

Flooding Of Pebble Creek

When excess rain water entered Pebble Creek, the levee flooded because of poor planning. The flooding caused a lot of damage to houses and cars. Some damage was so bad that a truck was swept into the river.

Floods can happen anytime, anywhere. "100-year flood" is an abbreviated way of describing the magnitude of rainfall and subsequent flood event that has a 1% chance of occurring.

You can still buy insurance if your property has been flooded provided that your community participates in the National Flood Insurance Program.
