**FOR IMMEDIATE RELEASE** - March 25, 2010 - ALAMEDA, CA – Modern Products, Inc. is initiating a recall of products manufactured with HVP (Hydrolyzed Vegetable Protein) supplied by Basic Food Flavors of Las Vegas, Nevada, because the ingredient has the potential to be contaminated with Salmonella.

"Consumption of products containing *Salmonella* can cause serious and sometimes fatal infections in young children, frail or elderly people, and others with weakened immune systems. Healthy persons infected with *Salmonella* often experience fever, diarrhea (which may be bloody), nausea, vomiting and abdominal pain. In rare circumstances, infection with *Salmonella* can result in the organism getting into the bloodstream and producing more severe illnesses such as arterial infections (i.e., infected aneurysms) endocarditis and arthritis."

To date, no illnesses have been associated with any Modern Products seasonings. In addition, random samples covering all HVP batches of concern were sent to an independent laboratory for testing and all results came back negative, but to be safe, FDA's recommendation to recall product is being followed.

Recalled products were distributed nationwide and sold in retail stores. The following products are being recalled:
