"ITAP" Your Source to Answers

Have you ever wondered what INDOT has paid the prime contractor for your work? How about records for a specific item? INDOT Technical Application Pathway (ITAP) is your source to those answers. If you do not have an ITAP account, you can sign up at https://itap.indot.in.gov/. If you already have an ITAP account, you can request the SMGR Report application. Once you have access to the SMGR Report application, you simply enter your INDOT contract number, which gives you access to several reports. Below is a screenshot from the SMGR Report in ITAP. In the top section, the IC642CLN report will give you information on the whole contract. In the lower section, the Progressive Record Activity will give you information on a specific line item and what has been recorded on a daily basis. This is an easy and quick way to see what work has been recorded for payment by the INDOT or Consultant field staff on a particular contract. As always, if you believe there is a payment issue with a Prime contractor, you can always contact INDOT's Contract Compliance Staff at Promptpayment@indot.in.gov, and we will look into your concerns.
