Project Update

**I64/SR62 and SR64 Interchange
Floyd County
DES# 0101102**

June 2008

The Indiana Department of Transportation is planning an interchange improvement project for I64 at SR62 and SR64 in west-central Floyd County. The need for the improvement is based on rush hour congestion at the interchange due to closely spaced intersections and inadequate turn lanes. The purpose of this project is to mitigate these concerns by modifying the existing interchange to accommodate the SR64 to I64 movements and to coordinate the closely spaced signals in the vicinity of this interchange to optimize the flow of traffic.

The recommended alternative would provide a dual left-turn lane for the southbound SR64 entrance to eastbound I64. The entrance ramp to eastbound I64 and exit ramp from westbound I64 will each be widened to two lanes. The proposed project will also add dual right-turn lanes for westbound I64 to northbound SR64 traffic. The spacing between intersections will not change, but the signals at the I64 on and off ramps will be coordinated with the signal at West Knable Road. West Knable Road will also be widened at its intersection with SR64.

Minimal right-of-way impacts are anticipated and no residential or commercial relocations will be required. The project is currently scheduled to begin construction in 2009.
