

203-R-121 BORROW AREA WETLAND ENHANCEMENT

(Revised 05-25-17)

The Standard Specifications are revised as follows:

SECTION 203, AFTER LINE 302, INSERT AS FOLLOWS:

203.08.2 Borrow Area Wetland Enhancement

If borrow material is obtained from a General Site and the property owner desires treatment of the borrow pit area so that it contains a reservoir of water, a portion of the excavated area shall have final restoration performed in the following manner.

The water edge shall be constructed with irregular lines forming small points and bays or an undulating water edge or shoreline. Also, 25% of the water edge or shoreline shall have a 6:1 slope (17% grade) or flatter from the anticipated water elevation to a water depth of 6 ft.

SECTION 203, BEGIN LINE 1444, INSERT AS FOLLOWS:

The cost of identification of borrow areas, archeological investigations, and changes to construction operations caused by the identification of an archeological site *and borrow area wetland enhancement*, shall be included in the cost of borrow, unless otherwise agreed to in writing.
