Director, Food Protection Program
SUBJECT: PMI Nutrition International Expanded Recall

SUGGESTED ACTION: Unclassified Recall; certain varieties of the AquaMax™ feed products with specific lot codes listed below, due to the potential for elevated vitamin D levels; Recommend notification of affected stores via phone, fax or e-mail.

From the information provided by FDA, the recalled products may have been distributed in the State of Indiana. All products included in these recalls were manufactured at the Richmond, IN feed plant and were distributed nationwide and to Canada, Puerto Rico, Guam, Bahamas, Cayman Islands, Curaçao, Mexico, Cambodia, Japan, China, Taiwan, South Korea, Singapore, Chile, and the United Kingdom, starting April 2, 2012 through May 8, 2012. Dealers have been contacted and asked to hold these products and to notify and retrieve the product from customers. Detail information is not available at this time. In addition, if any recalled product is found, please notify this office at 317-351-7190.

Recall -- Firm Press Release

FDA posts press releases and other notices of recalls and market withdrawals from the firms involved as a service to consumers, the media, and other interested parties. FDA does not endorse either the product or the company.

PMI Nutrition International Initiates Voluntary Recall of AquaMax™ Products; Expands Voluntary Recall of Mazuri® and LabDiet® Feed Products Due to Potential Elevated Vitamin D Level

FOR IMMEDIATE RELEASE -July 13, 2012 -- PMI Nutrition International is initiating a voluntary recall of certain varieties of the **AquaMax™** feed products with specific lot codes listed below, due to the potential for elevated vitamin D levels. Although no customer complaints have been received to date, the products are being recalled due to analytical test results that indicate a potential for elevated levels of vitamin D.

The company is also expanding its previously announced voluntary recalls to include additional varieties of the **Mazuri®** and **LabDiet®** feed products with specific lot codes listed below due to analytical test results on additional lots of retained samples that indicate a potential for elevated levels of vitamin D. Elevated vitamin D levels may cause death, or otherwise be harmful to animals and fish if fed for extended periods potentially resulting in lack of interest in eating, weight loss and possible joint stiffness. These products are being added to those from earlier recalls announced on July 3, 2012 and July 6, 2012* which were initiated after receiving a small number of customer complaints which involved animal illness and small bird and guinea pig mortality.

All products included in these recalls were manufactured at the Richmond, IN feed plant and were distributed nationwide and to Canada, Puerto Rico, Guam, Bahamas, Cayman Islands, Curaçao, Mexico, Cambodia, Japan, China, Taiwan, South Korea, Singapore, Chile, and the United Kingdom, starting April 2, 2012 through May 8, 2012. Dealers have been contacted and asked to hold these products and to notify and retrieve the product from customers. The affected product should not be used, and where applicable, be returned to the retail dealer.

Lot numbers are laser printed on the back of each paper bag, near the top. Lot numbers are formatted as follows: APR= Month / 17=Day of Month / 12 =Year / 2 =Plant Code.
