TO: All Local Health Departments
Attn: Chief Food Specialist
FROM: A. Scott Gilliam; MBA, CP-FS
Manager, Food Protection Program
SUBJECT: ISS Research- Peanut Recall

SUGGESTED

ACTION: Peanut Recall; Due to Salmonella typhimurium; Recommend notification of affected stores via phone, fax or e-mail.

From the information provided by FDA, the recalled products were distributed in the State of Indiana. The recalled products were sold in grocery, health food, nutrition, smoothie and online stores, as well as in gyms. The listed products were distributed nationwide to retail stores. Detail information is not available at this time. In addition, if any recalled product is found, please notify this office at 317-233-7360.

ISS Research® Announces Voluntary Recall of OhYeah!® Bars Due To Potential Health Risk

Contact:
ISS Research
LLC www.issresearch.com

FOR IMMEDIATE RELEASE -- Charlotte, North Carolina – Feb. 3, 2009 – ISS Research®, LLC announced today that it is initiating a voluntary recall of the identified lots of OhYeah!® bars in response to the widened recall involving all peanut products produced by Peanut Corporation of America's Blakely facility since 2007.

The specified OhYeah!® bars are being recalled out of an abundance of caution because they contain roasted peanuts manufactured by Peanut Corporation of America (PCA). Independent laboratory testing has indicated no salmonella contamination in any OhYeah!® products. PCA is the focus of an investigation by the U.S. Food & Drug Administration (FDA) concerning a recent Salmonella outbreak thought to be caused by tainted peanut products.

No illnesses have been reported to date in connection to these products. No other ISS Research® or OhYeah!® flavors, brands or products are included in this recall.

Salmonella is an organism which can cause serious and sometimes fatal infections in young children, frail or elderly people, and others with weakened immune systems. Healthy persons infected with Salmonella often experience fever, diarrhea (which may be bloody), nausea, vomiting and abdominal pain. In rare circumstances, infection with Salmonella can result in the organism getting into the bloodstream and producing more severe illnesses such as arterial infections

(i.e., infected aneurysms), endocarditis and arthritis. For more information regarding Salmonella, please visit the Centers for Disease Control and Prevention's Website at www.cdc.gov.

The products impacted by the voluntary recall are as follows:
