

Bicycle and Pedestrian Traffic Composition	Recommended Pavement Width
Bicycle use with low-volume pedestrian use	10 ft
Bicycle use with high-volume pedestrian use, segment length \leq 300 ft where right-of-way is restricted	
Bicycle use where pedestrian use is likely to be infrequent	8 ft
Bicycle use with low-volume pedestrian use, segment length \leq 300 ft where right-of-way is restricted	
Bicycle use with high-volume pedestrian use	12 ft
High-volume bicycle use with low-volume pedestrian use	
High-volume bicycle and pedestrian use	\geq 14 ft
Path segment where queuing occurs, such as a road crossing	

**PATH PAVEMENT WIDTH BASED ON
PATH-USE TRAVEL COMPOSITION**
