About the Lecturer:

Dr. Melissa Cavaghan completed medical school, residency in internal medicine, and fellowship in endocrinology at the University of Chicago. While on the faculty at the University of Chicago she carried out clinical research characterizing defects in insulin secretion in prediabetic states. She is currently an Assistant Professor of Clinical Medicine at the Indiana University School of Medicine where her principal activities are oversight of endocrine medical education and clinical practice in the division of Endocrinology and Metabolism. Current areas of clinical interest include diabetes, thyroid disease, polycystic ovary syndrome, and endocrine disorders during pregnancy.
