4. Scan Customer Attestation

NIC Indiana attests on January 5, 2023 that this scan (either by itself or combined with multiple, partial, or failed scans/rescans, as indicated in the above Section 3, "Scan Status") includes all components which should be in scope for PCI DSS, any component considered out of scope for this scan is properly segmented from my cardholder data environment, and any evidence submitted to the ASV to resolve scan exceptions including compensating controls if applicable is accurate and complete. NIC Indiana also acknowledges 1) accurate and complete scoping of this external scan is my responsibility, and 2) this scan result only indicates whether or not my scanned systems are compliant with the external vulnerability scan requirement of PCI DSS; this scan result does not represent my overall compliance status with PCI DSS or provide any indication of compliance with other PCI DSS requirements.
