

# NRS Table Reports Deletion Status Codes

NOTE: All these indicators are specific to the Term/Year of the reporting. When viewing a student in InTERS please make sure you are looking at the correct demographic record for the Term/Year in question. Remember when opening a student it defaults to the most recent term's record.

Status Code	Reason/ Logic
Invalid Age	The student must be between 16 and 100 years old. If between 16 and 17, then the student must have the Parent Signature box checked on their demographic record.
No App Date	The student either has no Application Date or the Application Date is less than 1/1/1910.
No Entry Level	The system could not calculate the EFL of the first test for the focus subject. Imported iSTAR records had this set on the student level, if this is missing then InTERS attempts to calculate this by looking at the tests.
Not Enrolled	The student must have at least 12 hours connected to the demographic record. Enrollment hours are only valid if it is between the Application Date and Exit date of the demographic record. Enrollment hours must be in a course in the given session. Enrollment hours must be within the Term selected. ( <i>Term Start Date -90 to Term End Date.</i> )
NRS Ignore Flag	The Student has the NRS Ignore Flag set in their demographic record.
Invalid Status	<i>For Table 4/4B only:</i> The system calculates the Status by looking at the student's tests and their Exit date. If a student is not counted in the Completed, Separated or Remaining columns they are considered invalid.
Not Table 5 Elig	<i>For Table 5/5A only:</i> In order to be included on Table 5/5A the student must have one of the main goals set. (GED, Secondary, Enter/Retain Employment)
