

First Responder Train-the-Trainer Instructor Course

May 12th-13th, 2015 Indiana Law Enforcement Academy

Traffic Incident Management Responder Training

Provided by the Federal Highway Administration in partnership with the Indiana Traffic Incident Management Effort (IN-TIME)

Faster, safer incident recovery depends on an integrated, well-trained responder corps.

Problem:

The impact of traffic incidents on highway operations, reliability, and safety is well known and alarming. About 25 percent of all delays are caused by traffic incidents. Congestion costs are counted in hundreds of billions of dollars and wasted fuel is measured in billions of gallons. **More importantly, traffic incidents pose a significant safety risk to both responders and travelers.** The likelihood of a secondary crash increases 2.8 % with each minute that an incident remains unresolved.

Clearing incident scenes quickly with a well-coordinated, multidisciplinary team of first responders and transportation personnel is an important means of reducing the risk of secondary crashes, congestion delays and First Responder struck-bys.

Response at National Level:

The Federal Highway Administration (FHWA) addressed the problem by developing training for responders. Through the second Strategic Highway Research Program (SHRP2), FHWA has facilitated the creation of a multidisciplinary **Traffic Incident Management (TIM) Responder Training**. The curriculum was developed **by** responder's **for** responder's and is based on best practices and standards of multiple responder disciplines. The training product is available in a 4-hour short course or 8 or 12hour courses. The 4 hour course is most often trained.

Training Plan:

The plan is for "volunteer responder instructors" to train responders at the regional level. The instructors will be educated through Train-the-Trainer (TtT) classes.

Train-the-Trainer Concept:

The train the trainer concept promotes the formation of a cadre of qualified volunteer "responder" instructors in each state. The **TIM First Responder TtT** class is delivered through interactive lessons, case study analysis, tabletop role-play and scenario, and field practicum. The TtT class is a 12-hour intensive course provided by master instructors certified by FHWA.

Recruitment of Indiana Instructors:

IN-TIME is recruiting responders from all disciplines and regions of Indiana to become instructors of the **TIM Responder Training** course. **Instructors should be willing to "Champion" TIM in their region and conduct a minimum of four 4-hour training sessions per year.**

Indiana TIM First Responder Train-the-Trainer instructor course:

Date: May 12-13, 2015
 Location: Indiana Law Enforcement Academy, Rooms 33A/33B
 Address: 5402 Sugar Grove Road, Plainfield, IN 46168
 Times: Tues. May 12 - 7:45 am to 4:30pm / Wed. May 13 - 8:00am to 12noon

Prerequisites for TtT instructor Course:

1. Participation in a **TIM Responder Training** class.
 To find upcoming training sessions go to www.training4intime.eventbrite.com
2. Signed Commitment form to train a minimum of 4 classes (*sent after registration*)

REGISTRATION:

Register for the “**Train-the-Trainer: National Traffic Incident Management First Responder Course**” at:

www.training4intime.eventbrite.com

Registration deadline: Friday, May 8, 2015

Registrants will receive a confirmation of registration by e-mail.

Questions:

If you have questions contact Tom Melville at tmelville11@gmail.com, 765-891-2668 or Karen Stippich at kstippich@dot.gov, 317-226-7122

Who benefits from the TIM Responder Training?

→ Law Enforcement	→ Dispatch
→ Fire and Rescue	→ Hazardous Material Mitigation professionals
→ Emergency Medical Services	→ Coroners and Medical Examiners
→ Towing and Recovery professionals	→ Transportation and Public Works Departments
→ <i>The Driving Public</i>	

Training Feedback - July 9 2014 – Whitley County

I would recommend this to others:

- Strongly agree- 100%

I gained an understanding of the need for coordinated incident management:

- Strongly agree-100%

I acquired knowledge of roadway safety and scene management methods:

- Strongly agree -100%
