RE: NARRATIVE: INDIANA ENVIRONMENTAL STEWARDSHIP PROGRAM ANNUAL PERFORMANCE REPORT
DATE: 06/09/2015
FACILITY: No-Sag Products, a Division of Leggett & Platt Incorporated
2225 Production Road || Kendallville, IN 46755

- Developed new chain former that is very quiet, as older machines are replaced, this will affect the overall plant volume.
 - Land fill continued to decline, and we are at the current foreseeable bottom of where we can get without new packaging initiatives and re-use programs. We continue to work at this.
 - All of our landfill refuse is burnt to fuel the Fort Wayne GM plants co-gen, effectively making us a 0 waste generator.
 - Over the last several years we have increasingly colder winters, and consequently we have failed to hit our reduction goals. Our monitoring of gas consumption did lead us to partner to tune our plant heating to a more efficient temperature profile beginning in November and continuing through the end of January 2015. We believe that this change made to the rapid unit discharge air temperature down from 68° to 62°. This change should show up in our 2015 data.
 - We are evaluating and developing an ROI for switching from high efficiency florescent lighting to LED fixtures. However this is still a work in progress and should be a go project in 2016 providing the return is there.
