

Employees Thanked At All INDOT Employee Meeting

On May 24, Commissioner Michael B. Cline addressed INDOT employees during morning and afternoon sessions of the All INDOT Employee Meeting. While Central Office employees were invited to the Indiana Government Center South Auditorium, the districts attended the sessions at various locations via webcast. Governor Mitch Daniels sent a message of thanks to INDOT employees during the morning session, and personally thanked INDOT employees at the afternoon session.

Commissioner Cline thanked employees for their efforts and successes and recapped the status of major projects, budgets, and initiatives such as pavement preservation and winter operations. After the presentation, the Commissioner answered questions from the audience and from emails.

Below are a few employee comments about the All INDOT Employee Meeting:

“In my 17 years with INDOT, this is the first time a commissioner has addressed all INDOT employees simultaneously. Including the districts through the webcast was essential, and I hope to see more of these informative meetings in the future.”

-Jessica Williams, Human Resources/Employee Development Trainer, based in the Crawfordsville District

“I’ve not yet had the pleasure of personally meeting Commissioner Cline. Through his address to the employees, I feel I got to know our agency’s leader as a person and not just a name that sits behind a desk. I appreciate the time he took to let us know where we stand as a whole. I look forward to Commissioner Cline making further observations in the field to continue to provide our state with the best possible customer service.”

-Joshua Baugh, Indianapolis Subdistrict/71st Street Unit Highway Technician 3

For those who were not able to attend the meeting, or those that unfortunately experienced some technical issues in the district locations, both the morning and afternoon sessions, along with other meeting materials, can be found at: <http://intranet.indot.state.in.us/INDOTEmployeeMeeting.asp>.
