FSIS and the company have received no reports of injury associated with the consumption of these products. Anyone concerned about injury should contact a healthcare provider.

FSIS routinely conducts recall effectiveness checks to verify recalling firms notify their customers of the recall and that steps are taken to make certain that the product is no longer available to consumers.

Consumers and media with questions about the recall should contact the company's Vice President of Operations Andrew Zychowicz, at (419) 726-8488.
