Manuals used for examination questions are prepared by and available through California State University, Sacramento College of Engineering and Computer Science, Office of Water Programs (Referred to hereafter as the Sacramento manuals).

Web site: [http://www.owp.csus.edu/](http://www.owp.csus.edu/) Email: [mailto:wateroffice@csus.edu/](mailto:wateroffice@csus.edu/)

Categories of test questions which will be covered by the Sacramento manuals and the percentage of the examination questions comprised from that area are listed below:

- **Activated Sludge** 15-20%
- **Clarifiers** 5%
- **Collection system** 2%
- **Disinfection** 6%
- **Laboratory** 10%
- **Maintenance** 5%
- **Preliminary treatment** 5%
- **Safety** 6%
- **Solids Handling** 3%

(NOTE: These percentages are approximate)

**Operation of Wastewater Treatment Plants – Volume I**

Questions on the Class I and Class A examination are taken from the following chapters:

- **Chapter 1** The Treatment Plant Operator
- **Chapter 2** Why Treat Wastes?
- **Chapter 3** Wastewater Treatment Facilities
- **Chapter 4** Racks, Screens, Commminutors, and Grit Removal
- **Chapter 5** Sedimentation and Flotation
- **Chapter 6** Trickling Filters
- **Chapter 8** Activated Sludge
- **Chapter 10** Disinfection and Chlorination (Including Appendix on UV)

**Operation of Wastewater Treatment Plants – Volume II**

- **Chapter 11** Activated Sludge (Operation of Conventional Activated Sludge Plants)
- **Chapter 12** Sludge Digestion and Solids Handling
- **Chapter 13** Effluent Disposal
- **Chapter 14** Plant Safety
- **Chapter 15** Maintenance
- **Chapter 16** Laboratory Procedures and Chemistry
- **Chapter 18** Analysis and Presentation of Data
Mathematics 10 – 15%

Web site for the Class I and A Formula Sheet:
http://www.in.gov/idem/files/wastewater_formulae_class_i.doc.

Any mathematics problem given on the examination will have the appropriate formula listed on
the Formula Sheet furnished with the exam on that day. It is recommended that you look over
the formula sheets and work the problems in the Appendices in the Sacramento manuals.
Specifically in the Operation of Wastewater Treatment Plants Volumes I and II entitled “How to
Solve Wastewater Treatment Plant Arithmetic Problems”
Solving these problems involve plugging the numbers given in the problem into the correct
formula and calculating the answer.

There are a few basic rules that apply to solving formulas:
1. Work from left to right
2. Do all of the multiplication and division above the line (in the numerator) and below the
   line (in the denominator); then do the addition and subtraction above and below the line.
3. Perform the division (divide the numerator by the denominator).
4. Parentheses ( ) are used in formulas to identify separate parts of a problem.
   Work the arithmetic within the parentheses before working outside the
   parentheses. Use the same order stated in rules 1, 2, and 3 above when working
   inside of parentheses.

Rules/Regulations/Completing reports 20 – 25%

The remainder of the examination questions will cover Rules and Regulations located in Part II,
Section One, of the Wastewater Certification Manual.
There will also be questions related to completion of the Discharge Monitoring Report (DMR)
may be printed from IDEM’s Web site.

- Link to the Certification Manual:

- Link to the worksheet for the DMR and MRO. Note that there are four (4) documents to print:
