

## 706-B-324 BRIDGE RAILINGS

*(Adopted 10-19-23)*

The Standard Specifications are revised as follows:

SECTION 706, BEGIN LINE 65, DELETE AND INSERT AS FOLLOWS:

The slip form paver shall consolidate, screed, and finish the freshly placed concrete in one complete pass so a minimum of hand finishing will be necessary to provide a dense and homogeneous railing in conformance with the plans and specifications. The slump shall be ~~1 3/4 in. ± 3/4 in.~~ *1 1/2 in. ± 1 in.* The joints may be formed or sawed as long as a satisfactory joint is attained.
