

OSHA 7120

Introduction to Combustible Dust Hazards

The purpose of this 2-day course is to provide private businesses within general industry an opportunity to enhance their awareness of the hazards posed by combustible dust. This course will help these industry leaders to gain the knowledge and strategies that can help them to assure employee safety while using or producing materials that generate combustible dust. The course will focus on recognizing the hazards and risks associated with combustible dust, as well as developing the controls and strategies that can help them prevent or mitigate combustible dust fires and explosions.

Key topics include: combustible dust explosions as a national problem, recognized control and mitigation methods, and control of electrical installation hazards for combustible dust areas. In addition, the course will offer information on the National Emphasis Program (NEP) for combustible dust inspections and OSHA and consensus standards that impact industries that generate combustible dust. Credit Awarded: 1 CEU

Course Date: June 27 - 28, 2012

Course Time: 8:00 am - 5:00 pm

Location: Indiana Dept. of Labor
402 West Washington St., Room WI95
Indianapolis, IN 46204
