FOR IMMEDIATE RELEASE -- Irvine, CA (January 22, 2009) – Arbonne International, LLC (“Arbonne”) today announced the voluntary recall of certain lots of its Arbonne Figure 8 Peanut Butter Chews because the products contain peanut butter that was manufactured by Peanut Corporation of America (PCA), which is the focus of an ongoing Salmonella investigation. Salmonella is an organism which can cause serious and sometimes fatal infections in young children, frail or elderly people, and others with weakened immune systems. Healthy persons infected with Salmonella often experience fever, diarrhea (which may be bloody), nausea, vomiting and abdominal pain. In rare circumstances, infection with Salmonella can result in the organism getting into the bloodstream and producing more severe illnesses such as arterial infections (i.e., infected aneurysms), endocarditis and arthritis. For more information on Salmonella bacteria, please visit the Centers for Disease Control and Prevention's Website at www.cdc.gov.

Consumers with questions or concerns about their health or observe symptoms should contact their health care provider or go to a hospital.
