate Avenue, Room N642
                Indianapolis, IN  46204

Description  :  The existing 122' long, 8' tall, 16' span culvert carrying US 24 over Zentsmaster Ditch will be replaced with an 126' long, 10' tall, 20' span pre-cast reinforced concrete 3-sided culvert sumped 1.5'; the total length of the new culvert will be 166' with wingwalls. Reconstruction of the roadway approaches and construction of approximately 425' of guardrail along US 24 will occur as well. Revetment riprap over geotextile will be placed below the flowline and along both east and west banks for 84' upstream and 82' downstream of US 24. Temporary coffer dams and a velocity dissipater will be utilized during construction for dewatering the structure; a pump-around may also be used for 45-60 days. (INDOT Des# 1006130) Details of the project are contained in information and plans received at the Division of Water on September 10, 2014.

Location     :  At the US 24 stream crossing; approximately near Fort Wayne, Aboite Township, Allen County Section 33, T 30N, R 11E, Arcola Quadrangle
                Quad Code: 4108513
                UTM Coordinates: Downstream 4541916 North, 643568 East

Application # : FW-27713

Stream : Beanblossom Creek

Applicant : Monroe County Board of Commissioners
Bill Williams
501 North Morton Street
Suite 216
Bloomington, IN 47404

Description : This project involves the replacement of the existing two-span prestressed concrete box beam structure carrying Kinser Pike over Beanblossom Creek. The existing horizontal alignment of Kinser Pike will be shifted slightly to the east at the bridge location. The vertical alignment will be raised (approximately 4.5’ maximum) to accommodate the new structure. The proposed structure will be constructed in nearly the same location as the existing bridge, with the north end of the structure shifted slightly to the east. The proposed bridge will be a three span (40’-6”, 53’-0”, 40’-6”) prestressed concrete spread box beam bridge with a 5° skew left. The proposed structure will have an out-to-out width that varies from 34’-6” to 35’-6” and a clear roadway width that varies from 34’-0” to 35’-0” consisting of two 12’-0” travel lanes and 5’-6” minimum shoulders. This project will also include the installation of two overflow pipes constructed north of the proposed bridge. Approach work will extend approximately 350’ north of the bridge and 390’ south of the bridge. The spill through end bents will have 2:1 side slopes armored with 24” class I riprap placed over a geotextile fabric. The proposed channel work will consist of completely removing the existing structure in addition to shaping the channel above the ordinary high water elevation to accommodate the larger structure. The channel shaping would be maintained within approximately 95’ downstream and 135’ upstream from the centerline of the structure. No flood easements or no channel realignment will be required to accommodate the new structure. The project is federally funded (LPA). Details of the project are contained in information received electronically at the Division of Water on September 25, 2014 and in plans and information received at the Division of Water on

Location : Located on Kinser Pike approximately 0.7 miles north of SR 37 near Bloomington, Bloomington Township, Monroe County Section 8, T 9N, R 1W

Statute/Rule : Flood Control Act, IC 14-28-1, with the associated Flood Hazard Area Rule, 312 IAC 10
Application #  :  FW-27718  
Stream        :  Sugar Creek  
Applicant     :  Montgomery County  
              :  Rod Jenkins  
              :  818 North Whitlock Avenue  
              :  Crawfordsville, IN  47933-1488  

| Description | The existing bridge will be rehabilitated by performing surface milling, hydrodemolition, bridge deck overlay, replacement of bridge railings, guardrail, and approach slabs. Riprap drainage turnouts will be placed over a geotextile fabric at each quadrant of the bridge. The existing riprap spilslopes will be removed and replaced. Details of the project are contained in information and plans received at the Division of Water on August 25, 2014 and September 23, 2014. |
| Location     | At the County Road 500 North crossing near Darlington, Franklin Township, Montgomery County Section 7, T 19N, R 3W, Darlington Quadrangle Quad Code: 4008617 UTM Coordinates: Downstream 4440046 North, 517371 East |
| Statute/Rule | Flood Control Act, IC 14-28-1, with the associated Flood Hazard Area Rule, 312 IAC 10 |
To accommodate a new stream crossing for the Boonville Bypass project, grading and fill is proposed for the road construction, INDOT DES 0500194. The portion of the project that will be reviewed under this application includes rough grading, the placement and compaction of approximately 95,000 cubic yards of fill for the bridge embankments, and grading for drainage ditches that will be stabilized with riprap. An application for the bridge structure, INDOT DES 1005804, will be submitted for review at a later date. Details of the project are contained in information and plans received at the Division of Water on October 1, 2014.

Location: Approximately 0.1 miles north of State Road 62 near Boonville, Boon Township, Warrick County

UTM Coordinates: Downstream 4211332 North, 474178 East
