TO: **GOVERNOR EVAN BAYH and OTHER ELECTED OFFICIALS**

FROM: **THE CITIZENS OF INDIANA**

With my signature and donation I join the Hoosier Environmental Council and my fellow citizens in demanding that the State spend its transportation dollars on cleaner, more energy efficient transportation programs that will reduce air pollution and climate change, while providing jobs for Indiana citizens.

I reject the State's plans to spend over $1 billion on a new Indianapolis-to-Evansville Highway, which will save only 8 minutes in travel time, and was found by an independent government study to be a waste of our tax dollars.

I support the JOBS AND ENVIRONMENT TRANSPORTATION PLAN that: calls for repairing existing roads; protects our natural heritage and reduces air pollution; uses existing funds for improved mass transit including passenger trains; and allows for "town hall" discussions at public transportation project hearings.

TO: GOVERNOR EVAN BAYH and OTHER ELECTED OFFICIALS

FROM: THE CITIZENS OF INDIANA

With my signature and donation I join the Hoosier Environmental Council in demanding a State Transportation Plan that reduces air pollution, climate change, and traffic congestion while promoting economic development.

I reject the State's plan to spend one billion dollars on a new, uneconomical superhighway that the government's own study has found to be a waste of our tax dollars.

Therefore, I support the JOBS AND ENVIRONMENT TRANSPORTATION PLAN that calls for repairing existing roads, using existing funds for mass transit and high speed rail, and allowing "town hall" discussions at public transportation project hearings.

HECAF Hoosier Environmental Council ACTION FUND

TO: **GOVERNOR EVAN BAYH and OTHER ELECTED OFFICIALS**

FROM. **THE CITIZENS OF INDIANA**

With my signature and donation I join the Hoosier Environmental Council and my fellow citizens in demanding that the State spend its transportation dollars on cleaner, more energy efficient transportation programs that will reduce air pollution and climate change, while providing jobs for Indiana citizens.

I reject the State's plans to spend over $1 billion on a new Indianapolis-to-Evansville Highway, which will save only 8 minutes in travel time, and was found by an independent government study to be a waste of our tax dollars.

I support the JOBS AND ENVIRONMENT TRANSPORTATION PLAN that: calls for repairing existing roads; protects our natural heritage and reduces air pollution; uses existing funds for improved mass transit including passenger trains; and allows for "town hall" discussions at public transportation project hearings.

HECAF
Hoosier Environmental Council
ACTION FUND

TO: GOVERNOR EVAN BAYH and OTHER ELECTED OFFICIALS

FROM: THE CITIZENS OF INDIANA

With my signature and donation I join the Hoosier Environmental Council in demanding a State Transportation Plan that reduces air pollution, climate change, and traffic congestion while promoting economic development.

I reject the State's plan to spend one billion dollars on a new, uneconomical superhighway that the government's own study has found to be a waste of our tax dollars.

Therefore, I support the JOBS AND ENVIRONMENT TRANSPORTATION PLAN that calls for repairing existing roads, using existing funds for mass transit and high speed rail, and allowing "town hall" discussions at public transportation project hearings.

HECAF Hoosier Environmental Council ACTION FUND

TO: **GOVERNOR EVAN BAYH and OTHER ELECTED OFFICIALS**

FROM: **THE CITIZENS OF INDIANA**

With my signature and donation I join the Hoosier Environmental Council in demanding a State Transportation Plan that reduces air pollution, climate change, and traffic congestion while promoting economic development

I reject the State's plan to spend one billion dollars on a new, uneconomical superhighway that the government's own study has found to be a waste of our tax dollars.

Therefore, I support the JOBS AND ENVIRONMENT TRANSPORTATION PLAN that calls for repairing existing roads, using existing funds for mass transit and high speed rail, and allowing "town hall" discussions at publ c transportation project hearings.

HECAF Hoosier Environmental Council ACTION FUND

TO: **GOVERNOR EVAN BAYH and OTHER ELECTED OFFICIALS**

FROM: **THE CITIZENS OF INDIANA**

With my signature and donation I join the Hoosier Environmental Council and my fellow citizens in demanding that the State spend its transportation dollars on cleaner, more energy efficient transportation programs that will reduce air pollution and climate change, while providing jobs for Indiana citizens.

I reject the State's plans to spend over $1 billion on a new Indianapolis-to-Evansville Highway, which will save only 8 minutes in travel time, and was found by an independent government study to be a waste of our tax dollars.

I support the JOBS AND ENVIRONMENT TRANSPORTATION PLAN that: calls for repairing existing roads; protects our natural heritage and reduces air pollution; uses existing funds for improved mass transit including passenger trains; and allows for "town hall" discussions at public transportation project hearings.

HECAF Hoosier Environmental Council

TO: **GOVERNOR EVAN BAYH and OTHER ELECTED OFFICIALS**

FROM: **THE CITIZENS OF INDIANA**

With my signature and donation I join the Hoosier Environmental Council in demanding a State Transportation Plan that reduces air pollution, climate change, and traffic congestion while promoting economic development.

I reject the State's plan to spend one billion dollars on a new, uneconomical superhighway that the government's own study has found to be a waste of our tax dollars.

Therefore, I support the JOBS AND ENVIRONMENT TRANSPORTATION PLAN that calls for repairing existing roads, using existing funds for mass transit and high speed rail, and allowing "town hall" discussions at public transportation project hearings.

FROM: **THE CITIZENS OF INDIANA**

With my signature and donation I join the Hoosier Environmental Council in demanding a State Transportation Plan that reduces air pollution, climate change, and traffic congestion while promoting economic development.

I reject the State's plan to spend one billion dollars on a new, uneconomical superhighway that the government's own study has found to be a waste of our tax dollars.

Therefore, I support the JOBS AND ENVIRONMENT TRANSPORTATION PLAN that calls for repairing existing roads, using existing funds for mass transit and high speed rail, and allowing "town hall" discussions at publi transportation project hearings.

HECAF Hoosier Environmental Council ACTION FUND

TO: **GOVERNOR EVAN BAYH and OTHER ELECTED OFFICIALS**

FROM: **THE CITIZENS OF INDIANA**

With my signature and donation I join the Hoosier Environmental Council and my fellow citizens in demanding that the State spend its transportation dollars on cleaner, more energy efficient transportation programs that will reduce air pollution and climate change, while providing jobs for Indiana citizens.

I reject the State's plans to spend over $1 billion on a new Indianapolis-to-Evansville Highway, which will save only 8 minutes in travel time, and was found by an independent government study to be a waste of our tax dollars.

I support the JOBS AND ENVIRONMENT TRANSPORTATION PLAN that: calls for repairing existing roads; protects our natural heritage and reduces air pollution; uses existing funds for improved mass transit including passenger trains; and allows for "town hall" discussions at public transportation project hearings.

HECAF
Hoosier Environmental Council
ACTION FUND

TO: **GOVERNOR EVAN BAYH and OTHER ELECTED OFFICIALS**

FROM: **THE CITIZENS OF INDIANA**

With my signature and donation I join the Hoosier Environmental Council and my fellow citizens in demanding that the State spend its transportation dollars on cleaner, more energy efficient transportation programs that will reduce air poll... and climate change, while providing jobs for Indiana citizens.

I reject the State's plans to spend over $1 billion on a new Indianapolis-to-Evansville Highway, which will save only 8 minutes in travel time, and was found by an independent government study to be a waste of our tax dollars.

I support the JOBS AND ENVIRONMENT TRANSPORTATION PLAN that: calls for repairing existing roads; protects ou... natural heritage and reduces air pollution; uses existing funds for improved mass transit including passenger trains; an... allows for "town hall" discussions at public transportation project hearings.

Hoosier Environmental Council
ACTION FUND

TO: **THE AIR POLLUTION CONTROL BOARD** and **GOVERNOR EVAN BAYH**

FROM: **CITIZENS OF NORTHWEST INDIANA**

With my signature and donation I join the Hoosier Environmental Council in demanding that the State:

1) **Adopt a rule** calling for no new large sources of ozone pollution in severe ozone areas until proven and enforceable reductions from existing sources are achieved. Accordingly I call for a public hearing on this issue pursuant to state law (IC 13-7-7-3).

2) **Implement the Clean Air Act** to bring existing polluters into compliance and bring healthy air for the citizens of Northwest Indiana without delay.

3) **Provide public participation** in the permitting process including notification of adjoining property owners and interested persons, as well as the availability of permit information at public locations, such as libraries.

FROM: **THE CITIZENS OF INDIANA**

With my signature and donation I join the Hoosier Environmental Council and my fellow citizens in demanding that the State spend its transportation dollars on cleaner, more energy efficient transportation programs that will reduce air pol and climate change, while providing jobs for Indiana citizens.

I reject the State's plans to spend over $1 billion on a new Indianapolis-to-Evansville Highway, which will save only 8 minutes in travel time, and was found by an independent government study to be a waste of our tax dollars.

I support the JOBS AND ENVIRONMENT TRANSPORTATION PLAN that: calls for repairing existing roads; protects c natural heritage and reduces air pollution; uses existing funds for improved mass transit including passenger trains; an allows for "town hall" discussions at public transportation project hearings.

FROM: THE CITIZENS OF INDIANA

With my signature and donation I join the Hoosier Environmental Council and my fellow citizens in demanding that th State spend its transportation dollars on cleaner, more energy efficient transportation programs that will reduce air pc and climate change, while providing jobs for Indiana citizens.

I reject the State's plans to spend over $1 billion on a new Indianapolis-to-Evansville Highway, which will save only 8 minutes in travel time, and was found by an independent government study to be a waste of our tax dollars.

I support the JOBS AND ENVIRONMENT TRANSPORTATION PLAN that: calls for repairing existing roads; protects natural heritage and reduces air pollution; uses existing funds for improved mass transit including passenger trains; a allows for "town hall" discussions at public transportation project hearings.

Hoosier Environmental Council
ACTION FUND

TO: **GOVERNOR EVAN BAYH and OTHER ELECTED OFFICIALS**

FROM. **THE CITIZENS OF INDIANA**

With my signature and donation I join the Hoosier Environmental Council and my fellow citizens in demanding that the State spend its transportation dollars on cleaner, more energy efficient transportation programs that will reduce air pollution and climate change, while providing jobs for Indiana citizens.

I reject the State's plans to spend over $1 billion on a new Indianapolis-to-Evansville Highway, which will save only 8 minutes in travel time, and was found by an independent government study to be a waste of our tax dollars.

I support the JOBS AND ENVIRONMENT TRANSPORTATION PLAN that: calls for repairing existing roads; protects our natural heritage and reduces air pollution; uses existing funds for improved mass transit including passenger trains; and allows for "town hall" discussions at public transportation project hearings.

Hoosier Environmental Council

TO: **GOVERNOR EVAN BAYH and OTHER ELECTED OFFICIALS**

FROM: **THE CITIZENS OF INDIANA**

With my signature and donation I join the Hoosier Environmental Council and my fellow citizens in demanding that the State spend its transportation dollars on cleaner, more energy efficient transportation programs that will reduce air pollution and climate change, while providing jobs for Indiana citizens.

I reject the State's plans to spend over $1 billion on a new Indianapolis-to-Evansville Highway, which will save only 8 minutes in travel time, and was found by an independent government study to be a waste of our tax dollars.

I support the JOBS AND ENVIRONMENT TRANSPORTATION PLAN that: calls for repairing existing roads; protects our natural heritage and reduces air pollution; uses existing funds for improved mass transit including passenger trains; and allows for "town hall" discussions at public transportation project hearings.

Hoosier Environmental Council

TO: **GOVERNOR EVAN BAYH and OTHER ELECTED OFFICIALS**

FROM. **THE CITIZENS OF INDIANA**

With my signature and donation I join the Hoosier Environmental Council and my fellow citizens in demanding that the State spend its transportation dollars on cleaner, more energy efficient transportation programs that will reduce air pollution and climate change, while providing jobs for Indiana citizens.

I reject the State's plans to spend over $1 billion on a new Indianapolis-to-Evansville Highway, which will save only 8 minutes in travel time, and was found by an independent government study to be a waste of our tax dollars.

I support the JOBS AND ENVIRONMENT TRANSPORTATION PLAN that: calls for repairing existing roads; protects our natural heritage and reduces air pollution; uses existing funds for improved mass transit including passenger trains; and allows for "town hall" discussions at public transportation project hearings.

HECAF Hoosier Environmental Council ACTION FUND

TO: GOVERNOR EVAN BAYH and OTHER ELECTED OFFICIALS

FROM: THE CITIZENS OF INDIANA

With my signature and donation I join the Hoosier Environmental Council in demanding a State Transportation Plan that reduces air pollution, climate change, and traffic congestion while promoting economic development.

I reject the State's plan to spend one billion dollars on a new, uneconomical superhighway that the government's own study has found to be a waste of our tax dollars.

Therefore, I support the JOBS AND ENVIRONMENT TRANSPORTATION PLAN that calls for repairing existing roads, using existing funds for mass transit and high speed rail, and allowing "town hall" discussions at public transportation project hearings.

HECAF Hoosier Environmental Council ACTION FUND

TO: **GOVERNOR EVAN BAYH and OTHER ELECTED OFFICIALS**

FROM: **THE CITIZENS OF INDIANA**

With my signature and donation I join the Hoosier Environmental Council and my fellow citizens in demanding that the State spend its transportation dollars on cleaner, more energy efficient transportation programs that will reduce air pollution and climate change, while providing jobs for Indiana citizens.

I reject the State's plans to spend over $1 billion on a new Indianapolis-to-Evansville Highway, which will save only 8 minutes in travel time, and was found by an independent government study to be a waste of our tax dollars.

I support the JOBS AND ENVIRONMENT TRANSPORTATION PLAN that: calls for repairing existing roads; protects our natural heritage and reduces air pollution; uses existing funds for improved mass transit including passenger trains; and allows for "town hall" discussions at public transportation project hearings.

HECAF
Hoosier Environmental Council
ACTION FUND

TO: **GOVERNOR EVAN BAYH and OTHER ELECTED OFFICIALS**

FROM: **THE CITIZENS OF INDIANA**

With my signature and donation I join the Hoosier Environmental Council in demanding a State Transportation Plan that reduces air pollution, climate change, and traffic congestion while promoting economic development

I reject the State's plan to spend one billion dollars on a new, uneconomical superhighway that the government's own study has found to be a waste of our tax dollars.

Therefore, I support the JOBS AND ENVIRONMENT TRANSPORTATION PLAN that calls for repairing existing roads, using existing funds for mass transit and high speed rail, and allowing "town hall" discussions at publ transportation project hearings.

TO: **GOVERNOR EVAN BAYH and OTHER ELECTED OFFICIALS**

FROM: **THE CITIZENS OF INDIANA**

With my signature and donation I join the Hoosier Environmental Council and my fellow citizens in demanding that the State spend its transportation dollars on cleaner, more energy efficient transportation programs that will reduce air pollution and climate change, while providing jobs for Indiana citizens.

I reject the State's plans to spend over $1 billion on a new Indianapolis-to-Evansville Highway, which will save only 8 minutes in travel time, and was found by an independent government study to be a waste of our tax dollars.

I support the JOBS AND ENVIRONMENT TRANSPORTATION PLAN that: calls for repairing existing roads; protects our natural heritage and reduces air pollution; uses existing funds for improved mass transit including passenger trains; and allows for "town hall" discussions at public transportation project hearings.

FROM: **THE CITIZENS OF INDIANA**

With my signature and donation I join the Hoosier Environmental Council and my fellow citizens in demanding that the State spend its transportation dollars on d[illegible]more energy efficient transportation programs that will reduce air pollution and climate change, while providing jobs for Indiana citizens.

I reject the State's plans to spend over $1 billion on a new Indianapolis-to-Evansville Highway, which will save only 8 minutes in travel time, and was found by an independent government study to be a waste of our tax dollars.

I support the JOBS AND ENVIRONMENT TRANSPORTATION PLAN that: calls for repairing existing roads; protects our natural heritage and reduces air pollution; uses existing funds for improved mass transit including passenger trains; and allows for "town hall" discussions at public transportation project hearings.

With my signature and donation I join the Hoosier Environmental Council and my fellow citizens in demanding that the State spend its transportation dollars on cleaner, more energy efficient transportation programs that will reduce air pollution and climate change, while providing jobs for Indiana citizens.

I reject the State's plans to spend over $1 billion on a new Indianapolis-to-Evansville Highway, which will save only 8 minutes in travel time, and was found by an independent government study to be a waste of our tax dollars.

I support the JOBS AND ENVIRONMENT TRANSPORTATION PLAN that: calls for repairing existing roads; protects our natural heritage and reduces air pollution; uses existing funds for improved mass transit including passenger trains; and allows for "town hall" discussions at public transportation project hearings.

TO: GOVERNOR EVAN BAYH and OTHER ELECTED OFFICIALS

FROM: THE CITIZENS OF INDIANA

With my signature and donation I join the Hoosier Environmental Council in demanding a State Transportation Plan that reduces air pollution, climate change, and traffic congestion while promoting economic development.

I reject the State's plan to spend one billion dollars on a new, uneconomical superhighway that the government's own study has found to be a waste of our tax dollars.

Therefore, I support the JOBS AND ENVIRONMENT TRANSPORTATION PLAN that calls for repairing existing roads, using existing funds for mass transit and high speed rail, and allowing "town hall" discussions at public transportation project hearings.

Hoosier Environmental Council

TO: GOVERNOR EVAN BAYH and OTHER ELECTED OFFICIALS

FROM: THE CITIZENS OF INDIANA

With my signature and donation I join the Hoosier Environmental Council in demanding a State Transportation Plan that reduces air pollution, climate change, and traffic congestion while promoting economic development.

I reject the State's plan to spend one billion dollars on a new, uneconomical superhighway that the government's own study has found to be a waste of our tax dollars.

Therefore, I support the JOBS AND ENVIRONMENT TRANSPORTATION PLAN that calls for repairing existing roads, using existing funds for mass transit and high speed rail, and allowing "town hall" discussions at public transportation project hearings.

HECAF Hoosier Environmental Council

TO: **GOVERNOR EVAN BAYH and OTHER ELECTED OFFICIALS**

FROM: **THE CITIZENS OF INDIANA**

With my signature and donation I join the Hoosier Environmental Council and my fellow citizens in demanding that the State spend its transportation dollars on cleaner, more energy efficient transportation programs that will reduce air pollution and climate change, while providing jobs for Indiana citizens.

I reject the State's plans to spend over $1 billion on a new Indianapolis-to-Evansville Highway, which will save only 8 minutes in travel time, and was found by an independent government study to be a waste of our tax dollars.

I support the JOBS AND ENVIRONMENT TRANSPORTATION PLAN that: calls for repairing existing roads; protects our natural heritage and reduces air pollution; uses existing funds for improved mass transit including passenger trains; and allows for "town hall" discussions at public transportation project hearings.

HECAF Hoosier Environmental Council

TO: **GOVERNOR EVAN BAYH and OTHER ELECTED OFFICIALS**

FROM. **THE CITIZENS OF INDIANA**

With my signature and donation I join the Hoosier Environmental Council and my fellow citizens in demanding that the State spend its transportation dollars on cleaner, more energy efficient transportation programs that will reduce air pollution and climate change, while providing jobs for Indiana citizens.

I reject the State's plans to spend over $1 billion on a new Indianapolis-to-Evansville Highway, which will save only 8 minutes in travel time, and was found by an independent government study to be a waste of our tax dollars.

I support the JOBS AND ENVIRONMENT TRANSPORTATION PLAN that: calls for repairing existing roads; protects our natural heritage and reduces air pollution; uses existing funds for improved mass transit including passenger trains; and allows for "town hall" discussions at public transportation project hearings.

With my signature and donation I join the Hoosier Environmental Council and my fellow citizens in demanding that the State spend its transportation dollars on cleaner, more energy efficient transportation programs that will reduce air pollution and climate change, while providing jobs for Indiana citizens.

I reject the State's plans to spend over $1 billion on a new Indianapolis-to-Evansville Highway, which will save only 8 minutes in travel time, and was found by an independent government study to be a waste of our tax dollars.

I support the JOBS AND ENVIRONMENT TRANSPORTATION PLAN that: calls for repairing existing roads; protects our natural heritage and reduces air pollution; uses existing funds for improved mass transit including passenger trains; and allows for "town hall" discussions at public transportation project hearings.

HECAF Hoosier Environmental

TO: **GOVERNOR EVAN BAYH and OTHER ELECTED OFFICIALS**

FROM: **THE CITIZENS OF INDIANA**

With my signature and donation I join the Hoosier Environmental Council in demanding a State Transportation Plan that reduces air pollution, climate change, and traffic congestion while promoting economic development.

I reject the State's plan to spend one billion dollars on a new, uneconomical superhighway that the government's own study has found to be a waste of our tax dollars.

Therefore, I support the JOBS AND ENVIRONMENT TRANSPORTATION PLAN that calls for repairing existing roads, using existing funds for mass transit and high speed rail, and allowing "town hall" discussions at public transportation project hearings.

Hoosier Environmental Council
ACTION FUND

TO: **GOVERNOR EVAN BAYH and OTHER ELECTED OFFICIALS**

FROM: **THE CITIZENS OF INDIANA**

With my signature and donation I join the Hoosier Environmental Council in demanding a State Transportation Plan that reduces air pollution, climate change, and traffic congestion while promoting economic development.

I reject the State's plan to spend one billion dollars on a new, uneconomical superhighway that the government's own study has found to be a waste of our tax dollars.

Therefore, I support the JOBS AND ENVIRONMENT TRANSPORTATION PLAN that calls for repairing existing roads, using existing funds for mass transit and high speed rail, and allowing "town hall" discussions at public transportation project hearings.

TO: **THE AIR POLLUTION CONTROL BOARD** and **GOVERNOR EVAN BAYH**

FROM: **CITIZENS OF NORTHWEST INDIANA**

With my signature and donation I join the Hoosier Environmental Council in demanding that the State:

1) **Adopt a rule** calling for no new large sources of ozone pollution in severe ozone areas until proven and enforceable reductions from existing sources are achieved. Accordingly I call for a public hearing on this issue pursuant to state law (IC 13-7-7-3).

2) **Implement the Clean Air Act** to bring existing polluters into compliance and bring healthy air for the citizens of Northwest Indiana without delay.

3) **Provide public participation** in the permitting process including notification of adjoining property owners and interested persons, as well as the availability of permit information at public locations, such as libraries.

HECAF Hoosier Environmental Council ACTION FUND

TO: **GOVERNOR EVAN BAYH** and **OTHER ELECTED OFFICIALS**

FROM: **THE CITIZENS OF INDIANA**

With my signature and donation I join the Hoosier Environmental Council and my fellow citizens in demanding that the State spend its transportation dollars on cleaner, more energy efficient transportation programs that will reduce air pollution and climate change, while providing jobs for Indiana citizens.

I reject the State's plans to spend over $1 billion on a new Indianapolis-to-Evansville Highway, which will save only 8 minutes in travel time, and was found by an independent government study to be a waste of our tax dollars.

I support the JOBS AND ENVIRONMENT TRANSPORTATION PLAN that: calls for repairing existing roads; protects our natural heritage and reduces air pollution; uses existing funds for improved mass transit including passenger trains; and allows for "town hall" discussions at public transportation project hearings.

TO: **THE AIR POLLUTION CONTROL BOARD** and **GOVERNOR EVAN BAYH**

FROM: **CITIZENS OF NORTHWEST INDIANA**

With my signature and donation I join the Hoosier Environmental Council in demanding that the State:

1) **Adopt a rule** calling for no new large sources of ozone pollution in severe ozone areas until proven and enforceable reductions from existing sources are achieved. Accordingly I call for a public hearing on this issue pursuant to state law (IC 13-7-7-3).

2) **Implement the Clean Air Act** to bring existing polluters into compliance and bring healthy air for the citizens of Northwest Indiana without delay.

3) **Provide public participation** in the permitting process including notification of adjoining property owners and interested persons, as well as the availability of permit information at public locations, such as libraries.

HECAF
Hoosier Environmental Council
ACTION FUND

TO: **GOVERNOR EVAN BAYH and OTHER ELECTED OFFICIALS**

FROM: **THE CITIZENS OF INDIANA**

With my signature and donation I join the Hoosier Environmental Council and my fellow citizens in demanding that the State spend its transportation dollars on cleaner, more energy efficient transportation programs that will reduce air pollution and climate change, while providing jobs for Indiana citizens.

I reject the State's plans to spend over $1 billion on a new Indianapolis-to-Evansville Highway, which will save only 8 minutes in travel time, and was found by an independent government study to be a waste of our tax dollars.

I support the JOBS AND ENVIRONMENT TRANSPORTATION PLAN that: calls for repairing existing roads; protects our natural heritage and reduces air pollution; uses existing funds for improved mass transit including passenger trains; and allows for "town hall" discussions at public transportation project hearings.

With my signature and donation I join the Hoosier Environmental Council in demanding a State Transportation Plan that reduces air pollution, climate change, and traffic congestion while promoting economic development

I reject the State's plan to spend one billion dollars on a new, uneconomical superhighway that the government's own study has found to be a waste of our tax dollars.

Therefore, I support the JOBS AND ENVIRONMENT TRANSPORTATION PLAN that calls for repairing existing roads, using existing funds for mass transit and high speed rail, and allowing "town hall" discussions at public transportation project hearings.

For HECAF _____

_____ Date _____

HECAF Hoosier Environmental Council ACTION FUND

TO: **GOVERNOR EVAN BAYH and OTHER ELECTED OFFICIALS**

FROM: **THE CITIZENS OF INDIANA**

With my signature and donation I join the Hoosier Environmental Council and my fellow citizens in demanding that the State spend its transportation dollars on cleaner, more energy efficient transportation programs that will reduce air pollution and climate change, while providing jobs for Indiana citizens.

I reject the State's plans to spend over $1 billion on a new Indianapolis-to-Evansville Highway, which will save only 8 minutes in travel time, and was found by an independent government study to be a waste of our tax dollars.

I support the JOBS AND ENVIRONMENT TRANSPORTATION PLAN that: calls for repairing existing roads; protects our natural heritage and reduces air pollution; uses existing funds for improved mass transit including passenger trains; and allows for "town hall" discussions at public transportation project hearings.

HECAF Hoosier Environmental Council ACTION FUND

TO: **GOVERNOR EVAN BAYH and OTHER ELECTED OFFICIALS**

FROM: **THE CITIZENS OF INDIANA**

With my signature and donation I join the Hoosier Environmental Council in demanding a State Transportation Plan that reduces air pollution, climate change, and traffic congestion while promoting economic development

I reject the State's plan to spend one billion dollars on a new, uneconomical superhighway that the government's own study has found to be a waste of our tax dollars.

Therefore, I support the JOBS AND ENVIRONMENT TRANSPORTATION PLAN that calls for repairing existing roads, using existing funds for mass transit and high speed rail, and allowing "town hall" discussions at publi transportation project hearings.

HECAF
Hoosier Environmental Council
ACTION FUND

TO: **GOVERNOR EVAN BAYH and OTHER ELECTED OFFICIALS**

FROM: **THE CITIZENS OF INDIANA**

With my signature and donation I join the Hoosier Environmental Council and my fellow citizens in demanding that the State spend its transportation dollars on cleaner, more energy efficient transportation programs that will reduce air pollution and climate change, while providing jobs for Indiana citizens.

I reject the State's plans to spend over $1 billion on a new Indianapolis-to-Evansville Highway, which will save only 8 minutes in travel time, and was found by an independent government study to be a waste of our tax dollars.

I support the JOBS AND ENVIRONMENT TRANSPORTATION PLAN that: calls for repairing existing roads; protects our natural heritage and reduces air pollution; uses existing funds for improved mass transit including passenger trains; and allows for "town hall" discussions at public transportation project hearings.

HECAF
Hoosier Environmental Council
ACTION FUND

TO: GOVERNOR EVAN BAYH and OTHER ELECTED OFFICIALS

FROM: THE CITIZENS OF INDIANA

With my signature and donation I join the Hoosier Environmental Council in demanding a State Transportation Plan that reduces air pollution, climate change, and traffic congestion while promoting economic development.

I reject the State's plan to spend one billion dollars on a new, uneconomical superhighway that the government's own study has found to be a waste of our tax dollars.

Therefore, I support the JOBS AND ENVIRONMENT TRANSPORTATION PLAN that calls for repairing existing roads, using existing funds for mass transit and high speed rail, and allowing "town hall" discussions at public transportation project hearings.

TO: **GOVERNOR EVAN BAYH and OTHER ELECTED OFFICIALS**

FROM: **THE CITIZENS OF INDIANA**

With my signature and donation I join the Hoosier Environmental Council and my fellow citizens in demanding that the State spend its transportation dollars on cleaner, more energy efficient transportation programs that will reduce air pollution and climate change, while providing jobs for Indiana citizens.

I reject the State's plans to spend over $1 billion on a new Indianapolis-to-Evansville Highway, which will save only 8 minutes in travel time, and was found by an independent government study to be a waste of our tax dollars.

I support the JOBS AND ENVIRONMENT TRANSPORTATION PLAN that: calls for repairing existing roads; protects our natural heritage and reduces air pollution; uses existing funds for improved mass transit including passenger trains; and allows for "town hall" discussions at public transportation project hearings.

HECAF Hoosier Environmental Council ACTION FUND

TO: GOVERNOR EVAN BAYH and OTHER ELECTED OFFICIALS

FROM: THE CITIZENS OF INDIANA

With my signature and donation I join the Hoosier Environmental Council in demanding a State Transportation Plan that reduces air pollution, climate change, and traffic congestion while promoting economic development

I reject the State's plan to spend one billion dollars on a new, uneconomical superhighway that the government's own study has found to be a waste of our tax dollars.

Therefore, I support the JOBS AND ENVIRONMENT TRANSPORTATION PLAN that calls for repairing existing roads, using existing funds for mass transit and high speed rail, and allowing "town hall" discussions at publ transportation project hearings.

Hoosier Environmental Council ACTION FUND

TO: **GOVERNOR EVAN BAYH and OTHER ELECTED OFFICIALS**

FROM: **THE CITIZENS OF INDIANA**

With my signature and donation I join the Hoosier Environmental Council and my fellow citizens in demanding that the State spend its transportation dollars on cleaner, more energy efficient transportation programs that will reduce air pollution and climate change, while providing jobs for Indiana citizens.

I reject the State's plans to spend over $1 billion on a new Indianapolis-to-Evansville Highway, which will save only 8 minutes in travel time, and was found by an independent government study to be a waste of our tax dollars.

I support the JOBS AND ENVIRONMENT TRANSPORTATION PLAN that: calls for repairing existing roads; protects our natural heritage and reduces air pollution; uses existing funds for improved mass transit including passenger trains; and allows for "town hall" discussions at public transportation project hearings.

HECAF
Hoosier Environmental Council
ACTION FUND

TO: **GOVERNOR EVAN BAYH and OTHER ELECTED OFFICIALS**

FROM: **THE CITIZENS OF INDIANA**

With my signature and donation I join the Hoosier Environmental Council and my fellow citizens in demanding that the State spend its transportation dollars on cleaner, more energy efficient transportation programs that will reduce air pollution and climate change, while providing jobs for Indiana citizens.

I reject the State's plans to spend over $1 billion on a new Indianapolis-to-Evansville Highway, which will save only 8 minutes in travel time, and was found by an independent government study to be a waste of our tax dollars.

I support the JOBS AND ENVIRONMENT TRANSPORTATION PLAN that: calls for repairing existing roads; protects our natural heritage and reduces air pollution; uses existing funds for improved mass transit including passenger trains; and allows for "town hall" discussions at public transportation project hearings.

HECAF Hoosier Environmental Council ACTION FUND

TO: **GOVERNOR EVAN BAYH and OTHER ELECTED OFFICIALS**

FROM: **THE CITIZENS OF INDIANA**

With my signature and donation I join the Hoosier Environmental Council and my fellow citizens in demanding that the State spend its transportation dollars on cleaner, more energy efficient transportation programs that will reduce air pollution and climate change, while providing jobs for Indiana citizens.

I reject the State's plans to spend over $1 billion on a new Indianapolis-to-Evansville Highway, which will save only 8 minutes in travel time, and was found by an independent government study to be a waste of our tax dollars.

I support the JOBS AND ENVIRONMENT TRANSPORTATION PLAN that: calls for repairing existing roads; protects our natural heritage and reduces air pollution; uses existing funds for improved mass transit including passenger trains; and allows for "town hall" discussions at public transportation project hearings.

HECAF
Hoosier Environmental Council ACTION FUND

TO: GOVERNOR EVAN BAYH and OTHER ELECTED OFFICIALS

FROM: THE CITIZENS OF INDIANA

With my signature and donation I join the Hoosier Environmental Council in demanding a State Transportation Plan that reduces air pollution, climate change, and traffic congestion while promoting economic development

I reject the State's plan to spend one billion dollars on a new, uneconomical superhighway that the government's own study has found to be a waste of our tax dollars.

Therefore, I support the JOBS AND ENVIRONMENT TRANSPORTATION PLAN that calls for repairing existing roads, using existing funds for mass transit and high speed rail, and allowing "town hall" discussions at pub transportation project hearings.

FROM: **THE CITIZENS OF INDIANA**

With my signature and donation I join the Hoosier Environmental Council and my fellow citizens in demanding that the State spend its transportation dollars on cleaner, more energy efficient transportation programs that will reduce air poll... and climate change, while providing jobs for Indiana citizens.

I reject the State's plans to spend over $1 billion on a new Indianapolis-to-Evansville Highway, which will save only 8 minutes in travel time, and was found by an independent government study to be a waste of our tax dollars.

I support the JOBS AND ENVIRONMENT TRANSPORTATION PLAN that: calls for repairing existing roads; protects o... natural heritage and reduces air pollution; uses existing funds for improved mass transit including passenger trains; an... allows for "town hall" discussions at public transportation project hearings.

With my signature and donation I join the Hoosier Environmental Council and my fellow citizens in demanding that the State spend its transportation dollars on cleaner, more energy efficient transportation programs that will reduce air pollu[tion] and climate change, while providing jobs for Indiana citizens.

I reject the State's plans to spend over $1 billion on a new Indianapolis-to-Evansville Highway, which will save only 8 minutes in travel time, and was found by an independent government study to be a waste of our tax dollars.

I support the JOBS AND ENVIRONMENT TRANSPORTATION PLAN that: calls for repairing existing roads; protects ou[r] natural heritage and reduces air pollution; uses existing funds for improved mass transit including passenger trains; an[d] allows for "town hall" discussions at public transportation project hearings.

Hoosier Environmental Council ACTION FUND

TO: GOVERNOR EVAN BAYH and OTHER ELECTED OFFICIALS

FROM: THE CITIZENS OF INDIANA

With my signature and donation I join the Hoosier Environmental Council and my fellow citizens in demanding that the State spend its transportation dollars on cleaner, more energy efficient transportation programs that will reduce air poll... and climate change, while providing jobs for Indiana citizens.

I reject the State's plans to spend over $1 billion on a new Indianapolis-to-Evansville Highway, which will save only 8 minutes in travel time, and was found by an independent government study to be a waste of our tax dollars.

I support the JOBS AND ENVIRONMENT TRANSPORTATION PLAN that: calls for repairing existing roads; protects ou... natural heritage and reduces air pollution; uses existing funds for improved mass transit including passenger trains; an... allows for "town hall" discussions at public transportation project hearings.

TO: **GOVERNOR EVAN BAYH and OTHER ELECTED OFFICIALS**

FROM: **THE CITIZENS OF INDIANA**

With my signature and donation I join the Hoosier Environmental Council and my fellow citizens in demanding that the State spend its transportation dollars on cleaner, more energy efficient transportation programs that will reduce air po and climate change, while providing jobs for Indiana citizens.

I reject the State's plans to spend over $1 billion on a new Indianapolis-to-Evansville Highway, which will save only 8 minutes in travel time, and was found by an independent government study to be a waste of our tax dollars.

I support the JOBS AND ENVIRONMENT TRANSPORTATION PLAN that: calls for repairing existing roads; protects t natural heritage and reduces air pollution; uses existing funds for improved mass transit including passenger trains; ar allows for "town hall" discussions at public transportation project hearings.

HECAF
Hoosier Environmental Council
ACTION FUND

TO: **GOVERNOR EVAN BAYH and OTHER ELECTED OFFICIALS**

FROM: **THE CITIZENS OF INDIANA**

With my signature and donation I join the Hoosier Environmental Council and my fellow citizens in demanding that the State spend its transportation dollars on cleaner, more energy efficient transportation programs that will reduce air pollution and climate change, while providing jobs for Indiana citizens.

I reject the State's plans to spend over $1 billion on a new Indianapolis-to-Evansville Highway, which will save only 8 minutes in travel time, and was found by an independent government study to be a waste of our tax dollars.

I support the JOBS AND ENVIRONMENT TRANSPORTATION PLAN that: calls for repairing existing roads; protects our natural heritage and reduces air pollution; uses existing funds for improved mass transit including passenger trains; and allows for "town hall" discussions at public transportation project hearings.

FROM: **THE CITIZENS OF INDIANA**

With my signature and donation I join the Hoosier Environmental Council and my fellow citizens in demanding that the State spend its transportation dollars on cleaner, more energy efficient transportation programs that will reduce air pollution and climate change, while providing jobs for Indiana citizens.

I reject the State's plans to spend over $1 billion on a new Indianapolis-to-Evansville Highway, which will save only 8 minutes in travel time, and was found by an independent government study to be a waste of our tax dollars.

I support the JOBS AND ENVIRONMENT TRANSPORTATION PLAN that: calls for repairing existing roads; protects our natural heritage and reduces air pollution; uses existing funds for improved mass transit including passenger trains; and allows for "town hall" discussions at public transportation project hearings.

Hoosier Environmental Council
ACTION FUND

TO: **GOVERNOR EVAN BAYH and OTHER ELECTED OFFICIALS**

FROM: **THE CITIZENS OF INDIANA**

With my signature and donation I join the Hoosier Environmental Council and my fellow citizens in demanding that the State spend its transportation dollars on cleaner, more energy efficient transportation programs that will reduce air pollution and climate change, while providing jobs for Indiana citizens.

I reject the State's plans to spend over $1 billion on a new Indianapolis-to-Evansville Highway, which will save only 8 minutes in travel time, and was found by an independent government study to be a waste of our tax dollars.

I support the JOBS AND ENVIRONMENT TRANSPORTATION PLAN that: calls for repairing existing roads; protects our natural heritage and reduces air pollution; uses existing funds for improved mass transit including passenger trains; and allows for "town hall" discussions at public transportation project hearings.

FROM: **THE CITIZENS OF INDIANA**

With my signature and donation I join the Hoosier Environmental Council in demanding a State Transportation Plan that reduces air pollution, climate change, and traffic congestion while promoting economic development

I reject the State's plan to spend one billion dollars on a new, uneconomical superhighway that the government's own study has found to be a waste of our tax dollars.

Therefore, I support the JOBS AND ENVIRONMENT TRANSPORTATION PLAN that calls for repairing existing roads, using existing funds for mass transit and high speed rail, and allowing "town hall" discussions at public transportation project hearings.

FROM: **THE CITIZENS OF INDIANA**

With my signature and donation I join the Hoosier Environmental Council and my fellow citizens in demanding that the State spend its transportation dollars on cleaner, more energy efficient transportation programs that will reduce air pollution and climate change, while providing jobs for Indiana citizens.

I reject the State's plans to spend over $1 billion on a new Indianapolis-to-Evansville Highway, which will save only 8 minutes in travel time, and was found by an independent government study to be a waste of our tax dollars.

I support the JOBS AND ENVIRONMENT TRANSPORTATION PLAN that: calls for repairing existing roads; protects our natural heritage and reduces air pollution; uses existing funds for improved mass transit including passenger trains; and allows for "town hall" discussions at public transportation project hearings.

TO: **GOVERNOR EVAN BAYH and OTHER ELECTED OFFICIALS**

FROM: **THE CITIZENS OF INDIANA**

With my signature and donation I join the Hoosier Environmental Council in demanding a State Transportation Plan that reduces air pollution, climate change, and traffic congestion while promoting economic development

I reject the State's plan to spend one billion dollars on a new, uneconomical superhighway that the government's own study has found to be a waste of our tax dollars.

Therefore, I support the JOBS AND ENVIRONMENT TRANSPORTATION PLAN that calls for repairing existing roads, using existing funds for mass transit and high speed rail, and allowing "town hall" discussions at public transportation project hearings.

HECAF Hoosier Environmental

TO: **GOVERNOR EVAN BAYH and OTHER ELECTED OFFICIALS**

FROM: **THE CITIZENS OF INDIANA**

With my signature and donation I join the Hoosier Environmental Council and my fellow citizens in demanding that the State spend its transportation dollars on cleaner, more energy efficient transportation programs that will reduce air pollution and climate change, while providing jobs for Indiana citizens.

I reject the State's plans to spend over $1 billion on a new Indianapolis-to-Evansville Highway, which will save only 8 minutes in travel time, and was found by an independent government study to be a waste of our tax dollars.

I support the JOBS AND ENVIRONMENT TRANSPORTATION PLAN that: calls for repairing existing roads; protects our natural heritage and reduces air pollution; uses existing funds for improved mass transit including passenger trains; and allows for "town hall" discussions at public transportation project hearings.

FROM: **THE CITIZENS OF INDIANA**

With my signature and donation I join the Hoosier Environmental Council and my fellow citizens in demanding that the State spend its transportation dollars on cleaner, more energy efficient transportation programs that will reduce air pollution and climate change, while providing jobs for Indiana citizens.

I reject the State's plans to spend over $1 billion on a new Indianapolis-to-Evansville Highway, which will save only 8 minutes in travel time, and was found by an independent government study to be a waste of our tax dollars.

I support the JOBS AND ENVIRONMENT TRANSPORTATION PLAN that: calls for repairing existing roads; protects our natural heritage and reduces air pollution; uses existing funds for improved mass transit including passenger trains; and allows for "town hall" discussions at public transportation project hearings.

Hoosier Environmental Council

TO: GOVERNOR EVAN BAYH and OTHER ELECTED OFFICIALS

FROM: THE CITIZENS OF INDIANA

With my signature and donation I join the Hoosier Environmental Council in demanding a State Transportation Plan that reduces air pollution, climate change, and traffic congestion while promoting economic development.

I reject the State's plan to spend one billion dollars on a new, uneconomical superhighway that the government's own study has found to be a waste of our tax dollars.

Therefore, I support the JOBS AND ENVIRONMENT TRANSPORTATION PLAN that calls for repairing existing roads, using existing funds for mass transit and high speed rail, and allowing "town hall" discussions at publ transportation project hearings.

Hoosier Environmental Council

TO: **GOVERNOR EVAN BAYH** and **OTHER ELECTED OFFICIALS**

FROM: **THE CITIZENS OF INDIANA**

With my signature and donation I join the Hoosier Environmental Council and my fellow citizens in demanding that the State spend its transportation dollars on cleaner, more energy efficient transportation programs that will reduce air pollution and climate change, while providing jobs for Indiana citizens.

I reject the State's plans to spend over $1 billion on a new Indianapolis-to-Evansville Highway, which will save only 8 minutes in travel time, and was found by an independent government study to be a waste of our tax dollars.

I support the JOBS AND ENVIRONMENT TRANSPORTATION PLAN that: calls for repairing existing roads; protects our natural heritage and reduces air pollution; uses existing funds for improved mass transit including passenger trains; and allows for "town hall" discussions at public transportation project hearings.

HECAF Hoosier Environmental Council

TO: **GOVERNOR EVAN BAYH and OTHER ELECTED OFFICIALS**

FROM: **THE CITIZENS OF INDIANA**

With my signature and donation I join the Hoosier Environmental Council and my fellow citizens in demanding that the State spend its transportation dollars on cleaner, more energy efficient transportation programs that will reduce air pollution and climate change, while providing jobs for Indiana citizens.

I reject the State's plans to spend over $1 billion on a new Indianapolis-to-Evansville Highway, which will save only 8 minutes in travel time, and was found by an independent government study to be a waste of our tax dollars.

I support the JOBS AND ENVIRONMENT TRANSPORTATION PLAN that: calls for repairing existing roads; protects our natural heritage and reduces air pollution; uses existing funds for improved mass transit including passenger trains; and allows for "town hall" discussions at public transportation project hearings.

TO: **GOVERNOR EVAN BAYH** and **OTHER ELECTED OFFICIALS**

FROM: **THE CITIZENS OF INDIANA**

With my signature and donation I join the Hoosier Environmental Council and my fellow citizens in demanding that the State spend its transportation dollars on cleaner, more energy efficient transportation programs that will reduce air pollution and climate change, while providing jobs for Indiana citizens.

I reject the State's plans to spend over $1 billion on a new Indianapolis-to-Evansville Highway, which will save only 8 minutes in travel time, and was found by an independent government study to be a waste of our tax dollars.

I support the JOBS AND ENVIRONMENT TRANSPORTATION PLAN that: calls for repairing existing roads; protects our natural heritage and reduces air pollution; uses existing funds for improved mass transit including passenger trains; and allows for "town hall" discussions at public transportation project hearings.

FROM: **THE CITIZENS OF INDIANA**

With my signature and donation I join the Hoosier Environmental Council in demanding a State Transportation Plan that reduces air pollution, climate change, and traffic congestion while promoting economic development

I reject the State's plan to spend one billion dollars on a new, uneconomical superhighway that the government's own study has found to be a waste of our tax dollars.

Therefore, I support the JOBS AND ENVIRONMENT TRANSPORTATION PLAN that calls for repairing existing roads, using existing funds for mass transit and high speed rail, and allowing "town hall" discussions at publ c transportation project hearings.

HECAF Hoosier Environmental Council ACTION FUND

TO: **GOVERNOR EVAN BAYH** and **OTHER ELECTED OFFICIALS**

FROM: **THE CITIZENS OF INDIANA**

With my signature and donation I join the Hoosier Environmental Council and my fellow citizens in demanding that the State spend its transportation dollars on cleaner, more energy efficient transportation programs that will reduce air pollution and climate change, while providing jobs for Indiana citizens.

I reject the State's plans to spend over $1 billion on a new Indianapolis-to-Evansville Highway, which will save only 8 minutes in travel time, and was found by an independent government study to be a waste of our tax dollars.

I support the JOBS AND ENVIRONMENT TRANSPORTATION PLAN that: calls for repairing existing roads; protects our natural heritage and reduces air pollution; uses existing funds for improved mass transit including passenger trains; and allows for "town hall" discussions at public transportation project hearings.

As 40% of all Hoosiers already breathe air below EPA health standards and as climate change and air pollution are strongly linked to exhaust emissions, I urge you to take the following step:

Spend our allotted transportation tax dollars on cleaner transportation systems.

I reject the State's plan to spend over one billion tax dollars on one uneconomical superhighway. Instead, I support the JOBS AND ENVIRONMENT TRANSPORTATION PLAN that will bring Clean Economic Development and Jobs to Indiana.

With my signature and donation I support the H.E.C. in their work to implement this Climate-Saving Plan.

HECAF
Hoosier Environmental Council
ACTION FUND

TO: **GOVERNOR EVAN BAYH and OTHER ELECTED OFFICIALS**

FROM: **THE CITIZENS OF INDIANA**

With my signature and donation I join the Hoosier Environmental Council and my fellow citizens in demanding that the State spend its transportation dollars on cleaner, more energy efficient transportation programs that will reduce air pollution and climate change, while providing jobs for Indiana citizens.

I reject the State's plans to spend over $1 billion on a new Indianapolis-to-Evansville Highway, which will save only 8 minutes in travel time, and was found by an independent government study to be a waste of our tax dollars.

I support the JOBS AND ENVIRONMENT TRANSPORTATION PLAN that: calls for repairing existing roads; protects our natural heritage and reduces air pollution; uses existing funds for improved mass transit including passenger trains; and allows for "town hall" discussions at public transportation project hearings.

With my signature and donation I join the Hoosier Environmental Council and my fellow citizens in demanding that the State spend its transportation dollars on cleaner, more energy efficient transportation programs that will reduce air pollution and climate change, while providing jobs for Indiana citizens.

I reject the State's plans to spend over $1 billion on a new Indianapolis-to-Evansville Highway, which will save only 8 minutes in travel time, and was found by an independent government study to be a waste of our tax dollars.

I support the JOBS AND ENVIRONMENT TRANSPORTATION PLAN that: calls for repairing existing roads; protects our natural heritage and reduces air pollution; uses existing funds for improved mass transit including passenger trains; and allows for "town hall" discussions at public transportation project hearings.

TO: **GOVERNOR EVAN BAYH and OTHER ELECTED OFFICIALS**

FROM: **THE CITIZENS OF INDIANA**

With my signature and donation I join the Hoosier Environmental Council and my fellow citizens in demanding that the State spend its transportation dollars on cleaner, more energy efficient transportation programs that will reduce air pollution and climate change, while providing jobs for Indiana citizens.

I reject the State's plans to spend over $1 billion on a new Indianapolis-to-Evansville Highway, which will save only 8 minutes in travel time, and was found by an independent government study to be a waste of our tax dollars.

I support the JOBS AND ENVIRONMENT TRANSPORTATION PLAN that: calls for repairing existing roads; protects our natural heritage and reduces air pollution; uses existing funds for improved mass transit including passenger trains; and allows for "town hall" discussions at public transportation project hearings.

Hoosier Environmental Council
ACTION FUND

TO: **GOVERNOR EVAN BAYH and OTHER ELECTED OFFICIALS**

FROM: **THE CITIZENS OF INDIANA**

With my signature and donation I join the Hoosier Environmental Council in demanding a State Transportation Plan that reduces air pollution, climate change, and traffic congestion while promoting economic development.

I reject the State's plan to spend one billion dollars on a new, uneconomical superhighway that the government's own study has found to be a waste of our tax dollars.

Therefore, I support the JOBS AND ENVIRONMENT TRANSPORTATION PLAN that calls for repairing existing roads, using existing funds for mass transit and high speed rail, and allowing "town hall" discussions at public transportation project hearings.

Circulated by: Brice Kern

City: Indianapolis Date: 12-93

TO: **GOVERNOR EVAN BAYH and OTHER ELECTED OFFICIALS**

FROM: **THE CITIZENS OF INDIANA**

With my signature and donation I join the Hoosier Environmental Council and my fellow citizens in demanding that the State spend its transportation dollars on cleaner, more energy efficient transportation programs that will reduce air pollution and climate change, while providing jobs for Indiana citizens.

I reject the State's plans to spend over $1 billion on a new Indianapolis-to-Evansville Highway, which will save only 8 minutes in travel time, and was found by an independent government study to be a waste of our tax dollars.

I support the JOBS AND ENVIRONMENT TRANSPORTATION PLAN that: calls for repairing existing roads; protects our natural heritage and reduces air pollution; uses existing funds for improved mass transit including passenger trains; and allows for "town hall" discussions at public transportation project hearings.

HECAF
Hoosier Environmental Council

TO: **GOVERNOR EVAN BAYH and OTHER ELECTED OFFICIALS**

FROM: **THE CITIZENS OF INDIANA**

With my signature and donation I join the Hoosier Environmental Council and my fellow citizens in demanding that the State spend its transportation dollars on cleaner, more energy efficient transportation programs that will reduce air pollution and climate change, while providing jobs for Indiana citizens.

I reject the State's plans to spend over $1 billion on a new Indianapolis-to-Evansville Highway, which will save only 8 minutes in travel time, and was found by an independent government study to be a waste of our tax dollars.

I support the JOBS AND ENVIRONMENT TRANSPORTATION PLAN that: calls for repairing existing roads; protects our natural heritage and reduces air pollution; uses existing funds for improved mass transit including passenger trains; and allows for "town hall" discussions at public transportation project hearings.

HECAF Hoosier Environmental Council

TO: **GOVERNOR EVAN BAYH** and **OTHER ELECTED OFFICIALS**

FROM: **THE CITIZENS OF INDIANA**

With my signature and donation I join the Hoosier Environmental Council in demanding a State Transportation Plan that reduces air pollution, climate change, and traffic congestion while promoting economic development.

I reject the State's plan to spend one billion dollars on a new, uneconomical superhighway that the government's own study has found to be a waste of our tax dollars.

Therefore, I support the JOBS AND ENVIRONMENT TRANSPORTATION PLAN that calls for repairing existing roads, using existing funds for mass transit and high speed rail, and allowing "town hall" discussions at public transportation project hearings.

HECAF Hoosier Environmental Council

TO: **GOVERNOR EVAN BAYH and OTHER ELECTED OFFICIALS**

FROM: **THE CITIZENS OF INDIANA**

With my signature and donation I join the Hoosier Environmental Council and my fellow citizens in demanding that the State spend its transportation dollars on cleaner, more energy efficient transportation programs that will reduce air pollution and climate change, while providing jobs for Indiana citizens.

I reject the State's plans to spend over $1 billion on a new Indianapolis-to-Evansville Highway, which will save only 8 minutes in travel time, and was found by an independent government study to be a waste of our tax dollars.

I support the JOBS AND ENVIRONMENT TRANSPORTATION PLAN that: calls for repairing existing roads; protects our natural heritage and reduces air pollution; uses existing funds for improved mass transit including passenger trains; and allows for "town hall" discussions at public transportation project hearings.

HECAF Hoosier Environmental Council

TO: **GOVERNOR EVAN BAYH and OTHER ELECTED OFFICIALS**

FROM: **THE CITIZENS OF INDIANA**

With my signature and donation I join the Hoosier Environmental Council and my fellow citizens in demanding that the State spend its transportation dollars on cleaner, more energy efficient transportation programs that will reduce air pollution and climate change, while providing jobs for Indiana citizens.

I reject the State's plans to spend over $1 billion on a new Indianapolis-to-Evansville Highway, which will save only 8 minutes in travel time, and was found by an independent government study to be a waste of our tax dollars.

I support the JOBS AND ENVIRONMENT TRANSPORTATION PLAN that: calls for repairing existing roads; protects our natural heritage and reduces air pollution; uses existing funds for improved mass transit including passenger trains; and allows for "town hall" discussions at public transportation project hearings.

HECAF Hoosier Environmental Council

TO: **GOVERNOR EVAN BAYH and OTHER ELECTED OFFICIALS**

FROM: **THE CITIZENS OF INDIANA**

With my signature and donation I join the Hoosier Environmental Council in demanding a State Transportation Plan that reduces air pollution, climate change, and traffic congestion while promoting economic development.

I reject the State's plan to spend one billion dollars on a new, uneconomical superhighway that the government's own study has found to be a waste of our tax dollars.

Therefore, I support the JOBS AND ENVIRONMENT TRANSPORTATION PLAN that calls for repairing existing roads, using existing funds for mass transit and high speed rail, and allowing "town hall" discussions at public transportation project hearings.

HECAF
Hoosier Environmental Council

TO: **GOVERNOR EVAN BAYH and OTHER ELECTED OFFICIALS**

FROM: **THE CITIZENS OF INDIANA**

With my signature and donation I join the Hoosier Environmental Council and my fellow citizens in demanding that the State spend its transportation dollars on cleaner, more energy efficient transportation programs that will reduce air pollution and climate change, while providing jobs for Indiana citizens.

I reject the State's plans to spend over $1 billion on a new Indianapolis-to-Evansville Highway, which will save only 8 minutes in travel time, and was found by an independent government study to be a waste of our tax dollars.

I support the JOBS AND ENVIRONMENT TRANSPORTATION PLAN that: calls for repairing existing roads; protects our natural heritage and reduces air pollution; uses existing funds for improved mass transit including passenger trains; and allows for "town hall" discussions at public transportation project hearings.

HECAF
Hoosier Environmental Council

TO: **GOVERNOR EVAN BAYH and OTHER ELECTED OFFICIALS**

FROM: **THE CITIZENS OF INDIANA**

With my signature and donation I join the Hoosier Environmental Council and my fellow citizens in demanding that the State spend its transportation dollars on cleaner, more energy efficient transportation programs that will reduce air pollution and climate change, while providing jobs for Indiana citizens.

I reject the State's plans to spend over $1 billion on a new Indianapolis-to-Evansville Highway, which will save only 8 minutes in travel time, and was found by an independent government study to be a waste of our tax dollars.

I support the JOBS AND ENVIRONMENT TRANSPORTATION PLAN that: calls for repairing existing roads; protects our natural heritage and reduces air pollution; uses existing funds for improved mass transit including passenger trains; and allows for "town hall" discussions at public transportation project hearings.

FROM: **THE CITIZENS OF INDIANA**

With my signature and donation I join the Hoosier Environmental Council and my fellow citizens in demanding that the State spend its transportation dollars on cleaner, more energy efficient transportation programs that will reduce air pollution and climate change, while providing jobs for Indiana citizens.

I reject the State's plans to spend over $1 billion on a new Indianapolis-to-Evansville Highway, which will save only 8 minutes in travel time, and was found by an independent government study to be a waste of our tax dollars.

I support the JOBS AND ENVIRONMENT TRANSPORTATION PLAN that: calls for repairing existing roads; protects our natural heritage and reduces air pollution; uses existing funds for improved mass transit including passenger trains; and allows for "town hall" discussions at public transportation project hearings.

FROM: **THE CITIZENS OF INDIANA**

With my signature and donation I join the Hoosier Environmental Council and my fellow citizens in demanding that the State spend its transportation dollars on cleaner, more energy efficient transportation programs that will reduce air pollution and climate change, while providing jobs for Indiana citizens.

I reject the State's plans to spend over $1 billion on a new Indianapolis-to-Evansville Highway, which will save only 8 minutes in travel time, and was found by an independent government study to be a waste of our tax dollars.

I support the JOBS AND ENVIRONMENT TRANSPORTATION PLAN that: calls for repairing existing roads; protects our natural heritage and reduces air pollution; uses existing funds for improved mass transit including passenger trains; and allows for "town hall" discussions at public transportation project hearings.

HECAF
Hoosier Environmental Council ACTION FUND

TO: **GOVERNOR EVAN BAYH and OTHER ELECTED OFFICIALS**

FROM: **THE CITIZENS OF INDIANA**

With my signature and donation I join the Hoosier Environmental Council in demanding a State Transportation Plan that reduces air pollution, climate change, and traffic congestion while promoting economic development.

I reject the State's plan to spend one billion dollars on a new, uneconomical superhighway that the government's own study has found to be a waste of our tax dollars.

Therefore, I support the JOBS AND ENVIRONMENT TRANSPORTATION PLAN that calls for repairing existing roads, using existing funds for mass transit and high speed rail, and allowing "town hall" discussions at public transportation project hearings.

TO: **GOVERNOR EVAN BAYH and OTHER ELECTED OFFICIALS**

FROM: **THE CITIZENS OF INDIANA**

With my signature and donation I join the Hoosier Environmental Council and my fellow citizens in demanding that the State spend its transportation dollars on cleaner, more energy efficient transportation programs that will reduce air pollution and climate change, while providing jobs for Indiana citizens.

I reject the State's plans to spend over $1 billion on a new Indianapolis-to-Evansville Highway, which will save only 8 minutes in travel time, and was found by an independent government study to be a waste of our tax dollars.

I support the JOBS AND ENVIRONMENT TRANSPORTATION PLAN that: calls for repairing existing roads; protects our natural heritage and reduces air pollution; uses existing funds for improved mass transit including passenger trains; and allows for "town hall" discussions at public transportation project hearings.

FROM: **THE CITIZENS OF INDIANA**

With my signature and donation I join the Hoosier Environmental Council and my fellow citizens in demanding that the State spend its transportation dollars on cleaner, more energy efficient transportation programs that will reduce air pollution and climate change, while providing jobs for Indiana citizens.

I reject the State's plans to spend over $1 billion on a new Indianapolis-to-Evansville Highway, which will save only 8 minutes in travel time, and was found by an independent government study to be a waste of our tax dollars.

I support the JOBS AND ENVIRONMENT TRANSPORTATION PLAN that: calls for repairing existing roads; protects our natural heritage and reduces air pollution; uses existing funds for improved mass transit including passenger trains; and allows for "town hall" discussions at public transportation project hearings.

HECAF Hoosier Environmental Council

TO: **GOVERNOR EVAN BAYH and OTHER ELECTED OFFICIALS**

FROM: **THE CITIZENS OF INDIANA**

With my signature and donation I join the Hoosier Environmental Council and my fellow citizens in demanding that the State spend its transportation dollars on cleaner, more energy efficient transportation programs that will reduce air pollution and climate change, while providing jobs for Indiana citizens.

I reject the State's plans to spend over $1 billion on a new Indianapolis-to-Evansville Highway, which will save only 8 minutes in travel time, and was found by an independent government study to be a waste of our tax dollars.

I support the JOBS AND ENVIRONMENT TRANSPORTATION PLAN that: calls for repairing existing roads; protects our natural heritage and reduces air pollution; uses existing funds for improved mass transit including passenger trains; and allows for "town hall" discussions at public transportation project hearings.

HECAF Hoosier Environmental Council

TO: **GOVERNOR EVAN BAYH and OTHER ELECTED OFFICIALS**

FROM: **THE CITIZENS OF INDIANA**

With my signature and donation I join the Hoosier Environmental Council and my fellow citizens in demanding that the State spend its transportation dollars on cleaner, more energy efficient transportation programs that will reduce air pollution and climate change, while providing jobs for Indiana citizens.

I reject the State's plans to spend over $1 billion on a new Indianapolis-to-Evansville Highway, which will save only 8 minutes in travel time, and was found by an independent government study to be a waste of our tax dollars.

I support the JOBS AND ENVIRONMENT TRANSPORTATION PLAN that: calls for repairing existing roads; protects our natural heritage and reduces air pollution; uses existing funds for improved mass transit including passenger trains; and allows for "town hall" discussions at public transportation project hearings.

FROM: **THE CITIZENS OF INDIANA**

With my signature and donation I join the Hoosier Environmental Council and my fellow citizens in demanding that the State spend its transportation dollars on cleaner, more energy efficient transportation programs that will reduce air poll... and climate change, while providing jobs for Indiana citizens.

I reject the State's plans to spend over $1 billion on a new Indianapolis-to-Evansville Highway, which will save only 8 minutes in travel time, and was found by an independent government study to be a waste of our tax dollars.

I support the JOBS AND ENVIRONMENT TRANSPORTATION PLAN that: calls for repairing existing roads; protects o... natural heritage and reduces air pollution; uses existing funds for improved mass transit including passenger trains; an... allows for "town hall" discussions at public transportation project hearings.

ACTION FUND

TO: **GOVERNOR EVAN BAYH and OTHER ELECTED OFFICIALS**

FROM: **THE CITIZENS OF INDIANA**

With my signature and donation I join the Hoosier Environmental Council and my fellow citizens in demanding that the State spend its transportation dollars on cleaner, more energy efficient transportation programs that will reduce air poll... and climate change, while providing jobs for Indiana citizens.

I reject the State's plans to spend over $1 billion on a new Indianapolis-to-Evansville Highway, which will save only 8 minutes in travel time, and was found by an independent government study to be a waste of our tax dollars.

I support the JOBS AND ENVIRONMENT TRANSPORTATION PLAN that: calls for repairing existing roads; protects ou... natural heritage and reduces air pollution; uses existing funds for improved mass transit including passenger trains; an... allows for "town hall" discussions at public transportation project hearings.

Hoosier Environmental Council ACTION FUND

TO: **GOVERNOR EVAN BAYH and OTHER ELECTED OFFICIALS**

FROM: **THE CITIZENS OF INDIANA**

With my signature and donation I join the Hoosier Environmental Council and my fellow citizens in demanding that the State spend its transportation dollars on cleaner, more energy efficient transportation programs that will reduce air pol and climate change, while providing jobs for Indiana citizens.

I reject the State's plans to spend over $1 billion on a new Indianapolis-to-Evansville Highway, which will save only 8 minutes in travel time, and was found by an independent government study to be a waste of our tax dollars.

I support the JOBS AND ENVIRONMENT TRANSPORTATION PLAN that: calls for repairing existing roads; protects natural heritage and reduces air pollution; uses existing funds for improved mass transit including passenger trains; a allows for "town hall" discussions at public transportation project hearings.

TO: **GOVERNOR EVAN BAYH and OTHER ELECTED OFFICIALS**

FROM: **THE CITIZENS OF INDIANA**

With my signature and donation I join the Hoosier Environmental Council and my fellow citizens in demanding that the State spend its transportation dollars on cleaner, more energy efficient transportation programs that will reduce air pollution and climate change, while providing jobs for Indiana citizens.

I reject the State's plans to spend over $1 billion on a new Indianapolis-to-Evansville Highway, which will save only 8 minutes in travel time, and was found by an independent government study to be a waste of our tax dollars.

I support the JOBS AND ENVIRONMENT TRANSPORTATION PLAN that: calls for repairing existing roads; protects our natural heritage and reduces air pollution; uses existing funds for improved mass transit including passenger trains; and allows for "town hall" discussions at public transportation project hearings.

HECAF
Hoosier Environmental Council
ACTION FUND

TO: **GOVERNOR EVAN BAYH and OTHER ELECTED OFFICIALS**

FROM: **THE CITIZENS OF INDIANA**

With my signature and donation I join the Hoosier Environmental Council and my fellow citizens in demanding that the State spend its transportation dollars on cleaner, more energy efficient transportation programs that will reduce air pu and climate change, while providing jobs for Indiana citizens.

I reject the State's plans to spend over $1 billion on a new Indianapolis-to-Evansville Highway, which will save only 8 minutes in travel time, and was found by an independent government study to be a waste of our tax dollars.

I support the JOBS AND ENVIRONMENT TRANSPORTATION PLAN that: calls for repairing existing roads; protects natural heritage and reduces air pollution; uses existing funds for improved mass transit including passenger trains; & allows for "town hall" discussions at public transportation project hearings.

Hoosier Environmental Council ACTION FUND

TO: GOVERNOR EVAN BAYH AND OTHER ELECTED OFFICIALS

FROM: THE CITIZENS OF INDIANA

Hoosier Environmental Council ACTION FUND

With my signature and donation I support the Hoosier Environmental Council Action Fund and my fellow citizens in supporting the wise use of our limited tax dollars for transportation. Accordingly I reject the proposed I-69 Draft Environmental Impact Statement which fails to consider reasonable alternatives which will save taxpayers money and preserve rural communities as well as natural areas.

I support the study and selection of more efficient, less damaging alternatives to the proposed I-69 extension from Indianapolis to Evansville, such as upgrading US 41 to interstate standards, and emphasizing maintaining and upgrading our existing roads, revitalizing energy efficient rail service, and improving other modes of transportation.

FROM: THE CITIZENS OF INDIANA

HEC Hoosier Environmental Council ACTION FUND

With my signature and donation I support the Hoosier Environmental Council Action Fund and my fellow citizens in supporting the wise use of our limited tax dollars for transportation. Accordingly I reject the proposed I-69 Draft Environmental Impact Statement which fails to consider reasonable alternatives which will save taxpayers money and preserve rural communities as well as natural areas.

I support the study and selection of more efficient, less damaging alternatives to the proposed I-69 extension from Indianapolis to Evansville, such as upgrading US 41 to interstate standards, and emphasizing maintaining and upgrading our existing roads, revitalizing energy efficient rail service, and improving other modes of transportation.

HEC Hoosier Environmental Council ACTION FUND

With my signature and donation I support the Hoosier Environmental Council Action Fund and my fellow citizens in supporting the wise use of our limited tax dollars for transportation. Accordingly I reject the proposed I-69 Draft Environmental Impact Statement which fails to consider reasonable alternatives which will save taxpayers money and preserve rural communities as well as natural areas.

I support the study and selection of more efficient, less damaging alternatives to the proposed I-69 extension from Indianapolis to Evansville, such as upgrading US 41 to interstate standards, and emphasizing maintaining and upgrading our existing roads, revitalizing energy efficient rail service, and improving other modes of transportation.

FROM: THE CITIZENS OF INDIANA

Hoosier Environmental Council
ACTION FUND

With my signature and donation I support the Hoosier Environmental Council Action Fund and my fellow citizens in supporting the wise use of our limited tax dollars for transportation. Accordingly I reject the proposed I-69 Draft Environmental Impact Statement which fails to consider reasonable alternatives which will save taxpayers money and preserve rural communities as well as natural areas.

I support the study and selection of more efficient, less damaging alternatives to the proposed I-69 extension from Indianapolis to Evansville, such as upgrading US 41 to interstate standards, and emphasizing maintaining and upgrading our existing roads, revitalizing energy efficient rail service, and improving other modes of transportation.

HEC Hoosier Environmental Council ACTION FUND

With my signature and donation I support the Hoosier Environmental Council Action Fund and my fellow citizens in supporting the wise use of our limited tax dollars for transportation. Accordingly I reject the proposed I-69 Draft Environmental Impact Statement which fails to consider reasonable alternatives which will save taxpayers money and preserve rural communities as well as natural areas.

I support the study and selection of more efficient, less damaging alternatives to the proposed I-69 extension from Indianapolis to Evansville, such as upgrading US 41 to interstate standards, and emphasizing maintaining and upgrading our existing roads, revitalizing energy efficient rail service, and improving other modes of transportation.

FROM: THE CITIZENS OF INDIANA

Hoosier Environmental Council ACTION FUND

With my signature and donation I support the Hoosier Environmental Council Action Fund and my fellow citizens in supporting the wise use of our limited tax dollars for transportation. Accordingly I reject the proposed I-69 Draft Environmental Impact Statement which fails to consider reasonable alternatives which will save taxpayers money and preserve rural communities as well as natural areas.

I support the study and selection of more efficient, less damaging alternatives to the proposed I-69 extension from Indianapolis to Evansville, such as upgrading US 41 to interstate standards, and emphasizing maintaining and upgrading our existing roads, revitalizing energy efficient rail service, and improving other modes of transportation.

FROM: THE CITIZENS OF INDIANA

With my signature and donation I join the Hoosier Environmental Council in demanding a State Transportation Plan that reduces air pollution, climate change, and traffic congestion while promoting economic development

I reject the State's plan to spend one billion dollars on a new, uneconomical superhighway that the government's own study has found to be a waste of our tax dollars.

Therefore, I support the JOBS AND ENVIRONMENT TRANSPORTATION PLAN that calls for repairing existing roads, using existing funds for mass transit and high speed rail, and allowing "town hall" discussions at public transportation project hearings.

HECAF Hoosier Environmental

TO: GOVERNOR EVAN BAYH and OTHER ELECTED OFFICIALS

FROM: THE CITIZENS OF INDIANA

With my signature and donation I join the Hoosier Environmental Council and my fellow citizens in demanding that the State spend its transportation dollars on cleaner, more energy efficient transportation programs that will reduce air pollution and climate change, while providing jobs for Indiana citizens.

I reject the State's plans to spend over $1 billion on a new Indianapolis-to-Evansville Highway, which will save only 8 minutes in travel time, and was found by an independent government study to be a waste of our tax dollars.

I support the JOBS AND ENVIRONMENT TRANSPORTATION PLAN that: calls for repairing existing roads; protects our natural heritage and reduces air pollution; uses existing funds for improved mass transit including passenger trains; and allows for "town hall" discussions at public transportation project hearings.

HECAF Hoosier Environmental Council ACTION FUND

TO: **GOVERNOR EVAN BAYH and OTHER ELECTED OFFICIALS**

FROM: **THE CITIZENS OF INDIANA**

With my signature and donation I join the Hoosier Environmental Council in demanding a State Transportation Plan that reduces air pollution, climate change, and traffic congestion while promoting economic development

I reject the State's plan to spend one billion dollars on a new, uneconomical superhighway that the government's own study has found to be a waste of our tax dollars.

Therefore, I support the JOBS AND ENVIRONMENT TRANSPORTATION PLAN that calls for repairing existing roads, using existing funds for mass transit and high speed rail, and allowing "town hall" discussions at publ c transportation project hearings.

HECAF
Hoosier Environmental Council
ACTION FUND

TO: **GOVERNOR EVAN BAYH and OTHER ELECTED OFFICIALS**

FROM: **THE CITIZENS OF INDIANA**

With my signature and donation I join the Hoosier Environmental Council and my fellow citizens in demanding that the State spend its transportation dollars on cleaner, more energy efficient transportation programs that will reduce air pollution and climate change, while providing jobs for Indiana citizens.

I reject the State's plans to spend over $1 billion on a new Indianapolis-to-Evansville Highway, which will save only 8 minutes in travel time, and was found by an independent government study to be a waste of our tax dollars.

I support the JOBS AND ENVIRONMENT TRANSPORTATION PLAN that: calls for repairing existing roads; protects our natural heritage and reduces air pollution; uses existing funds for improved mass transit including passenger trains; and allows for "town hall" discussions at public transportation project hearings.

HECAF
Hoosier Environmental Council
ACTION FUND

TO: **GOVERNOR EVAN BAYH and OTHER ELECTED OFFICIALS**

FROM: **THE CITIZENS OF INDIANA**

With my signature and donation I join the Hoosier Environmental Council and my fellow citizens in demanding that the State spend its transportation dollars on cleaner, more energy efficient transportation programs that will reduce air pollution and climate change, while providing jobs for Indiana citizens.

I reject the State's plans to spend over $1 billion on a new Indianapolis-to-Evansville Highway, which will save only 8 minutes in travel time, and was found by an independent government study to be a waste of our tax dollars.

I support the JOBS AND ENVIRONMENT TRANSPORTATION PLAN that: calls for repairing existing roads; protects our natural heritage and reduces air pollution; uses existing funds for improved mass transit including passenger trains; and allows for "town hall" discussions at public transportation project hearings.

TO: **GOVERNOR EVAN BAYH and OTHER ELECTED OFFICIALS**

FROM: **THE CITIZENS OF INDIANA**

With my signature and donation I join the Hoosier Environmental Council in demanding a State Transportation Plan that reduces air pollution, climate change, and traffic congestion while promoting economic development.

I reject the State's plan to spend one billion dollars on a new, uneconomical superhighway that the government's own study has found to be a waste of our tax dollars.

Therefore, I support the JOBS AND ENVIRONMENT TRANSPORTATION PLAN that calls for repairing existing roads, using existing funds for mass transit and high speed rail, and allowing "town hall" discussions at public transportation project hearings.
