TO: **GOVERNOR EVAN BAYH and OTHER ELECTED OFFICIALS**

FROM: **THE CITIZENS OF INDIANA**

With my signature and donation I join the Hoosier Environmental Council and my fellow citizens in demanding that the State spend its transportation dollars on cleaner, more energy efficient transportation programs that will reduce air pollution and climate change, while providing jobs for Indiana citizens.

I reject the State's plans to spend over $1 billion on a new Indianapolis-to-Evansville Highway, which will save only 8 minutes in travel time, and was found by an independent government study to be a waste of our tax dollars.

I support the JOBS AND ENVIRONMENT TRANSPORTATION PLAN that: calls for repairing existing roads; protects our natural heritage and reduces air pollution; uses existing funds for improved mass transit including passenger trains; and allows for "town hall" discussions at public transportation project hearings.

FROM: **THE CITIZENS OF INDIANA**

With my signature and donation I join the Hoosier Environmental Council and my fellow citizens in demanding that the State spend its transportation dollars on cleaner, more energy efficient transportation programs that will reduce air pollution and climate change, while providing jobs for Indiana citizens.

I reject the State's plans to spend over $1 billion on a new Indianapolis-to-Evansville Highway, which will save only 8 minutes in travel time, and was found by an independent government study to be a waste of our tax dollars.

I support the JOBS AND ENVIRONMENT TRANSPORTATION PLAN that: calls for repairing existing roads; protects our natural heritage and reduces air pollution; uses existing funds for improved mass transit including passenger trains; and allows for "town hall" discussions at public transportation project hearings.

FROM: **THE CITIZENS OF INDIANA**

With my signature and donation I join the Hoosier Environmental Council and my fellow citizens in demanding that the State spend its transportation dollars on cleaner, more energy efficient transportation programs that will reduce air pollution and climate change, while providing jobs for Indiana citizens.

I reject the State's plans to spend over $1 billion on a new Indianapolis-to-Evansville Highway, which will save only 8 minutes in travel time, and was found by an independent government study to be a waste of our tax dollars.

I support the JOBS AND ENVIRONMENT TRANSPORTATION PLAN that: calls for repairing existing roads; protects our natural heritage and reduces air pollution; uses existing funds for improved mass transit including passenger trains; and allows for "town hall" discussions at public transportation project hearings.

HECAF Hoosier Environmental Council ACTION FUND

TO: **GOVERNOR EVAN BAYH and OTHER ELECTED OFFICIALS**

FROM: **THE CITIZENS OF INDIANA**

With my signature and donation I join the Hoosier Environmental Council and my fellow citizens in demanding that the State spend its transportation dollars on cleaner, more energy efficient transportation programs that will reduce air pollution and climate change, while providing jobs for Indiana citizens.

I reject the State's plans to spend over $1 billion on a new Indianapolis-to-Evansville Highway, which will save only 8 minutes in travel time, and was found by an independent government study to be a waste of our tax dollars.

I support the JOBS AND ENVIRONMENT TRANSPORTATION PLAN that: calls for repairing existing roads; protects our natural heritage and reduces air pollution; uses existing funds for improved mass transit including passenger trains; and allows for "town hall" discussions at public transportation project hearings.

TO: **GOVERNOR EVAN BAYH and OTHER ELECTED OFFICIALS**

FROM: **THE CITIZENS OF INDIANA**

With my signature and donation I join the Hoosier Environmental Council in demanding a State Transportation Plan that reduces air pollution, climate change, and traffic congestion while promoting economic development

I reject the State's plan to spend one billion dollars on a new, uneconomical superhighway that the government's own study has found to be a waste of our tax dollars.

Therefore, I support the JOBS AND ENVIRONMENT TRANSPORTATION PLAN that calls for repairing existing roads, using existing funds for mass transit and high speed rail, and allowing "town hall" discussions at public transportation project hearings.

HECAF Hoosier Environmental Council ACTION FUND

TO: **GOVERNOR EVAN BAYH and OTHER ELECTED OFFICIALS**

FROM: **THE CITIZENS OF INDIANA**

With my signature and donation I join the Hoosier Environmental Council in demanding a State Transportation Plan that reduces air pollution, climate change, and traffic congestion while promoting economic development.

I reject the State's plan to spend one billion dollars on a new, uneconomical superhighway that the government's own study has found to be a waste of our tax dollars.

Therefore, I support the JOBS AND ENVIRONMENT TRANSPORTATION PLAN that calls for repairing existing roads, using existing funds for mass transit and high speed rail, and allowing "town hall" discussions at public transportation project hearings.

HECAF
Hoosier Environmental Council ACTION FUND

TO: **GOVERNOR EVAN BAYH and OTHER ELECTED OFFICIALS**

FROM: **THE CITIZENS OF INDIANA**

With my signature and donation I join the Hoosier Environmental Council and my fellow citizens in demanding that the State spend its transportation dollars on cleaner, more energy efficient transportation programs that will reduce air pollution and climate change, while providing jobs for Indiana citizens.

I reject the State's plans to spend over $1 billion on a new Indianapolis-to-Evansville Highway, which will save only 8 minutes in travel time, and was found by an independent government study to be a waste of our tax dollars.

I support the JOBS AND ENVIRONMENT TRANSPORTATION PLAN that: calls for repairing existing roads; protects our natural heritage and reduces air pollution; uses existing funds for improved mass transit including passenger trains; and allows for "town hall" discussions at public transportation project hearings.

With my signature and donation I join the Hoosier Environmental Council in demanding a State Transportation Plan that reduces air pollution, climate change, and traffic congestion while promoting economic development.

I reject the State's plan to spend one billion dollars on a new, uneconomical, superhighway that the government's own study has found to be a waste of our tax dollars.

Therefore, I support the JOBS AND ENVIRONMENT TRANSPORTATION PLAN that calls for repairing existing roads, using existing funds for mass transit and high speed rail, and allowing "town hall" discussions at public transportation project hearings.

With my signature and donation I join the Hoosier Environmental Council in demanding a State Transportation Plan that reduces air pollution, climate change, and traffic congestion while promoting economic development.

I reject the State's plan to spend one billion dollars on a new, uneconomical superhighway that the government's own study has found to be a waste of our tax dollars.

Therefore, I support the JOBS AND ENVIRONMENT TRANSPORTATION PLAN that calls for repairing existing roads, using existing funds for mass transit and high speed rail, and allowing "town hall" discussions at public transportation project hearings.

HECAF
Hoosier Environmental Council ACTION FUND

TO: **GOVERNOR EVAN BAYH and OTHER ELECTED OFFICIALS**

FROM: **THE CITIZENS OF INDIANA**

With my signature and donation I join the Hoosier Environmental Council in demanding a State Transportation Plan that reduces air pollution, climate change, and traffic congestion while promoting economic development.

I reject the State's plan to spend one billion dollars on a new, uneconomical superhighway that the government's own study has found to be a waste of our tax dollars.

Therefore, I support the JOBS AND ENVIRONMENT TRANSPORTATION PLAN that calls for repairing existing roads, using existing funds for mass transit and high speed rail, and allowing "town hall" discussions at publi transportation project hearings.

Hoosier Environmental Council
ACTION FUND

TO: **GOVERNOR EVAN BAYH and OTHER ELECTED OFFICIALS**

FROM: **THE CITIZENS OF INDIANA**

With my signature and donation I join the Hoosier Environmental Council in demanding a State Transportation Plan that reduces air pollution, climate change, and traffic congestion while promoting economic development.

I reject the State's plan to spend one billion dollars on a new, uneconomical superhighway that the government's own study has found to be a waste of our tax dollars.

Therefore, I support the JOBS AND ENVIRONMENT TRANSPORTATION PLAN that calls for repairing existing roads, using existing funds for mass transit and high speed rail, and allowing "town hall" discussions at public transportation project hearings.

HECAF Hoosier Environmental Council ACTION FUND

TO: **GOVERNOR EVAN BAYH and OTHER ELECTED OFFICIALS**

FROM: **THE CITIZENS OF INDIANA**

With my signature and donation I join the Hoosier Environmental Council in demanding a State Transportation Plan that reduces air pollution, climate change, and traffic congestion while promoting economic development.

I reject the State's plan to spend one billion dollars on a new, uneconomical superhighway that the government's own study has found to be a waste of our tax dollars.

Therefore, I support the JOBS AND ENVIRONMENT TRANSPORTATION PLAN that calls for repairing existing roads, using existing funds for mass transit and high speed rail, and allowing "town hall" discussions at publ transportation project hearings.

FROM: **THE CITIZENS OF INDIANA**

With my signature and donation I join the Hoosier Environmental Council and my fellow citizens in demanding that the millions of my tax dollars now available for transportation be spent in ways that benefit all citizens.

Because Economic Development and Jobs should be a priority in Indiana and because 40% of all Hoosiers already breathe air below EPA health standards, I urge you to:

1) Reject the State's plan to spend over one billion dollars on a new, uneconomical superhighway that the government's own study has found to be a waste of our tax dollars.

2) Support the JOBS AND ENVIRONMENT TRANSPORTATION PLAN that calls for repairing existing roads, using available funds for passenger trains and mass transit, and allowing "town hall" discussions at public transportation project hearings.

FROM: **THE CITIZENS OF INDIANA**

With my signature and donation I join the Hoosier Environmental Council in demanding a State Transportation Plan that reduces air pollution, climate change, and traffic congestion while promoting economic development.

I reject the State's plan to spend one billion dollars on a new, uneconomical superhighway that the government's own study has found to be a waste of our tax dollars.

Therefore, I support the JOBS AND ENVIRONMENT TRANSPORTATION PLAN that calls for repairing existing roads, using existing funds for mass transit and high speed rail, and allowing "town hall" discussions at public transportation project hearings.

HECAF Hoosier Environmental Council ACTION FUND

TO: **GOVERNOR EVAN BAYH and OTHER ELECTED OFFICIALS**

FROM: **THE CITIZENS OF INDIANA**

With my signature and donation I join the Hoosier Environmental Council in demanding a State Transportation Plan that reduces air pollution, climate change, and traffic congestion while promoting economic development.

I reject the State's plan to spend one billion dollars on a new, uneconomical superhighway that the government's own study has found to be a waste of our tax dollars.

Therefore, I support the JOBS AND ENVIRONMENT TRANSPORTATION PLAN that calls for repairing existing roads, using existing funds for mass transit and high speed rail, and allowing "town hall" discussions at publi transportation project hearings.

HECAF
Hoosier Environmental Council
ACTION FUND

TO: **GOVERNOR EVAN BAYH and OTHER ELECTED OFFICIALS**

FROM: **THE CITIZENS OF INDIANA**

With my signature and donation I join the Hoosier Environmental Council in demanding a State Transportation Plan that reduces air pollution, climate change, and traffic congestion while promoting economic development.

I reject the State's plan to spend one billion dollars on a new, uneconomical superhighway that the government's own study has found to be a waste of our tax dollars.

Therefore, I support the JOBS AND ENVIRONMENT TRANSPORTATION PLAN that calls for repairing existing roads, using existing funds for mass transit and high speed rail, and allowing "town hall" discussions at public transportation project hearings.

With my signature and donation I join the Hoosier Environmental Council in demanding a State Transportation Plan that reduces air pollution, climate change, and traffic congestion while promoting economic development.

I reject the State's plan to spend one billion dollars on a new, uneconomical superhighway that the government's own study has found to be a waste of our tax dollars.

Therefore, I support the JOBS AND ENVIRONMENT TRANSPORTATION PLAN that calls for repairing existing roads, using existing funds for mass transit and high speed rail, and allowing "town hall" discussions at public transportation project hearings.

FROM: **THE CITIZENS OF INDIANA**

As 40% of all Hoosiers already breathe air which fails EPA health standards and as climate change and air pollution are strongly linked to exhaust emissions, I urge you to spend our allotted transportation tax dollars on cleaner transportation systems such as passenger trains and mass transit.

I reject the State's plan to spend over one billion tax dollars on one uneconomical superhighway. Instead, I support the JOBS AND ENVIRONMENT TRANSPORTATION PLAN that will bring Clean Economic Development and Jobs to Indiana.

With my signature and donation I support the H.E.C. in their work to implement this Climate-Saving Plan.

FROM: **THE CITIZENS OF INDIANA**

With my signature and donation I join the Hoosier Environmental Council in demanding a State Transportation Plan that reduces air pollution, climate change, and traffic congestion while promoting economic development.

I reject the State's plan to spend one billion dollars on a new, uneconomical superhighway that the government's own study has found to be a waste of our tax dollars.

Therefore, I support the JOBS AND ENVIRONMENT TRANSPORTATION PLAN that calls for repairing existing roads, using existing funds for mass transit and high speed rail, and allowing "town hall" discussions at public transportation project hearings.

Hoosier Environmental Council
ACTION FUND

TO: **GOVERNOR EVAN BAYH and OTHER ELECTED OFFICIALS**

FROM: **THE CITIZENS OF INDIANA**

With my signature and donation I join the Hoosier Environmental Council in demanding a State Transportation Plan that reduces air pollution, climate change, and traffic congestion while promoting economic development.

I reject the State's plan to spend one billion dollars on a new, uneconomical superhighway that the government's own study has found to be a waste of our tax dollars.

Therefore, I support the JOBS AND ENVIRONMENT TRANSPORTATION PLAN that calls for repairing existing roads, using existing funds for mass transit and high speed rail, and allowing "town hall" discussions at public transportation project hearings.

TO: **GOVERNOR EVAN BAYH** and **OTHER ELECTED OFFICIALS**

FROM: **THE CITIZENS OF INDIANA**

As 40% of all Hoosiers already breathe air below EPA health standards and as climate change and air pollution are strongly linked to exhaust emissions, I urge you to take the following step:

Spend our allotted transportation tax dollars on cleaner transportation systems.

I reject the State's plan to spend over one billion tax dollars on one uneconomical superhighway. Instead, I support the JOBS AND ENVIRONMENT TRANSPORTATION PLAN that will bring Clean Economic Development and Jobs to Indiana.

With my signature and donation I support the H.E.C. in their work to implement this Climate-Saving Plan.

HECAF Hoosier Environmental Council ACTION FUND

TO: **GOVERNOR EVAN BAYH and OTHER ELECTED OFFICIALS**

FROM: **THE CITIZENS OF INDIANA**

With my signature and donation I join the Hoosier Environmental Council in demanding a State Transportation Plan that reduces air pollution, climate change, and traffic congestion while promoting economic development.

I reject the State's plan to spend one billion dollars on a new, uneconomical superhighway that the government's own study has found to be a waste of our tax dollars.

Therefore, I support the JOBS AND ENVIRONMENT TRANSPORTATION PLAN that calls for repairing existing roads, using existing funds for mass transit and high speed rail, and allowing "town hall" discussions at public transportation project hearings.

FROM: **THE CITIZENS OF INDIANA**

As 40% of all Hoosiers already breathe air which fails EPA health standards and as climate change and air pollution are strongly linked to exhaust emissions, I urge you to spend our allotted transportation tax dollars on cleaner transportation systems such as passenger trains and mass transit.

I reject the State's plan to spend over one billion tax dollars on one uneconomical superhighway. Instead, I support the JOBS AND ENVIRONMENT TRANSPORTATION PLAN that will bring Clean Economic Development and Jobs to Indiana.

With my signature and donation I support the H.E.C. in their work to implement this Climate-Saving Plan.

HECAF
Hoosier Environmental Council ACTION FUND

TO: **GOVERNOR EVAN BAYH** and **OTHER ELECTED OFFICIALS**

FROM: **THE CITIZENS OF INDIANA**

With my signature and donation I join the Hoosier Environmental Council in demanding a State Transportation Plan that reduces air pollution, climate change, and traffic congestion while promoting economic development.

I reject the State's plan to spend one billion dollars on a new, uneconomical superhighway that the government's own study has found to be a waste of our tax dollars.

Therefore, I support the JOBS AND ENVIRONMENT TRANSPORTATION PLAN that calls for repairing existing roads, using existing funds for mass transit and high speed rail, and allowing "town hall" discussions at public transportation project hearings.

FROM: **THE CITIZENS OF INDIANA**

With my signature and donation I join the Hoosier Environmental Council and my fellow citizens in demanding that the millions of my tax dollars now available for transportation be spent in ways that benefit all citizens.

Because Economic Development and Jobs should be a priority in Indiana and because 40% of all Hoosiers already breathe air below EPA health standards, I urge you to:

1) Reject the State's plan to spend over one billion dollars on a new, uneconomical superhighway that the government's own study has found to be a waste of our tax dollars

2) Support the JOBS AND ENVIRONMENT TRANSPORTATION PLAN that calls for repairing existing roads, using available funds for passenger trains and mass transit, and allowing "town hall" discussions at public transportation project hearings.

HECAF
Hoosier Environmental Council
ACTION FUND

TO: **GOVERNOR EVAN BAYH and OTHER ELECTED OFFICIALS**

FROM: **THE CITIZENS OF INDIANA**

With my signature and donation I join the Hoosier Environmental Council and my fellow citizens in demanding that the millions of my tax dollars now available for transportation be spent in ways that benefit all citizens.

Because Economic Development and Jobs should be a priority in Indiana and because 40% of all Hoosiers already breathe air below EPA health standards, I urge you to:

1) Reject the State's plan to spend over one billion dollars on a new, uneconomical superhighway that the government's own study has found to be a waste of our tax dollars

2) Support the JOBS AND ENVIRONMENT TRANSPORTATION PLAN that calls for repairing existing roads, using available funds for passenger trains and mass transit, and allowing "town hall" discussions at public transportation project hearings.

HECAF
Hoosier Environmental Council ACTION FUND

TO: **GOVERNOR EVAN BAYH and OTHER ELECTED OFFICIALS**

FROM: **THE CITIZENS OF INDIANA**

With my signature and donation I join the Hoosier Environmental Council in demanding a State Transportation Plan that reduces air pollution, climate change, and traffic congestion while promoting economic development.

I reject the State's plan to spend one billion dollars on a new, uneconomical superhighway that the government's own study has found to be a waste of our tax dollars.

Therefore, I support the JOBS AND ENVIRONMENT TRANSPORTATION PLAN that calls for repairing existing roads, using existing funds for mass transit and high speed rail, and allowing "town hall" discussions at public transportation project hearings.

Hoosier Environmental Council
ACTION FUND

TO **GOVERNOR EVAN BAYH and OTHER ELECTED OFFICIALS**

FROM **THE CITIZENS OF INDIANA**

With my signature and donation I join the Hoosier Environmental Council and my fellow citizens in demanding that the millions of my tax dollars now available for transportation be spent in ways that benefit all citizens.

Because Economic Development and Jobs should be a priority in Indiana and because 40% of all Hoosiers already breathe air below EPA health standards, I urge you to:

1) Reject the State's plan to spend over one billion dollars on a new, uneconomical superhighway that the government's own study has found to be a waste of our tax dollars

2) Support the JOBS AND ENVIRONMENT TRANSPORTATION PLAN that calls for repairing existing roads, using available funds for passenger trains and mass transit, and allowing "town hall" discussions at public transportation project hearings.

Hoosier Environmental Council
ACTION FUND

TO: **GOVERNOR EVAN BAYH and OTHER ELECTED OFFICIALS**

FROM: **THE CITIZENS OF INDIANA**

With my signature and donation I join the Hoosier Environmental Council in demanding a State Transportation Plan that reduces air pollution, climate change, and traffic congestion while promoting economic development.

I reject the State's plan to spend one billion dollars on a new, uneconomical superhighway that the government's own study has found to be a waste of our tax dollars.

Therefore, I support the JOBS AND ENVIRONMENT TRANSPORTATION PLAN that calls for repairing existing roads, using existing funds for mass transit and high speed rail, and allowing "town hall" discussions at public transportation project hearings.

TO: **GOVERNOR EVAN BAYH and OTHER ELECTED OFFICIALS**

FROM: **THE CITIZENS OF INDIANA**

With my signature and donation I join the Hoosier Environmental Council and my fellow citizens in demanding that the millions of my tax dollars now available for transportation be spent in ways that benefit all citizens.

Because Economic Development and Jobs should be a priority in Indiana and because 40% of all Hoosiers already breathe air below EPA health standards, I urge you to:

1) Reject the State's plan to spend over one billion dollars on a new, uneconomical superhighway that the government's own study has found to be a waste of our tax dollars

2) Support the JOBS AND ENVIRONMENT TRANSPORTATION PLAN that calls for repairing existing roads, using available funds for passenger trains and mass transit, and allowing "town hall" discussions at public transportation project hearings.

With my signature and donation I join the Hoosier Environmental Council in demanding a State Transportation Plan that reduces air pollution, climate change, and traffic congestion while promoting economic development.

I reject the State's plan to spend one billion dollars on a new, uneconomical superhighway that the government's own study has found to be a waste of our tax dollars.

Therefore, I support the JOBS AND ENVIRONMENT TRANSPORTATION PLAN that calls for repairing existing roads, using existing funds for mass transit and high speed rail, and allowing "town hall" discussions at public transportation project hearings.

TO: **GOVERNOR EVAN BAYH and OTHER ELECTED OFFICIALS**

FROM: **THE CITIZENS OF INDIANA**

With my signature and donation I join the Hoosier Environmental Council and my fellow citizens in demanding that the millions of my tax dollars now available for transportation be spent in ways that benefit all citizens.

Because Economic Development and Jobs should be a priority in Indiana and because 40% of all Hoosiers already breathe air below EPA health standards, I urge you to:

1) Reject the State's plan to spend over one billion dollars on a new, uneconomical superhighway that the government's own study has found to be a waste of our tax dollars

2) Support the JOBS AND ENVIRONMENT TRANSPORTATION PLAN that calls for repairing existing roads, using available funds for passenger trains and mass transit, and allowing "town hall" discussions at public transportation project hearings.

HECAF
Hoosier Environmental Council
ACTION FUND

TO: **GOVERNOR EVAN BAYH and OTHER ELECTED OFFICIALS**

FROM: **THE CITIZENS OF INDIANA**

With my signature and donation I join the Hoosier Environmental Council in demanding a State Transportation Plan that reduces air pollution, climate change, and traffic congestion while promoting economic development.

I reject the State's plan to spend one billion dollars on a new, uneconomical superhighway that the government's own study has found to be a waste of our tax dollars.

Therefore, I support the JOBS AND ENVIRONMENT TRANSPORTATION PLAN that calls for repairing existing roads, using existing funds for mass transit and high speed rail, and allowing "town hall" discussions at public transportation project hearings.

TO: **GOVERNOR EVAN BAYH** and **OTHER ELECTED OFFICIALS**

FROM: **THE CITIZENS OF INDIANA**

With my signature and donation I join the Hoosier Environmental Council and my fellow citizens in demanding that the millions of my tax dollars now available for transportation be spent in ways that benefit all citizens.

Because Economic Development and Jobs should be a priority in Indiana and because 40% of all Hoosiers already breathe air below EPA health standards, I urge you to:

1) Reject the State's plan to spend over one billion dollars on a new, uneconomical superhighway that the government's own study has found to be a waste of our tax dollars

2) Support the JOBS AND ENVIRONMENT TRANSPORTATION PLAN that calls for repairing existing roads, using available funds for passenger trains and mass transit, and allowing "town hall" discussions at public transportation project hearings.

HECAF Hoosier Environmental Council ACTION FUND

TO: **GOVERNOR EVAN BAYH** and **OTHER ELECTED OFFICIALS**

FROM: **THE CITIZENS OF INDIANA**

With my signature and donation I join the Hoosier Environmental Council and my fellow citizens in demanding that the millions of my tax dollars now available for transportation be spent in ways that benefit all citizens.

Because Economic Development and Jobs should be a priority in Indiana and because 40% of all Hoosiers already breathe air below EPA health standards, I urge you to:

1) Reject the State's plan to spend over one billion dollars on a new, uneconomical superhighway that the government's own study has found to be a waste of our tax dollars

2) Support the JOBS AND ENVIRONMENT TRANSPORTATION PLAN that calls for repairing existing roads, using available funds for passenger trains and mass transit, and allowing "town hall" discussions at public transportation project hearings.

HECAF Hoosier Environmental Council ACTION FUND

TO: **GOVERNOR EVAN BAYH** and **OTHER ELECTED OFFICIALS**

FROM: **THE CITIZENS OF INDIANA**

With my signature and donation I join the Hoosier Environmental Council in demanding a State Transportation Plan that reduces air pollution, climate change, and traffic congestion while promoting economic development.

I reject the State's plan to spend one billion dollars on a new, uneconomical superhighway that the government's own study has found to be a waste of our tax dollars.

Therefore, I support the JOBS AND ENVIRONMENT TRANSPORTATION PLAN that calls for repairing existing roads, using existing funds for mass transit and high speed rail, and allowing "town hall" discussions at public transportation project hearings.

FROM: **THE CITIZENS OF INDIANA**

With my signature and donation I join the Hoosier Environmental Council in demanding a State Transportation Plan that reduces air pollution, climate change, and traffic congestion while promoting economic development.

I reject the State's plan to spend one billion dollars on a new, uneconomical superhighway that the government's own study has found to be a waste of our tax dollars.

Therefore, I support the JOBS AND ENVIRONMENT TRANSPORTATION PLAN that calls for repairing existing roads, using existing funds for mass transit and high speed rail, and allowing "town hall" discussions at public transportation project hearings.

h my signature and donation I join the Hoosier Environmental Council and my fellow citizens in demanding that the ate spend its transportation dollars on cleaner, more energy efficient transportation programs that will reduce air pollution d climate change, while providing jobs for Indiana citizens.

reject the State's plans to spend over $1 billion on a new Indianapolis-to-Evansville Highway, which will save only 8 minutes in travel time, and was found by an independent government study to be a waste of our tax dollars.

I support the JOBS AND ENVIRONMENT TRANSPORTATION PLAN that: calls for repairing existing roads; protects our natural heritage and reduces air pollution; uses existing funds for improved mass transit including passenger trains; and allows for "town hall" discussions at public transportation project hearings.

With my signature and donation I join the Hoosier Environmental Council in demanding a State Transportation Plan that reduces air pollution, climate change, and traffic congestion while promoting economic development.

I reject the State's plan to spend one billion dollars on a new, uneconomical superhighway that the government's own study has found to be a waste of our tax dollars.

Therefore, I support the JOBS AND ENVIRONMENT TRANSPORTATION PLAN that calls for repairing existing roads, using existing funds for mass transit and high speed rail, and allowing "town hall" discussions at public transportation project hearings.

Hoosier Environmental Council ACTION FUND

TO: **GOVERNOR EVAN BAYH** and **OTHER ELECTED OFFICIALS**

FROM: **THE CITIZENS OF INDIANA**

With my signature and donation I join the Hoosier Environmental Council and my fellow citizens in demanding that the State spend its transportation dollars on cleaner, more energy efficient transportation programs that will reduce air pollution and climate change, while providing jobs for Indiana citizens.

I reject the State's plans to spend over $1 billion on a new Indianapolis-to-Evansville Highway, which will save only 8 minutes in travel time, and was found by an independent government study to be a waste of our tax dollars.

I support the JOBS AND ENVIRONMENT TRANSPORTATION PLAN that: calls for repairing existing roads; protects our natural heritage and reduces air pollution; uses existing funds for improved mass transit including passenger trains; and allows for "town hall" discussions at public transportation project hearings.

FROM: **THE CITIZENS OF INDIANA**

With my signature and donation I join the Hoosier Environmental Council in demanding a State Transportation Plan that reduces air pollution, climate change, and traffic congestion while promoting economic development.

I reject the State's plan to spend one billion dollars on a new, uneconomical superhighway that the government's own study has found to be a waste of our tax dollars.

Therefore, I support the JOBS AND ENVIRONMENT TRANSPORTATION PLAN that calls for repairing existing roads, using existing funds for mass transit and high speed rail, and allowing "town hall" discussions at public transportation project hearings.

HECAF Hoosier Environmental Council

TO: **GOVERNOR EVAN BAYH** and **OTHER ELECTED OFFICIALS**

FROM: **THE CITIZENS OF INDIANA**

With my signature and donation I join the Hoosier Environmental Council and my fellow citizens in demanding that the State spend its transportation dollars on cleaner, more energy efficient transportation programs that will reduce air pollution and climate change, while providing jobs for Indiana citizens.

I reject the State's plans to spend over $1 billion on a new Indianapolis-to-Evansville Highway, which will save only 8 minutes in travel time, and was found by an independent government study to be a waste of our tax dollars.

I support the JOBS AND ENVIRONMENT TRANSPORTATION PLAN that: calls for repairing existing roads; protects our natural heritage and reduces air pollution; uses existing funds for improved mass transit including passenger trains; and allows for "town hall" discussions at public transportation project hearings.

Hoosier Environmental Council
ACTION FUND

TO: **GOVERNOR EVAN BAYH** and **OTHER ELECTED OFFICIALS**

FROM: **THE CITIZENS OF INDIANA**

With my signature and donation I join the Hoosier Environmental Council and my fellow citizens in demanding that the State spend its transportation dollars on cleaner, more energy efficient transportation programs that will reduce air pollution and climate change, while providing jobs for Indiana citizens.

I reject the State's plans to spend over $1 billion on a new Indianapolis-to-Evansville Highway, which will save only 8 minutes in travel time, and was found by an independent government study to be a waste of our tax dollars.

I support the JOBS AND ENVIRONMENT TRANSPORTATION PLAN that: calls for repairing existing roads; protects our natural heritage and reduces air pollution; uses existing funds for improved mass transit including passenger trains; and allows for "town hall" discussions at public transportation project hearings.

HECAF Hoosier Environmental

TO: GOVERNOR EVAN BAYH and OTHER ELECTED OFFICIALS

FROM: THE CITIZENS OF INDIANA

With my signature and donation I join the Hoosier Environmental Council in demanding a State Transportation Plan that reduces air pollution, climate change, and traffic congestion while promoting economic development

I reject the State's plan to spend one billion dollars on a new, uneconomical superhighway that the government's own study has found to be a waste of our tax dollars.

Therefore, I support the JOBS AND ENVIRONMENT TRANSPORTATION PLAN that calls for repairing existing roads, using existing funds for mass transit and high speed rail, and allowing "town hall" discussions at pub transportation project hearings.

HECAF Hoosier Environmental Council ACTION FUND

TO: **GOVERNOR EVAN BAYH and OTHER ELECTED OFFICIALS**

FROM: **THE CITIZENS OF INDIANA**

With my signature and donation I join the Hoosier Environmental Council and my fellow citizens in demanding that the State spend its transportation dollars on cleaner, more energy efficient transportation programs that will reduce air pollution and climate change, while providing jobs for Indiana citizens.

I reject the State's plans to spend over $1 billion on a new Indianapolis-to-Evansville Highway, which will save only 8 minutes in travel time, and was found by an independent government study to be a waste of our tax dollars.

I support the JOBS AND ENVIRONMENT TRANSPORTATION PLAN that calls for repairing existing roads; protects our natural heritage and reduces air pollution; uses existing funds for improved mass transit including passenger trains; and allows for "town hall" discussions at public transportation project hearings.

Hoosier Environmental Council ACTION FUND

TO: GOVERNOR EVAN BAYH and OTHER ELECTED OFFICIALS

FROM: THE CITIZENS OF INDIANA

With my signature and donation I join the Hoosier Environmental Council and my fellow citizens in demanding that the State spend its transportation dollars on cleaner, more energy efficient transportation programs that will reduce air pollu[illegible] and climate change, while providing jobs for Indiana citizens.

I reject the State's plans to spend over $1 billion on a new Indianapolis-to-Evansville Highway, which will save only 8 minutes in travel time, and was found by an independent government study to be a waste of our tax dollars.

I support the JOBS AND ENVIRONMENT TRANSPORTATION PLAN that: calls for repairing existing roads; protects ou[illegible] natural heritage and reduces air pollution; uses existing funds for improved mass transit including passenger trains; and allows for "town hall" discussions at public transportation project hearings.

Hoosier Environmental Council ACTION FUND

TO: GOVERNOR EVAN BAYH and OTHER ELECTED OFFICIALS

FROM: THE CITIZENS OF INDIANA

With my signature and donation I join the Hoosier Environmental Council and my fellow citizens in demanding that the State spend its transportation dollars on cleaner, more energy efficient transportation programs that will reduce air pollu[illegible] and climate change, while providing jobs for Indiana citizens.

I reject the State's plans to spend over $1 billion on a new Indianapolis-to-Evansville Highway, which will save only 8 minutes in travel time, and was found by an independent government study to be a waste of our tax dollars.

I support the JOBS AND ENVIRONMENT TRANSPORTATION PLAN that: calls for repairing existing roads; protects ou[illegible] natural heritage and reduces air pollution; uses existing funds for improved mass transit including passenger trains; an[illegible] allows for "town hall" discussions at public transportation project hearings.

Hoosier Environmental Council ACTION FUND

TO: **GOVERNOR EVAN BAYH and OTHER ELECTED OFFICIALS**

FROM: **THE CITIZENS OF INDIANA**

With my signature and donation I join the Hoosier Environmental Council and my fellow citizens in demanding that the State spend its transportation dollars on cleaner, more energy efficient transportation programs that will reduce air pollution and climate change, while providing jobs for Indiana citizens.

I reject the State's plans to spend over $1 billion on a new Indianapolis-to-Evansville Highway, which will save only 8 minutes in travel time, and was found by an independent government study to be a waste of our tax dollars.

I support the JOBS AND ENVIRONMENT TRANSPORTATION PLAN that: calls for repairing existing roads; protects our natural heritage and reduces air pollution; uses existing funds for improved mass transit including passenger trains; and allows for "town hall" discussions at public transportation project hearings.

Hoosier Environmental Council ACTION FUND

TO: **GOVERNOR EVAN BAYH and OTHER ELECTED OFFICIALS**

FROM: **THE CITIZENS OF INDIANA**

With my signature and donation I join the Hoosier Environmental Council and my fellow citizens in demanding that the State spend its transportation dollars on cleaner, more energy efficient transportation programs that will reduce air pollution and climate change, while providing jobs for Indiana citizens.

I reject the State's plans to spend over $1 billion on a new Indianapolis-to-Evansville Highway, which will save only 8 minutes in travel time, and was found by an independent government study to be a waste of our tax dollars.

I support the JOBS AND ENVIRONMENT TRANSPORTATION PLAN that: calls for repairing existing roads; protects our natural heritage and reduces air pollution; uses existing funds for improved mass transit including passenger trains; and allows for "town hall" discussions at public transportation project hearings.

Hoosier Environmental Council ACTION FUND

TO: GOVERNOR EVAN BAYH and OTHER ELECTED OFFICIALS

FROM: THE CITIZENS OF INDIANA

With my signature and donation I join the Hoosier Environmental Council in demanding a State Transportation Plan that reduces air pollution, climate change, and traffic congestion while promoting economic development

I reject the State's plan to spend one billion dollars on a new, uneconomical superhighway that the government's own study has found to be a waste of our tax dollars.

Therefore, I support the JOBS AND ENVIRONMENT TRANSPORTATION PLAN that calls for repairing existing roads, using existing funds for mass transit and high speed rail, and allowing "town hall" discussions at public transportation project hearings.

Hoosier Environmental Council ACTION FUND

TO: GOVERNOR EVAN BAYH and OTHER ELECTED OFFICIALS

FROM: THE CITIZENS OF INDIANA

With my signature and donation I join the Hoosier Environmental Council and my fellow citizens in demanding that th State spend its transportation dollars on cleaner, more energy efficient transportation programs that will reduce air pc and climate change, while providing jobs for Indiana citizens.

I reject the State's plans to spend over $1 billion on a new Indianapolis-to-Evansville Highway, which will save only 8 minutes in travel time, and was found by an independent government study to be a waste of our tax dollars.

I support the JOBS AND ENVIRONMENT TRANSPORTATION PLAN that: calls for repairing existing roads; protects natural heritage and reduces air pollution; uses existing funds for improved mass transit including passenger trains; a allows for "town hall" discussions at public transportation project hearings.

Hoosier Environmental Council ACTION FUND

TO: **GOVERNOR EVAN BAYH and OTHER ELECTED OFFICIALS**

FROM: **THE CITIZENS OF INDIANA**

With my signature and donation I join the Hoosier Environmental Council and my fellow citizens in demanding that th State spend its transportation dollars on cleaner, more energy efficient transportation programs that will reduce air pc and climate change, while providing jobs for Indiana citizens.

I reject the State's plans to spend over $1 billion on a new Indianapolis-to-Evansville Highway, which will save only 8 minutes in travel time, and was found by an independent government study to be a waste of our tax dollars.

I support the JOBS AND ENVIRONMENT TRANSPORTATION PLAN that: calls for repairing existing roads; protects natural heritage and reduces air pollution; uses existing funds for improved mass transit including passenger trains; a allows for "town hall" discussions at public transportation project hearings.

HECAF Hoosier Environmental Council ACTION FUND

TO: **GOVERNOR EVAN BAYH and OTHER ELECTED OFFICIALS**

FROM: **THE CITIZENS OF INDIANA**

With my signature and donation I join the Hoosier Environmental Council in demanding a State Transportation Plan that reduces air pollution, climate change, and traffic congestion while promoting economic development

I reject the State's plan to spend one billion dollars on a new, uneconomical superhighway that the government's own study has found to be a waste of our tax dollars.

Therefore, I support the JOBS AND ENVIRONMENT TRANSPORTATION PLAN that calls for repairing existing roads, using existing funds for mass transit and high speed rail, and allowing "town hall" discussions at publ c transportation project hearings.

Hoosier Environmental Council ACTION FUND

TO: **GOVERNOR EVAN BAYH and OTHER ELECTED OFFICIALS**

FROM: **THE CITIZENS OF INDIANA**

With my signature and donation I join the Hoosier Environmental Council and my fellow citizens in demanding that th State spend its transportation dollars on cleaner, more energy efficient transportation programs that will reduce air p and climate change, while providing jobs for Indiana citizens.

I reject the State's plans to spend over $1 billion on a new Indianapolis-to-Evansville Highway, which will save only 8 minutes in travel time, and was found by an independent government study to be a waste of our tax dollars.

I support the JOBS AND ENVIRONMENT TRANSPORTATION PLAN that: calls for repairing existing roads; protects natural heritage and reduces air pollution; uses existing funds for improved mass transit including passenger trains; & allows for "town hall" discussions at public transportation project hearings.

HECAF
Hoosier Environmental Council
ACTION FUND

TO: **GOVERNOR EVAN BAYH and OTHER ELECTED OFFICIALS**

FROM: **THE CITIZENS OF INDIANA**

With my signature and donation I join the Hoosier Environmental Council in demanding a State Transportation Plan that reduces air pollution, climate change, and traffic congestion while promoting economic development.

I reject the State's plan to spend one billion dollars on a new, uneconomical superhighway that the government's own study has found to be a waste of our tax dollars.

Therefore, I support the JOBS AND ENVIRONMENT TRANSPORTATION PLAN that calls for repairing existing roads, using existing funds for mass transit and high speed rail, and allowing "town hall" discussions at publi transportation project hearings.

With my signature and donation I join the Hoosier Environmental Council in demanding a State Transportation Plan that reduces air pollution, climate change, and traffic congestion while promoting economic development.

I reject the State's plan to spend one billion dollars on a new, uneconomical superhighway that the government's own study has found to be a waste of our tax dollars.

Therefore, I support the JOBS AND ENVIRONMENT TRANSPORTATION PLAN that calls for repairing existing roads, using existing funds for mass transit and high speed rail, and allowing "town hall" discussions at publi transportation project hearings.

HECAF Hoosier Environmental Council ACTION FUND

TO: GOVERNOR EVAN BAYH and OTHER ELECTED OFFICIALS

FROM: THE CITIZENS OF INDIANA

With my signature and donation I join the Hoosier Environmental Council in demanding a State Transportation Plan that reduces air pollution, climate change, and traffic congestion while promoting economic development.

I reject the State's plan to spend one billion dollars on a new, uneconomical superhighway that the government's own study has found to be a waste of our tax dollars.

Therefore, I support the JOBS AND ENVIRONMENT TRANSPORTATION PLAN that calls for repairing existing roads, using existing funds for mass transit and high speed rail, and allowing "town hall" discussions at public transportation project hearings.

Hoosier Environmental Council
ACTION FUND

TO: **GOVERNOR EVAN BAYH and OTHER ELECTED OFFICIALS**

FROM: **THE CITIZENS OF INDIANA**

With my signature and donation I join the Hoosier Environmental Council in demanding a State Transportation Plan that reduces air pollution, climate change, and traffic congestion while promoting economic development.

I reject the State's plan to spend one billion dollars on a new, uneconomical superhighway that the government's own study has found to be a waste of our tax dollars.

Therefore, I support the JOBS AND ENVIRONMENT TRANSPORTATION PLAN that calls for repairing existing roads, using existing funds for mass transit and high speed rail, and allowing "town hall" discussions at public transportation project hearings.

HECAF
Hoosier Environmental Council ACTION FUND

TO: **GOVERNOR EVAN BAYH** and **OTHER ELECTED OFFICIALS**

FROM: **THE CITIZENS OF INDIANA**

With my signature and donation I join the Hoosier Environmental Council and my fellow citizens in demanding that the State spend its transportation dollars on cleaner, more energy efficient transportation programs that will reduce air pollution and climate change, while providing jobs for Indiana citizens.

I reject the State's plans to spend over $1 billion on a new Indianapolis-to-Evansville Highway, which will save only 8 minutes in travel time, and was found by an independent government study to be a waste of our tax dollars.

I support the JOBS AND ENVIRONMENT TRANSPORTATION PLAN that: calls for repairing existing roads; protects our natural heritage and reduces air pollution; uses existing funds for improved mass transit including passenger trains; and allows for "town hall" discussions at public transportation project hearings.

Hoosier Environmental Council
ACTION FUND

TO: **GOVERNOR EVAN BAYH and OTHER ELECTED OFFICIALS**

FROM: **THE CITIZENS OF INDIANA**

With my signature and donation I join the Hoosier Environmental Council and my fellow citizens in demanding that the State spend its transportation dollars on cleaner, more energy efficient transportation programs that will reduce air pollution and climate change, while providing jobs for Indiana citizens.

I reject the State's plans to spend over $1 billion on a new Indianapolis-to-Evansville Highway, which will save only 8 minutes in travel time, and was found by an independent government study to be a waste of our tax dollars.

I support the JOBS AND ENVIRONMENT TRANSPORTATION PLAN that: calls for repairing existing roads; protects our natural heritage and reduces air pollution; uses existing funds for improved mass transit including passenger trains; and allows for "town hall" discussions at public transportation project hearings.

FROM: **THE CITIZENS OF INDIANA**

With my signature and donation I join the Hoosier Environmental Council in demanding a State Transportation Plan that reduces air pollution, climate change, and traffic congestion while promoting economic development.

I reject the State's plan to spend one billion dollars on a new, uneconomical superhighway that the government's own study has found to be a waste of our tax dollars.

Therefore, I support the JOBS AND ENVIRONMENT TRANSPORTATION PLAN that calls for repairing existing roads, using existing funds for mass transit and high speed rail, and allowing "town hall" discussions at public transportation project hearings.

HECAF Hoosier Environmental

TO: **GOVERNOR EVAN BAYH and OTHER ELECTED OFFICIALS**

FROM: **THE CITIZENS OF INDIANA**

With my signature and donation I join the Hoosier Environmental Council and my fellow citizens in demanding that the State spend its transportation dollars on cleaner, more energy efficient transportation programs that will reduce air pollution and climate change, while providing jobs for Indiana citizens.

I reject the State's plans to spend over $1 billion on a new Indianapolis-to-Evansville Highway, which will save only 8 minutes in travel time, and was found by an independent government study to be a waste of our tax dollars.

I support the JOBS AND ENVIRONMENT TRANSPORTATION PLAN that: calls for repairing existing roads; protects our natural heritage and reduces air pollution; uses existing funds for improved mass transit including passenger trains; and allows for "town hall" discussions at public transportation project hearings.

HECAF Hoosier Environmental Council

TO: **GOVERNOR EVAN BAYH** and **OTHER ELECTED OFFICIALS**

FROM: **THE CITIZENS OF INDIANA**

With my signature and donation I join the Hoosier Environmental Council in demanding a State Transportation Plan that reduces air pollution, climate change, and traffic congestion while promoting economic development.

I reject the State's plan to spend one billion dollars on a new, uneconomical superhighway that the government's own study has found to be a waste of our tax dollars.

Therefore, I support the JOBS AND ENVIRONMENT TRANSPORTATION PLAN that calls for repairing existing roads, using existing funds for mass transit and high speed rail, and allowing "town hall" discussions at public transportation project hearings.

HECAF Hoosier Environmental

TO: **GOVERNOR EVAN BAYH and OTHER ELECTED OFFICIALS**

FROM: **THE CITIZENS OF INDIANA**

With my signature and donation I join the Hoosier Environmental Council and my fellow citizens in demanding that the State spend its transportation dollars on cleaner, more energy efficient transportation programs that will reduce air pollution and climate change, while providing jobs for Indiana citizens.

I reject the State's plans to spend over $1 billion on a new Indianapolis-to-Evansville Highway, which will save only 8 minutes in travel time, and was found by an independent government study to be a waste of our tax dollars.

I support the JOBS AND ENVIRONMENT TRANSPORTATION PLAN that: calls for repairing existing roads; protects our natural heritage and reduces air pollution; uses existing funds for improved mass transit including passenger trains; and allows for "town hall" discussions at public transportation project hearings.

FROM: **THE CITIZENS OF INDIANA**

With my signature and donation I join the Hoosier Environmental Council in demanding a State Transportation Plan that reduces air pollution, climate change, and traffic congestion while promoting economic development.

I reject the State's plan to spend one billion dollars on a new, uneconomical superhighway that the government's own study has found to be a waste of our tax dollars.

Therefore, I support the JOBS AND ENVIRONMENT TRANSPORTATION PLAN that calls for repairing existing roads, using existing funds for mass transit and high speed rail, and allowing "town hall" discussions at public transportation project hearings.

Hoosier Environmental Council

TO: **GOVERNOR EVAN BAYH** and **OTHER ELECTED OFFICIALS**

FROM: **THE CITIZENS OF INDIANA**

With my signature and donation I join the Hoosier Environmental Council in demanding a State Transportation Plan that reduces air pollution, climate change, and traffic congestion while promoting economic development.

I reject the State's plan to spend one billion dollars on a new, uneconomical superhighway that the government's own study has found to be a waste of our tax dollars.

Therefore, I support the JOBS AND ENVIRONMENT TRANSPORTATION PLAN that calls for repairing existing roads, using existing funds for mass transit and high speed rail, and allowing "town hall" discussions at public transportation project hearings.

HECAF
Hoosier Environmental Council
ACTION FUND

TO: **GOVERNOR EVAN BAYH and OTHER ELECTED OFFICIALS**

FROM: **THE CITIZENS OF INDIANA**

With my signature and donation I join the Hoosier Environmental Council and my fellow citizens in demanding that the State spend its transportation dollars on cleaner, more energy efficient transportation programs that will reduce air pollution and climate change, while providing jobs for Indiana citizens.

I reject the State's plans to spend over $1 billion on a new Indianapolis-to-Evansville Highway, which will save only 8 minutes in travel time, and was found by an independent government study to be a waste of our tax dollars.

I support the JOBS AND ENVIRONMENT TRANSPORTATION PLAN that: calls for repairing existing roads; protects our natural heritage and reduces air pollution; uses existing funds for improved mass transit including passenger trains; and allows for "town hall" discussions at public transportation project hearings.

Hoosier Environmental Council

TO: **GOVERNOR EVAN BAYH** and **OTHER ELECTED OFFICIALS**

FROM: **THE CITIZENS OF INDIANA**

With my signature and donation I join the Hoosier Environmental Council in demanding a State Transportation Plan that reduces air pollution, climate change, and traffic congestion while promoting economic development.

I reject the State's plan to spend one billion dollars on a new, uneconomical superhighway that the government's own study has found to be a waste of our tax dollars.

Therefore, I support the JOBS AND ENVIRONMENT TRANSPORTATION PLAN that calls for repairing existing roads, using existing funds for mass transit and high speed rail, and allowing "town hall" discussions at public transportation project hearings.

City South Bend Date 10/1/93

HECAF
Hoosier Environmental Council

TO: **GOVERNOR EVAN BAYH and OTHER ELECTED OFFICIALS**

FROM: **THE CITIZENS OF INDIANA**

With my signature and donation I join the Hoosier Environmental Council and my fellow citizens in demanding that the State spend its transportation dollars on cleaner, more energy efficient transportation programs that will reduce air pollution and climate change, while providing jobs for Indiana citizens.

I reject the State's plans to spend over $1 billion on a new Indianapolis-to-Evansville Highway, which will save only 8 minutes in travel time, and was found by an independent government study to be a waste of our tax dollars.

I support the JOBS AND ENVIRONMENT TRANSPORTATION PLAN that: calls for repairing existing roads; protects our natural heritage and reduces air pollution; uses existing funds for improved mass transit including passenger trains; and allows for "town hall" discussions at public transportation project hearings.

With my signature and donation I join the Hoosier Environmental Council and my fellow citizens in demanding that the State spend its transportation dollars on cleaner, more energy efficient transportation programs that will reduce air pollution and climate change, while providing jobs for Indiana citizens.

I reject the State's plans to spend over $1 billion on a new Indianapolis-to-Evansville Highway, which will save only 8 minutes in travel time, and was found by an independent government study to be a waste of our tax dollars.

I support the JOBS AND ENVIRONMENT TRANSPORTATION PLAN that: calls for repairing existing roads; protects our natural heritage and reduces air pollution; uses existing funds for improved mass transit including passenger trains; and allows for "town hall" discussions at public transportation project hearings.

HECAF
Hoosier Environmental Council

TO: **GOVERNOR EVAN BAYH and OTHER ELECTED OFFICIALS**

FROM: **THE CITIZENS OF INDIANA**

With my signature and donation I join the Hoosier Environmental Council and my fellow citizens in demanding that the State spend its transportation dollars on cleaner, more energy efficient transportation programs that will reduce air pollution and climate change, while providing jobs for Indiana citizens.

I reject the State's plans to spend over $1 billion on a new Indianapolis-to-Evansville Highway, which will save only 8 minutes in travel time, and was found by an independent government study to be a waste of our tax dollars.

I support the JOBS AND ENVIRONMENT TRANSPORTATION PLAN that: calls for repairing existing roads; protects our natural heritage and reduces air pollution; uses existing funds for improved mass transit including passenger trains; and allows for "town hall" discussions at public transportation project hearings.

I support the JOBS AND ENVIRONMENT TRANSPORTATION PLAN that: calls for repairing existing roads; protects our natural heritage and reduces air pollution; uses existing funds for improved mass transit including passenger trains; and allows for "town hall" discussions at public transportation project hearings.

For HECAF SCOTT HORNBEAK

City BREMEN Date 11-4-93

HECAF Hoosier Environmental Council

TO: **GOVERNOR EVAN BAYH and OTHER ELECTED OFFICIALS**

FROM: **THE CITIZENS OF INDIANA**

With my signature and donation I join the Hoosier Environmental Council and my fellow citizens in demanding that the State spend its transportation dollars on cleaner, more energy efficient transportation programs that will reduce air pollution and climate change, while providing jobs for Indiana citizens.

I reject the State's plans to spend over $1 billion on a new Indianapolis-to-Evansville Highway, which will save only 8 minutes in travel time, and was found by an independent government study to be a waste of our tax dollars.

I support the JOBS AND ENVIRONMENT TRANSPORTATION PLAN that: calls for repairing existing roads; protects our natural heritage and reduces air pollution; uses existing funds for improved mass transit including passenger trains; and allows for "town hall" discussions at public transportation project hearings.
