

ACT NOW!

To comply with the law

Indiana law requires that all INPRS (PERF and TRF) employers submit wages and contributions electronically and on a payroll basis. To accomplish this, the pension system will provide a new Employer Reporting & Maintenance system that all employers will be required to use.

Use of this system will be mandatory starting in April, 2012.

This may require modification of your existing data files. And, it may require you to work with your IT and payroll staff or vendors to be ready.

You'll need more information to be ready. Visit the forum here: <https://er.inprs.in.gov>.
