- ① **Supply Chain Optimization**
 - From Requisition to Payment
 - Streamlined Process
 - Workflow Driven
- ① **Transparency and Visibility**
 - Spend Visibility
 - Process Compliance
 - Risk Mitigation
- ① **Management Reporting**
 - Performance
 - Forecasting
- ① **Program Management**
 - Supplier Performance
 - Client Initiatives

The dotStaff™ application is a highly configurable, web-based application accessed through a web browser, facilitating the end-to-end contingent labor process, including:

- A simple process for creating requisitions from templates or current requisitions
- Visibility of contractor information including resumes, skills match and bill rate
- Capture of time and expense data using our web-based application, 3rd party time/attendance systems, or suppliers may enter time on behalf of contractors
- Consolidated invoicing simplifies A/P processing
- Configurable workflows reflect business processes to increase compliance
- Ad hoc and standard reports, configurable dashboards and export capabilities
- Metric Tracking, including supplier fulfillment ratio and response time and program initiatives such as diversity spending

dotStaff™ enables organizations to automate, manage and optimize the contingent workforce process. Using the dotStaff™ platform, managers and suppliers are able to work together as partners creating a competitive, collaborative program.
