

Training Scenarios

Provide a minimum of 5 training scenarios that could be used to mobilize a mental health response team.

You may want to share ideas that you have used in the past. You may want to include geographical details

specific to Indiana.

These are all actual incidents or exercises or tabletops we have done:

1. Mass inoculation for pandemic flu at convention center. Emergency responders are first to be inoculated. Genral public becomes unruly.
2. F-3 tornado hits trailer park killing 19. Rescue operations are underway. Mental health team performing psychological triage and working at Red Cross shelter.
3. Airborne bio-terror attack on classic car show with 5000 exhibitors and 20,000 visitors. Mental health asked to go on TV with coping tips.
4. Airplane crash into a hotel/restaurant. Mental health team working with CISM, with families at morgue, survivors from hotel/restaurant.
5. Earthquake cuts city in half. No relief expected from state or feds for several days.
