

## Growth and Development

The north and west sides of North Vernon are expected to experience the most growth in the next 20 years.

## Planning

Improvements of US 50 are necessary to maintain consistency with statewide and regional transportation plans.

An improved transportation network is required to meet the accessibility demands of new employment and residential and economic development.

Both the INDOT 2030 Long Range Transportation Plan and the Jennings County Comprehensive Plan identify improvements along the US 50 corridor as vital to statewide and regional mobility.
