WASTEWATER OPERATOR EXAMINATION STUDY KEY CLASS C AND CLASS D

Mathematics 10 – 15 %

Web site for the Class C and D Formula Sheet:

http://www.in.gov/idem/files/wastewater_formulae_class_c.doc

Any mathematics problem given on the examination will have the appropriate formula listed on the Formula Sheet furnished with the exam on that day. It is recommended that you look over the formula sheets and work any problems in the Sacramento manuals.

Solving these problems involve plugging the numbers given in the problem into the correct formula and calculating the answer.

There are a few basic rules that apply to solving formulas:

1. Work from left to right
2. Do all of the multiplication and division above the line (in the numerator) and below the line (in the denominator); then do the addition and subtraction above and below the line.
3. Perform the division (divide the numerator by the denominator).
4. Parentheses () are used in formulas to identify separate parts of a problem.

Work the arithmetic within the parentheses before working outside the parentheses. Use the same order stated in rules 1, 2, and 3 above when working inside of parentheses.

Pretreatment 5%

Questions are taken from the Introduction to the National Pretreatment Program manual, available on-line from US EPA at:

<http://www.epa.gov/owmitnet/final99.pdf>

and

Industrial Waste Treatment, Volume I:

Chapter 3 Regulatory Requirements

Rules/Regulations/Completing reports 20%

The remainder of the examination questions will cover Rules and Regulations located in Part II, Section One, of the Wastewater Certification Manual and questions related to completion of the Discharge Monitoring Report (DMR) and the Monthly Report of Operation (MRO). A worksheet and necessary additional documents may be printed from IDEM's Web site.
