Mr. Peter Swenson, Chief Watershed and Wetlands Branch
United States Environmental Protection Agency
Region V
77 West Jackson Boulevard
Chicago, IL 60604

Dear Mr. Swenson:

RE: Addendum to Indiana's 2014 Integrated Report
and 303(d) List of Impaired Waters

This letter accompanies IDEM's submission of an addendum to its 2014 Integrated Report and 303(d) List of Impaired Waters submitted to U.S. EPA on April 1, 2014. At that time, the state-mandated public comment period on Indiana's draft 2014 303(d) had not yet begun. On April 30, 2014, IDEM published its draft 2014 303(d) List of Impaired Waters with a ninety (90) day public comment period from April 30 through July 29, 2014, for submission of comments on the draft 303(d) List of Impaired Waters. IDEM is submitting this addendum now in keeping with U.S. EPA guidance (U.S. EPA, 2006), which recommends that states provide a summary of comments received along with the state's responses.

This addendum, which provides a summary of the changes made to the 2014 303(d) list since April 1, 2014, will become Appendix I of Indiana's 2014 Integrated Report and includes the following additional information:

- Full text copies of all public comments received on the 2014 303(d) list and the Consolidated Assessment and Listing Methodology (CALM) used to develop it (Attachment 1);
- A summary of the public comments received on the 2014 303(d) list and CALM published on April 30, 2014 and IDEM's responses (Attachment 2), and;
- IDEM's responses to U.S. EPA's comments on Indiana's 2014 Integrated Report and 2014 303(d) list, which were received on September 11, 2014 (Attachment 3).

With this addendum, IDEM is also providing a revised version of Appendices A and C, which contain minor corrections to some of the tables and figures in the April 1, 2014 version of the IR, and the following revised attachments to Appendix I. All of these materials supersede those submitted on April 1, 2014:

- A revised version of Attachment 1 (IDEM's CALM), which contains a limited number of changes made for clarification purposes and to create more consistency with Indiana's water quality standards;
- A revised version of Attachment 2 (Status of Category 4 Waters), which provides updated segmentation information for a number of previously approved TMDLs, and;
- An updated 303(d) list that reflects all the changes made since IDEM submitted its 2014 303(d) list to U.S. EPA on April 1, 2014 (Attachment 5).

A State that Works

We look forward to receiving U.S. EPA's formal decision regarding the disposition of Indiana's 2012 303(d) list and have provided U.S. EPA to facilitate its review and approval process for the 2014 303(d) list to the extent now possible. If you have any questions, please contact Jody Arthur (317-308-3179) or me (317-308-3235).

Sincerely,

A handwritten signature in black ink, appearing to read "Marylou Poppa Renshaw". The signature is fluid and cursive, with a large initial "M" and a long, sweeping underline.

Marylou Poppa Renshaw, Chief
Watershed Assessment and Planning Branch
Office of Water Quality
