

PERINATAL HIV TRANSMISSION

Children Born to HIV Infected Mothers who are current residents of Indiana,
Cumulative 1982 through December 31, 2017

Race	2017 Exposures	2017 Exposures now with HIV Disease	Total Exposures	Child Exposures now with HIV Disease
White	14	0	271	48
Black	26	0	521	95
Hispanic – All Races	6	0	99	11
Multiracial – Non Hispanic	0	0	13	13
Other	3	0	75	13
Total	49	0	979	180

Exposure = Children born to HIV+ women. Laboratory testing has not yet determined their HIV status.

HIV Disease = Children born to HIV+ women. Laboratory testing has confirmed that the child is HIV+.

NOTE: Counts include foreign-born adoptees or children diagnosed in another state who currently reside in Indiana.

New Perinatal Exposure Case Report Form for Babies Born to HIV Positive Mothers

Babies born to HIV-positive mothers must be reported by law (IC 16-41-2-1) to the Indiana State Department of Health (ISDH) within 72 hours following birth. The current Pediatric Case Report form was to be completed for all Perinatal Exposures, Pediatric Seroreverters and/or Pediatric HIV/AIDS cases. A simpler Perinatal Exposure form was requested by a number of providers and in response, the new Perinatal Exposure Case Report form was developed. It is important to note that this new Perinatal Exposure Report form does not take the place of the Pediatric Case Report entirely. However, this new form is shorter and more user-friendly when informing ISDH of perinatal exposures that will require further follow-up at a later time. This new form can be accessed at:

<http://www.in.gov/isdh/17764.htm>

For questions with regards to the use of this form or any other HIV case report forms please contact:

Office of Clinical Data and Research, 800-376-2501.
