Subject: RE: HDPE pipe

Attention all Designers and Reviewers,

The INDOT Pipe Committee would like to consider allowing up to 48" diameter HDPE to be installed on select projects. We are interested in projects with an RFC of January 2009 or later. In order to get a pool of projects to consider, if you have or know of a project that is on a 2-lane facility (not a divided highway) that has either a 42" diameter and/or 48" diameter smooth pipe please provide the following information:

Primary des no.

Current AADT

Design Year AADT

Current RFC Date

Plan Status (ie, PFC, FFC, etc...)

How many 42" diameter pipes and 48" diameter pipes and the respective heights of cover.

If you have a project that meets the above qualifications, please email this information to Merrill Dougherty

(mdougherty@indot.IN.gov).

Please respond by NOVEMBER 7th.

Thanks

John Wright
Roadway Services Manager

We would now like to extend that offer in include large trunk storm drains. We are looking for 8 to 10 test projects.

Please email this information to Merrill Dougherty (mdougherty@indot.IN.gov).

Thanks

John Wright
Roadway Services Manager
