

## WIC Vendor Stocking Requirements Rule

### Summary of Comments and Responses

#### Comment #1 from Tracy Smith:

I recently came across the proposed rule for minimum stock requirements of WIC foods and would like to make a comment regarding the minimum stock amounts for formula. The minimum stocking requirements set for vendors should be less for the WIC contract formula products that do not sell as quickly. As a Local Agency Coordinator, I know that the demands on our vendors are important for participants but feel that the inventory proposed is inappropriate. Please contact me for further explanation.

#### ISDH Response:

Ms. Smith has a valid argument and ISDH agrees with her recommendation. The stocking requirements for infant formula will be changed.
