

# Indiana Department of Labor Quarterly Statistics Report: Part 3

Wage and Hour Division  
Wage Claims and  
Common Construction Wage Audits  
& Common Construction Wage Hearings

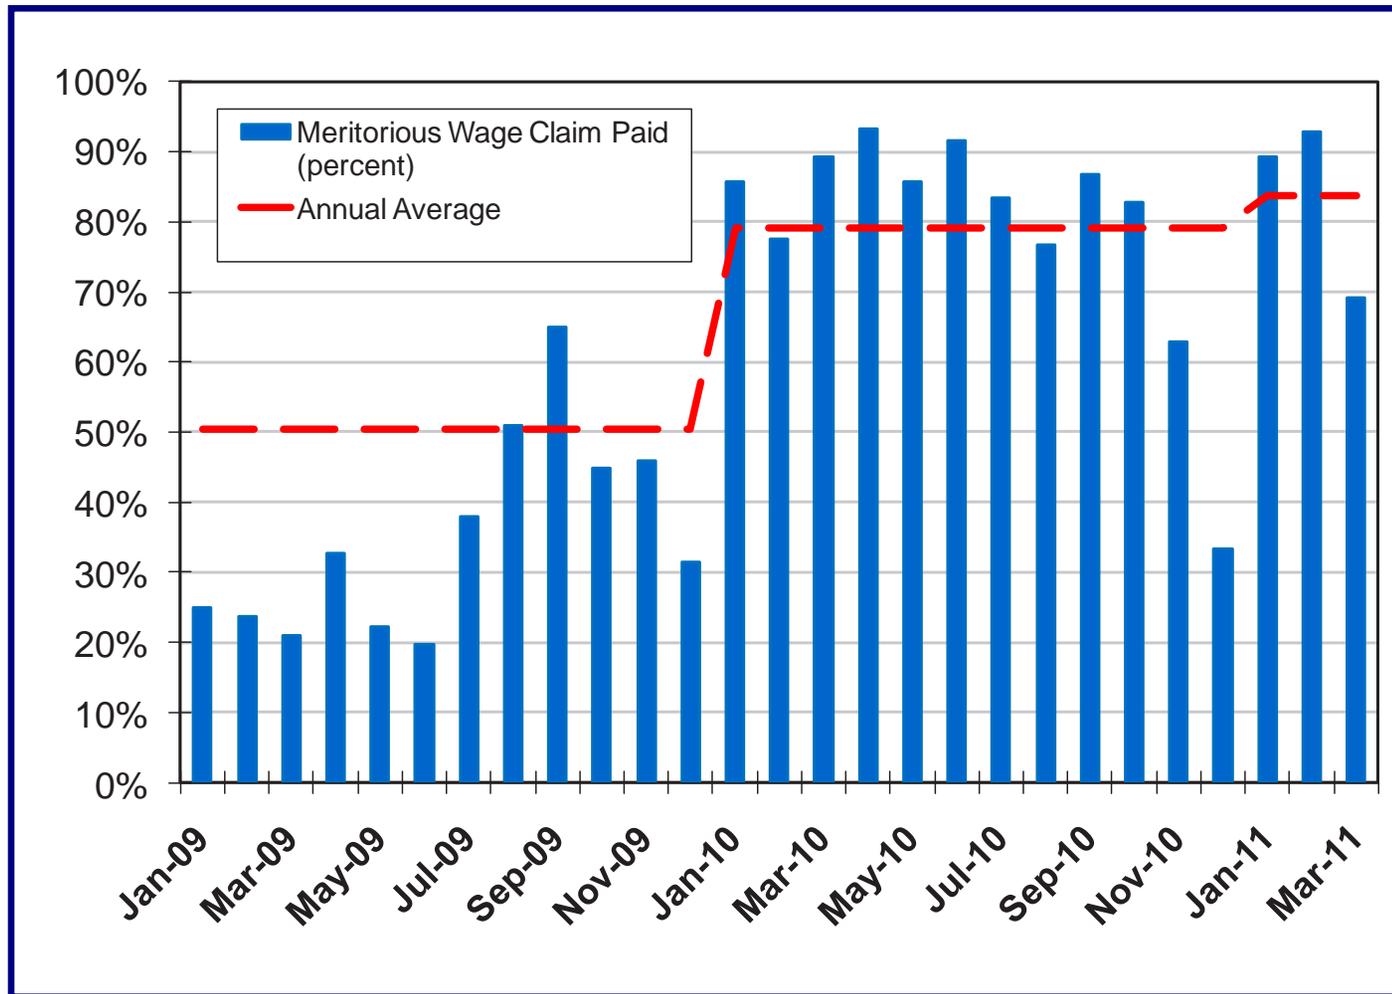

# Wage Claims: Number received

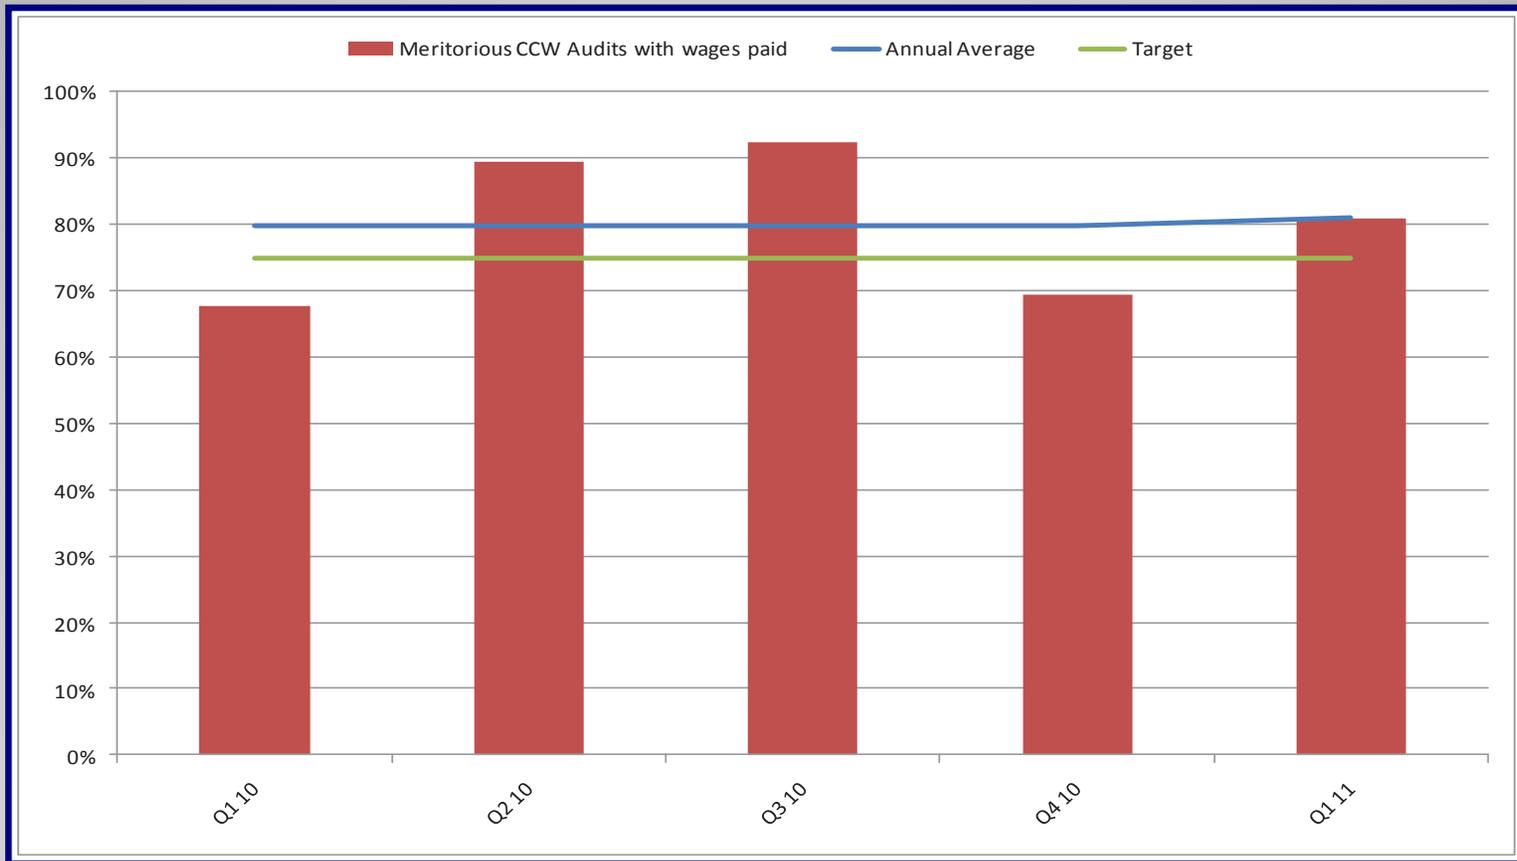

# Wage Claims: Average Days to Process Viable Claims

# Percent of Meritorious Wage Claims Where Wages are Recovered

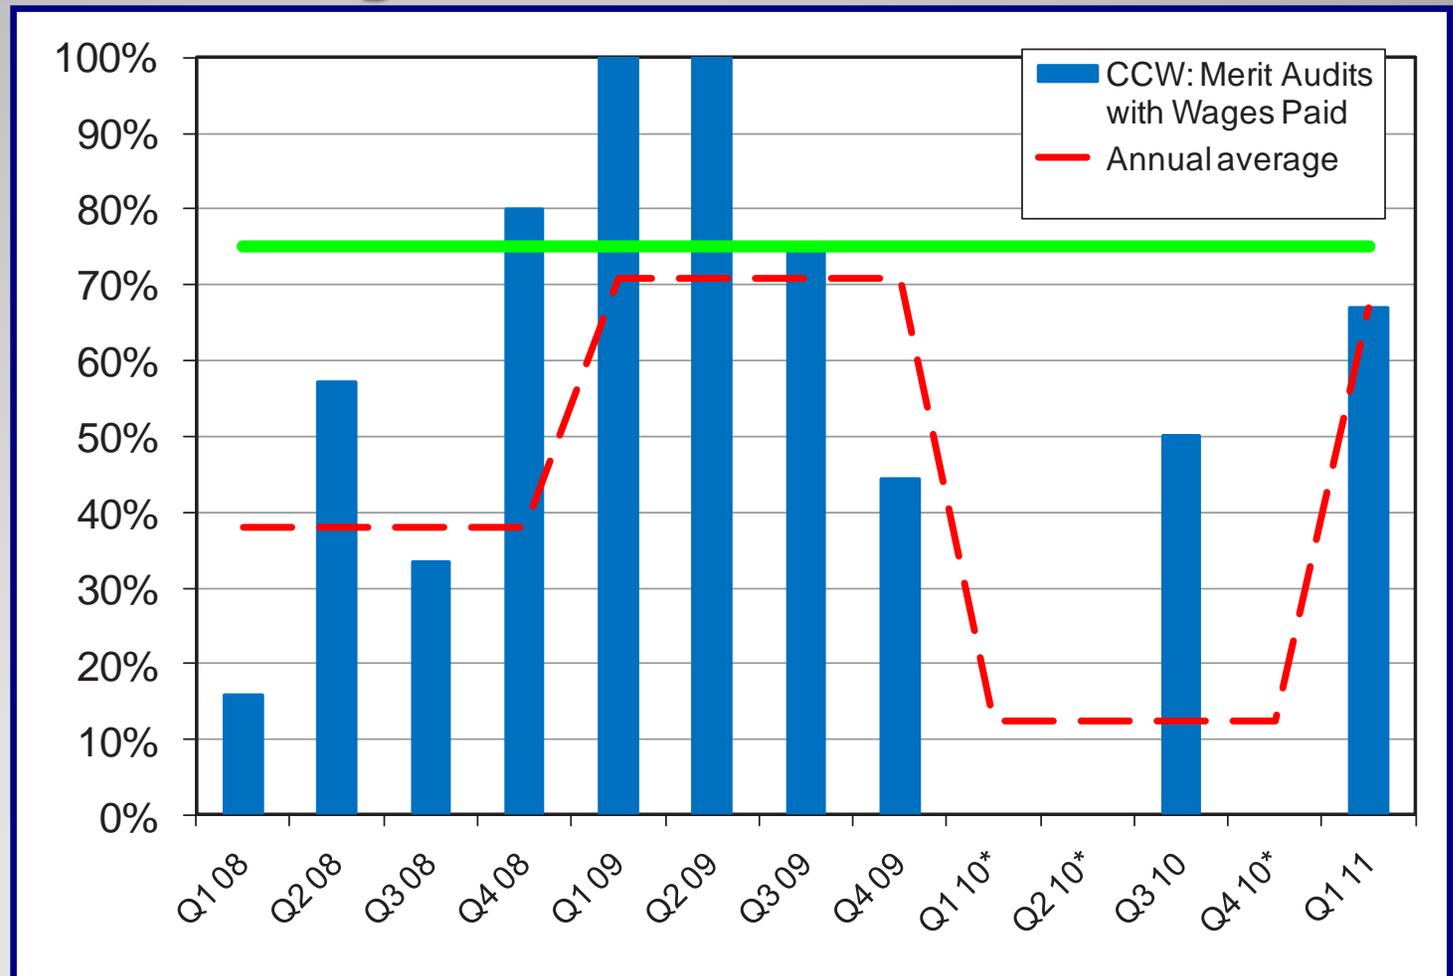

# All Wage and Hour Monetary Claims: Percentage of Meritorious Claims Where Monies are Recovered

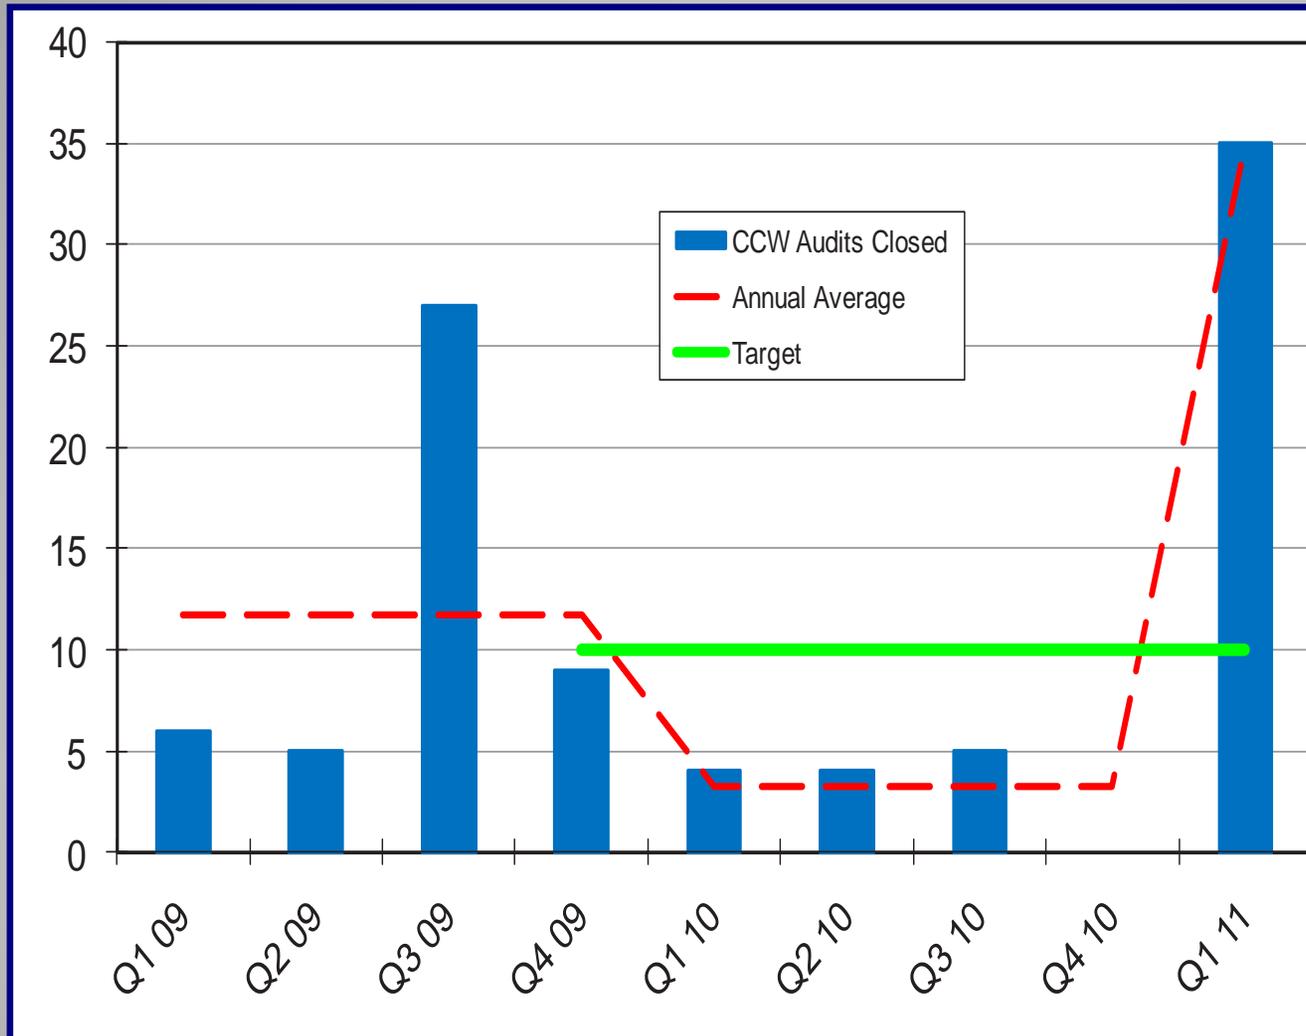

**Discussion:** This is a new measure established for in the second quarter of 2010. It combines recovery from both Wage Claims and Common Construction Wage audits.

# Common Construction Wage: Percentage of Meritorious Audits Where Wages are Recovered

**Discussion:** CCW is the Common Construction Wage. A “meritorious audit” is when an employer is found by the Department of Labor auditor to owe monies to his/her employee(s). Areas denoted by an asterisk (\*) illustrate no meritorious audits were completed during that quarter.

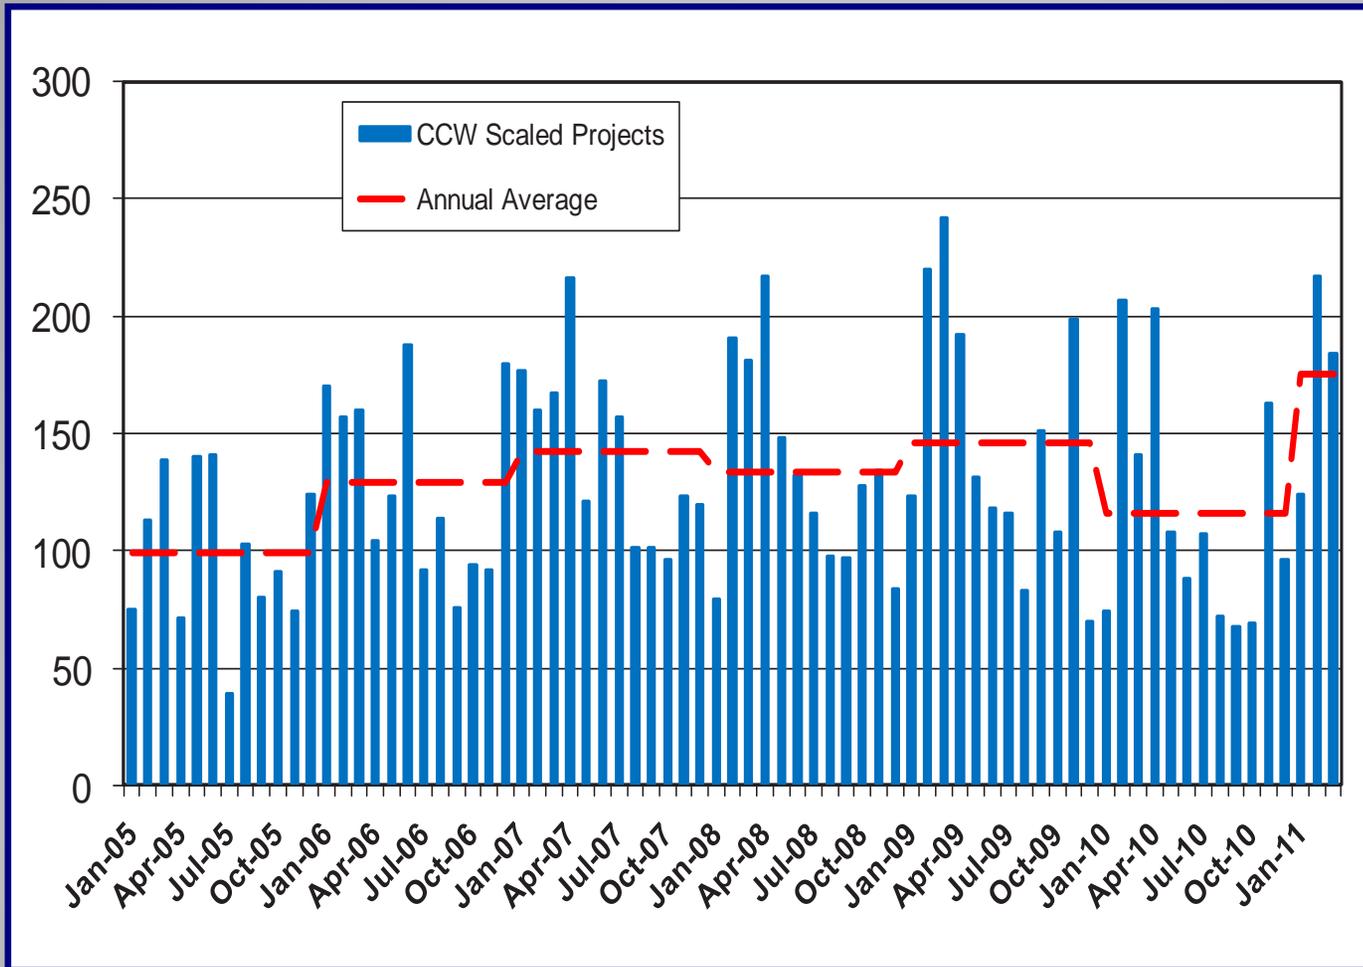

# CCW: Number of Audits Closed

**Discussion:** The target for 2010 is 10 per quarter and was established with a staff of two auditors in place. Since February 2010, the Wage and Hour Division has had only one auditor.

**Q1 2011 notes:** Spike in audits closed for Q1 2011 is due to removing audits for which the Statute of Limitations was expired (closed / not meritorious)

# CCW: Number of Projects

**Discussion:**  
CCW "Scales" were set for public projects over \$150,000 through June 30, 2011.

After July 1, 2011, the trigger is for projects set above \$250,000, and to \$350,000 after July 1, 2012.

# CCW: Number of Hearings Held
