# INTRODUCTION

## *WHAT IS A STIP?*

The Statewide Transportation Improvement Program (STIP) is a four – year planning document that lists all projects expected to be funded in those four years with Federal funds. This present document covers state fiscal years 2010, 2011, 2012 and 2013.

The Indiana Department of Transportation (INDOT), Office of Planning, develops this document in **cooperation** with the Metropolitan Planning Organizations (MPOs) and in **consultation** with the Rural Planning Organizations (RPOs).

The STIP has been developed in accordance with the terms and provisions of the Safe, Accountable, Flexible, and Efficient Transportation Equity Act: A Legacy for Users (SAFETEA-LU) and the Clean Air Act Amendments of 1990 and all regulations issued pursuant thereto. According to these regulations, a STIP:

1. must be developed once every four years;
2. must cover a minimum of four years;
3. must list projects in order by year;
4. must be financially constrained by year;
5. must include a financial plan that demonstrates which projects can be implemented using current and anticipated revenue sources;
6. must include all regionally significant projects that could affect air quality;
7. must come from conforming State and Metropolitan Long Range Transportation Plans;
8. must be found to meet air quality conformity requirements found within the State Implementation Plan (SIP); and
9. individual project entries must contain the following information:
  - a. Project description, including sufficient detail to identify the project phase and, in non-attainment or maintenance areas, sufficient description to permit air quality analysis according to the U.S. Environmental Protection Agency's (EPA) conformity regulations.
  - b. Specific project budget, including, total cost, Federal share and source by year, other funding shares and sources, by year and
  - c. Identification of the Americans with Disabilities Act implementation project elements.

This 2010-113 STIP fulfills these federal requirements.

The STIP includes investments in various modes, such as transit, highways, and bicycle facilities. The STIP is the means of implementing the goals and objectives identified in State and Metropolitan Long-Range Transportation Plans. Only those projects for which construction and operating funds can reasonably be expected to be available are included. Without TIP/STIP inclusion, a project is not eligible for federal funding.

The TIP/STIP is assessed for its impact on air quality. Based on this assessment, certain of these areas can be designated as non-attainment areas for ozone or particulate matter. In Indiana, there are two ozone non-attainment areas:

1. EPA Letter Designating non-attainment counties for particulate matter (SOURCE: IDEM) [http://www.in.gov/idem/files/redes\\_final\\_designations.pdf](http://www.in.gov/idem/files/redes_final_designations.pdf)
2. EPA designated areas of air quality nonattainment for ozone (SOURCE: IDEM) [http://www.in.gov/idem/files/ozone\\_map-06-15-04.pdf](http://www.in.gov/idem/files/ozone_map-06-15-04.pdf)

Air Quality Non-attainment areas are shown in Figure 1 and 2, below.

Using methods and procedures that have been approved by the EPA, the program has been reviewed to determine if the plans and programs contained in the TIP/STIP, as proposed, will serve to reduce emissions of volatile organic compounds, oxides of nitrogen, carbon monoxide and fine particulate matters.

## **PROGRAM STRATEGIES**

The Statewide Transportation Improvement Program is dynamic. As projects are developed, their estimated costs, and times to completion can change. However, underlying and project is an overall strategy, or “program,” for which it was selected. Programs are multi-year plans for both the preservation and improvement of our transportation facilities. The long-range planning and programming process determines the level of investment for each transportation program.

Historically, projects are first selected, then developed, and then built. The time to complete each project varies and depends greatly upon its size and complexity. As projects become ready to build or implement, funding is directed to the project for completion. Some projects are simpler than others, such as ride-share programs within transit programs. But most projects follow the historical process of Plan, Design and then Construct. Below are the various transportation programs found in this document, along with a description of their purpose, their “strategy”.

### *Major New Program*

The program includes projects which either increase mobility, provide connectivity, increase the accessibility of a region for economic development, increase the capacity of a transportation facility or reduce congestion throughout Indiana. Categories of work normally covered under this program consists of: new construction (roads/interchanges), added travel lanes, interchange modifications and new construction.

### *Major Bridge Program*

This program is intended to provide projects to rehabilitation or replace structures carrying a state, US or Interstate route with meet the major bridge criteria

### *Rest Area Program*

This program includes projects for replacement and rehabilitation of 31 Rest Areas on the state and national highway system.

### *Safety Program*

This program includes projects identified for highway safety treatments or corrective activity designed to alleviate a safety problem or a potentially hazardous situation. Types of projects covered under this program may include: railroad projects, safe routes to schools, intersection improvements, guardrail installation or replacement, cable barrier guardrail, signing, signals, lighting.

### *Transportation Management Program*

This program includes projects for the operation, maintenance, repair, replacement and upgrade of freeway management systems. TMS will be focused on urban interstates, other urban freeways/expressways, rural interstates, and other rural freeway/expressways. These routes are all defined as part of the National Highway System.

### *Geologic Site Management Program*

This program includes projects for slips, landslides, rockfall and erosion projects.

### *District Construction Program(s)*

The district program includes preservation projects not covered under one of the above mentioned projects. They may include major pavement rehabilitation of the interstate, NHS and state routes, preservation and rehabilitation of existing pavements in the 6 INDOT districts, preservation and replacement on existing state owned bridges, small structures, landscaping, drainage corrections as well as safety improvements.

### *District Maintenance Program*

This program includes projects scheduled for routine and preventative maintenance for the existing roadway system under INDOT jurisdiction. Some examples that would fall under this category would be: roadside mowing, herbicide treatment, wedge, and level.

### *Statewide Airport Administration & Improvements Program*

The Statewide Airport Administration & Improvements Program provides for a variety of airport improvements. Among these are: Safety and Security projects, Preservation projects, Standards projects, Upgrade projects, and Capacity projects. All of these are selected statewide to benefit pilots, businesses and air travelers with safety and reliable air service

### *Statewide Transit Administration & Improvements Program*

The purpose of the Statewide Transit Administration & Improvements Program is to improve personal mobility and the quality of life through preservation and enhancement of passenger delivery systems. The INDOT Public transit Section works closely with local communities on the funding of locally based transit operators. Federal aid is matched with state funds for operating subsidies, planning purposes and fleet purchases.

### *Department of Natural Resources & Institutions Program*

Annually, INDOT provides \$5 million to the Department of Natural Resources and other state institutions for maintenance work. The projects are selected by DNR and/or identified to the districts that prepare the projects for construction

### *MPO (Group I) Program*

Supporting the seven largest metropolitan areas, the Group I MPO program is the dedicated program for investments in Northwest Indiana, South Bend, Fort Wayne, Indianapolis, Evansville, Cincinnati (OH) and Louisville (KY) areas. Each of these areas has a metropolitan planning organization (MPO) which is responsible for these projects. Projects are determined by joint decision-making at the local level.

### *MPO (Group II) Program*

The Group II MPO program is also a dedicated program for large urban areas however, these urban areas have populations less than 200,000, and greater than 50,000. At this time, these areas include: Anderson, Bloomington, Columbus, Elkhart/Goshen, Kokomo, Muncie, West Lafayette/Lafayette and Terre Haute. Like the larger MPO program, projects in this program are determined by decision-making at the local level.

### *Urban (Group III) Program*

The Urban Group III program is for local areas which have populations smaller than 50,000 and larger than 5,000. Projects include all types, from road replacements to larger expansion projects and improvements. Since a single organization is not responsible for all of Indiana's smaller communities, projects are identified, developed and built on a project-by-project selection basis.

### *Rural (Group IV) Program*

The Rural Group IV program serves all rural counties, and communities with populations less than 5,000. This program is used for any variety of transportation investments but is most commonly used to rehabilitate and replace roads, or provide for new roads. Like Group III projects, Rural Projects are selected, developed and built on a statewide project-by-project basis.

### *Local Bridge Preservation Program*

The purpose of the Local Bridge Preservation Program is to rehabilitate and replace existing local bridges across the state of Indiana. Projects are selected, developed and built statewide on a project-by-project basis.

### *Transportation Enhancements Program*

The Transportation Enhancements Program funds projects that provide for less traditional forms of highway transportation such as bike/pedestrian facilities, a scenic highway program and Streetscaping. The Transportation Committee selects projects for development statewide. As projects become ready for construction, funds are provided to ensure they are completed.

### *Recreational Trails Program*

The Recreational Trails Program (RTP) is a financial assistance program for the acquisition and/or development of motorized and non-motorized recreational trails projects. Eligible applicants include all units of government and 501(c) (3) non-profit organizations. RTP is a matching grant program (80% federal/20% match) administered by the Indiana Department of Natural Resources. Funds for the program were made available from TEA-21. Grant rounds are offered annually with applications generally available February 1, and due back by May 1.

### *Federal Lands Highway Program*

Federal Lands Highway Program provides funding for a coordinated program of public roads and transit facilities serving federal and Indian lands. The STIP provides project information on the Forest Highway, Public Lands Discretionary and the Indiana Preservation Roads.

### *National Scenic Byways Program*

National Scenic Byways funds are for highways that have been designated as a national or state scenic, historic, or back-country byway. The Scenic Byways program was established in the previous federal highway act, ISTEA, and continues in TEA-21. Funds are available for technical assistance for planning, design and development of byways projects.

### *Public Lands Highway Program*

This program is for roads within National Parks. Projects can be for a variety of purposes including but not limited to planning, construction and reconstruction of facilities, and bicycle facilities within national parks.

## **FEDERAL-AID DISCRETIONARY PROGRAMS**

There are several other special federal funding categories referred to as federal-aid discretionary programs. Projects for funding are selected thru a process managed thru the Federal Highway Administration rather than at the Indiana Department of Transportation.

Each program has its own eligibility and selection criteria that are established by law, by regulation, or administratively. In recent years, the Congress has selected these projects for funding in the programs described below.

#### *National Corridors & Borders Program*

National Corridors and Borders funds are for planning, construction, or operating projects that serve international border states and nationally recognized high-priority corridors.

#### *Transportation & Community & System Preservation Pilot Program (TCSP)*

Funding from the Transportation and Community and System Preservation Pilot Program can be used for planning, development and implementing strategies to integrate transportation and community and system preservation plans and practices.

#### *National Historic Covered Bridge Preservation Program*

National Historic Covered Bridge Preservation are to provide for the rehabilitation or repair of a historic covered bridge (listed or eligible for listing on the National Register of Historic Places); and for preservation of a historic covered bridge by installation of a fire protection system including fireproofing or fire detection and sprinklers. Funds may be used to collect and disseminate information concerning covered bridges.

## **Environmental Justice**

INDOT is currently addressing new federal rules concerning Environmental Justice. The U.S. Department of Transportation's (DOT's) Final Order to address Environmental Justice in Minority Populations and Low-Income Populations was published by the U.S. DOT to comply with Executive Order 12989, "Federal Actions to Address Environmental Justice Minority Populations and Low-Income Populations," dated February 11, 1994.

The Environmental Justice (EJ) Orders require the U.S. DOT and its operation administrations to integrate the goals of these orders, into their operations through a process developed within the framework of existing requirements, primarily the National Environmental Policy Act (NEPA) and Title VI of the Civil Rights Act of 1964, the Uniform Relocation Assistance Real Property Acquisitions Policy Act of 1970 (URA), TEA 21 and other DOT applicable statutes, regulations and guidance that concern planning, social economic, or environmental matters, public health or welfare, and public involvement.

Since the passage of NEPA, the FHWA has built a framework of policies and procedures to help meet its social, economic and environmental responsibilities while accomplishing its transportation mission. Environmental Justice (EJ) is a formal expression of FHWA's commitment to the protection and enhancement of our environment. INDOT's Strategic Plan emphasizes the protection and enhancement of the environment, both natural and human, affected by Indiana's transportation system. The strategic plan emphasizes listening to and better serving all of INDOT's customers.

INDOT is making a special effort to evaluate and improve the planning and program process to ensure compliance with environmental justice regulations. As part of this initiative, improvements are being made to the planning-level statewide public involvement activities and procedures. This effort includes an outreach to minority and low income population groups. INDOT revised its Public Involvement Procedures, approved March 25, 2009, which includes procedures to better communicate with minority and low-income population groups.

The statewide planning process and statewide transportation improvement program is built upon a partnership based planning and programming process with the state's MPO's. INDOT recognizes the critical role that MPO's play in implementing the environmental justice regulations. As part of this cooperative process INDOT and the MPO's participated in a November 2000 FHWA Environmental Justice Workshop. INDOT participates in the cooperative transportation planning process including activities to insure environmental justice with each MPO jurisdiction. An effective statewide planning and programming process incorporates transportation planning activities under both local and state jurisdictions. Therefore, INDOT relies on MPO's to include activities to insure compliance with environmental justice regulations as part of their transportation planning work program, long range transportation plan development and transportation improvement program development activities. INDOT makes use of the demographic analysis of the MPO's transportation benefits and burdens. INDOT utilizes the MPO public involvement process and environmental justice procedures as a major resource in the development of transportation improvement projects.

## **PUBLIC INVOLVEMENT PROCESS**

The public is involved in the planning process for transportation projects funded with FHWA dollars. Annually, INDOT meets with citizens across the state to discuss transportation issues, programmed projects and to provide time for public involvement in the development of their transportation programs. New this cycle, INDOT developed an on-line process to offer the public another avenue in which to provide the agency with feedback. The draft STIP was published on our internet site along with an on line form for submitting remarks. This new option for the public resulted in INDOT receiving over 75 electronic comments. Public involvement comments and press releases are included as a separate document. (available upon request).

The district public meetings are listed below:

<p><b>Crawfordsville District</b> Meeting held at North Montgomery High School 201 West CR 300N Crawfordsville, Indiana Wednesday, November 18, 2009 1:00 – 4:00 pm</p>	<p><b>Fort Wayne District</b> Meeting held at the Fort Wayne District, 5333 Hatfield Road Fort Wayne, Indiana Tuesday, November 17, 2009 1:00 – 5:00 pm</p>
<p><b>Greenfield District</b> Meeting held at the Greenfield District Building 32 South Broadway Street Greenfield, Indiana Thursday, November 19, 2009 1:00 – 5:00 pm</p>	<p><b>LaPorte District</b> Meeting held at the District Office Building 315 East Boyd Boulevard LaPorte, Indiana Friday, November 20, 2009 8:00 – 12:00 am</p>

<p><b>Seymour District</b>  Meeting held at the District Office Building  185 Agrico Lane  Seymour, Indiana  Thursday, November 19, 2009  1:00 – 5:00 pm</p>	<p><b>Vincennes District</b>  Held at the District Office Building  5650 South US 41  Vincennes, Indiana  Thursday, November 19, 2009  8:00 – 12:00 am</p>
--	--

## AMENDMENT PROCEDURES

As has been mentioned previously, the Statewide Transportation Improvement Program is dynamic. Projects, their costs, and when they are ready may change for a variety of reasons. From time to time, amendments may be made to this document. However, they will vary depending upon the type of change being considered.

When a project is located within an area that, according to the federal Environmental Protection Agency, is in non-attainment maintenance status for air quality reasons, projects must first be reviewed for adequate planning support and approval prior to their being included in this document. Once this MPO amendment approval has been granted, and the FHWA-FTA confirmation has been issued, the projects will be amended and activities may proceed.

If a project is not located within an MPO or non-attainment maintenance area and a change is required, then a simple amendment will be processed. For projects that change in costs only or move from one year to another, an administrative modification may be processed.

STIP amendments will be listed on its own summary page until the next full STIP document is prepared.

## METROPOLITAN AREA TRANSPORTATION IMPROVEMENT PROGRAMS (TIP's)

The following TIP's are incorporated into Indiana's Statewide Transportation Improvement Program by reference. When TIP's are revised and approved, they will be specifically incorporated into this document by amendments to their respective regions. MPO's should submit their TIP's to INDOT not later than July 1 of each year to allow for timely review and inclusion in INDOT's public meetings on the STIP and submission to the Federal Highway Administration.

**Anderson Metropolitan Area**  
**MPO:** Madison County Council of Governments  
16 East Ninth Street  
Anderson, Indiana 46016  
(765) 641-9482

**Lafayette-West Lafayette Metropolitan Area**  
**MPO:** Tippecanoe County Area Plan Commission  
20 North Third Street  
Lafayette, Indiana 47901  
(765) 423-9242

**Bloomington Urban Area**

**MPO:** Bloomington Area Transportation Study  
401 North Morton, Suite 160  
Bloomington, Indiana 47402  
(812) 349-3423

**Louisville Metropolitan Area**

**MPO:** Kokomo and Howard County Governmental  
Coordinating Council  
120 East Mulberry, Suite 116  
Kokomo, Indiana 46901  
(765) 456-2336

**Terre Haute Metropolitan Area**

**MPO:** West Central Economic Development District,  
Inc.  
1718 Wabash Avenue  
Terre Haute, Indiana 47808  
(812) 238-1561

## OPERATIONS & MAINTENANCE COSTS

Resources for operations & maintenance costs for the existing transportation system are required to be provided for, as part of developing the Statewide Transportation Improvement Program. The Indiana Department of Transportation provides for these expenses through separate budgets for operations & maintenance activities, which are approved by the Indiana State Legislature.

For the state fiscal years 2009-2010, 2010, and 2011, the Indiana Legislature approved the following budgets for the department:

	FY 2009-2010	FY 2010-2011
<b>HIGHWAY OPERATING</b>		
State Highway Fund (IC 8-23-9-54)		
Personal Services	\$256,703,031	\$252,219,117
Other Operating Expense	\$ 63,309,536	\$ 63,309,536
 <b>HIGHWAY VEHICLE AND ROAD MAINTENANCE EQUIPMENT</b>		
State Highway Fund (IC 8-23-9-54)		
Other Operating Expense	\$ 8,800,000	\$ 18,000,000

The above appropriations for highway operating and highway vehicle and road maintenance equipment may be used for personal services, equipment, and other operative expense, including the cost of transportation for the governor.

<b>HIGHWAY MAINTENANCE WORK PROGRAM</b>		
State Highway Fund (IC 8-23-9-54)		
Other Operating Expense	\$ 63,000,000	\$ 70,000,000

The above appropriations for the highway maintenance work program may be used for:

- (1) materials for patching roadways and shoulders;
- (2) repairing and painting bridges;
- (3) installing signs and signals and painting roadways for traffic control
- (4) mowing, herbicide application, and brush control;
- (5) drainage control;
- (6) maintenance of rest areas, public roads on properties of the department of natural resources, and driveways on the premises of all state facilities
- (7) materials for snow and ice removal
- (8) utility costs for roadway lighting; and
- (9) other special maintenance and support activities consistent with the highway maintenance work program

## STIP Financial Summary

	<i>FY 2010</i>	<i>FY 2011</i>	<i>FY 2012</i>	<i>FY 2013</i>
<b>RESOURCES:</b>
