

Bicycle and Pedestrian Traffic Composition	Recommended Pavement Width
Bicycle use with low-volume pedestrian use	3 m (Standard width)
Bicycle use with high-volume pedestrian use, segment length $\leq$ 90 m where right-of-way is restricted	
Bicycle use where pedestrian use is likely to be infrequent	2.4 m
Bicycle use with low-volume pedestrian use, segment length $\leq$ 90 m where right-of-way is restricted	
Bicycle use with high-volume pedestrian use	3.6 m
High-volume bicycle use with low-volume pedestrian use	
High-volume bicycle and pedestrian use	$\geq$ 4.2 m
Bicycle-facility segment where queuing occurs, such as a road crossing	

**PATH PAVEMENT WIDTH  
BASED ON PATH-USE TRAVEL COMPOSITION**
