

THE NATIONAL HIV/AIDS STRATEGY FOR THE UNITED STATES

Presented by:
Cena N.F. Bain
Program Director

WHAT YOU WILL LEARN

- Strategy Overview
- Role of states and local governments in implementing the Plan
 - Purpose of the plan
- Next Steps for Indiana
 - How our state plan measures up to the NHAS

STRATEGY OVERVIEW

The strategy is divided into 4 components:

1. Reduce New Infections
 2. Increase access to Care and Improve Health Outcomes
 3. Reduce HIV Related Disparities and Health Inequalities
 4. Achieve a more coordinated national response to the HIV epidemic in the US.
- 

At a glance, lowering new infections

- Intensify HIV prevention efforts in the communities where HIV is most heavily concentrated.
 - Expand targeted efforts to prevent HIV infection using a combination of effective, evidence-based approaches.
 - Educate all Americans about the threat of HIV and how to prevent it.
- 

REDUCING NEW HIV INFECTIONS-*ANTICIPATED RESULTS*

By 2015:

1. Lower the annual number of new infections by 25% (from 56,300 to 42,225);
 2. Reduce the HIV transmission rate, which is a measure of annual transmissions in relation to the number of people living with HIV, by 30%; and
 3. Increase from 79% to 90% the percentage of people living with HIV who are aware of their serostatus.
- 

At a glance: Increasing Access to Care and Improving Health Outcomes for People Living with HIV

- **Establish a seamless system to immediately link people to continuous and coordinated quality care when they learn they are infected with HIV.**
- **Take deliberate steps to increase the number and diversity of available providers of clinical care and related services for people living with HIV.**
- **Support people living with HIV with co-occurring health conditions and those who have challenges meeting their basic needs such as housing.**

Increasing Access to Care and Improving Health Outcomes for People Living with HIV- *Anticipated Results.*

By 2015:

- 1. Increase the proportion of newly diagnosed patients linked to clinical care within three months of their HIV diagnosis from 65% to 85%.**
- 2. Increase the proportion of Ryan White HIV/AIDS program clients who are in continuous care from 73% to 80%; and**
- 3. Increase the percentage of Ryan White HIV/AIDS program clients with permanent housing from 82% to 86%.**

At-a-glance: Reducing HIV-Related Disparities and Health Inequities

- **Reduce HIV related mortality in communities at high risk for HIV infection.**
 - **Adopt community-level approaches to reduce HIV infection in high-risk communities.**
 - **Reduce stigma and discrimination against people living with HIV.**
- 

Reducing HIV-Related Disparities and Health Inequities- *Anticipated Results*

By 2015:

- 1. Increase the proportion of HIV-positive gay and bisexual men with undetectable viral load by 20%.**
 - 2. Increase the proportion of HIV-positive African-Americans with undetectable viral load by 20%; and**
 - 3. Increase the proportion of HIV-positive Latinos with undetectable viral load by 20%.**
- 

At-a-glance: Achieving a More Coordinated National Response to the HIV Epidemic

- **Increase the coordination of HIV programs across the Federal Government and between Federal Agencies and State, Territorial, and local governments.**
 - **Develop improved mechanisms to monitor and report progress toward achieving national goals.**
- 

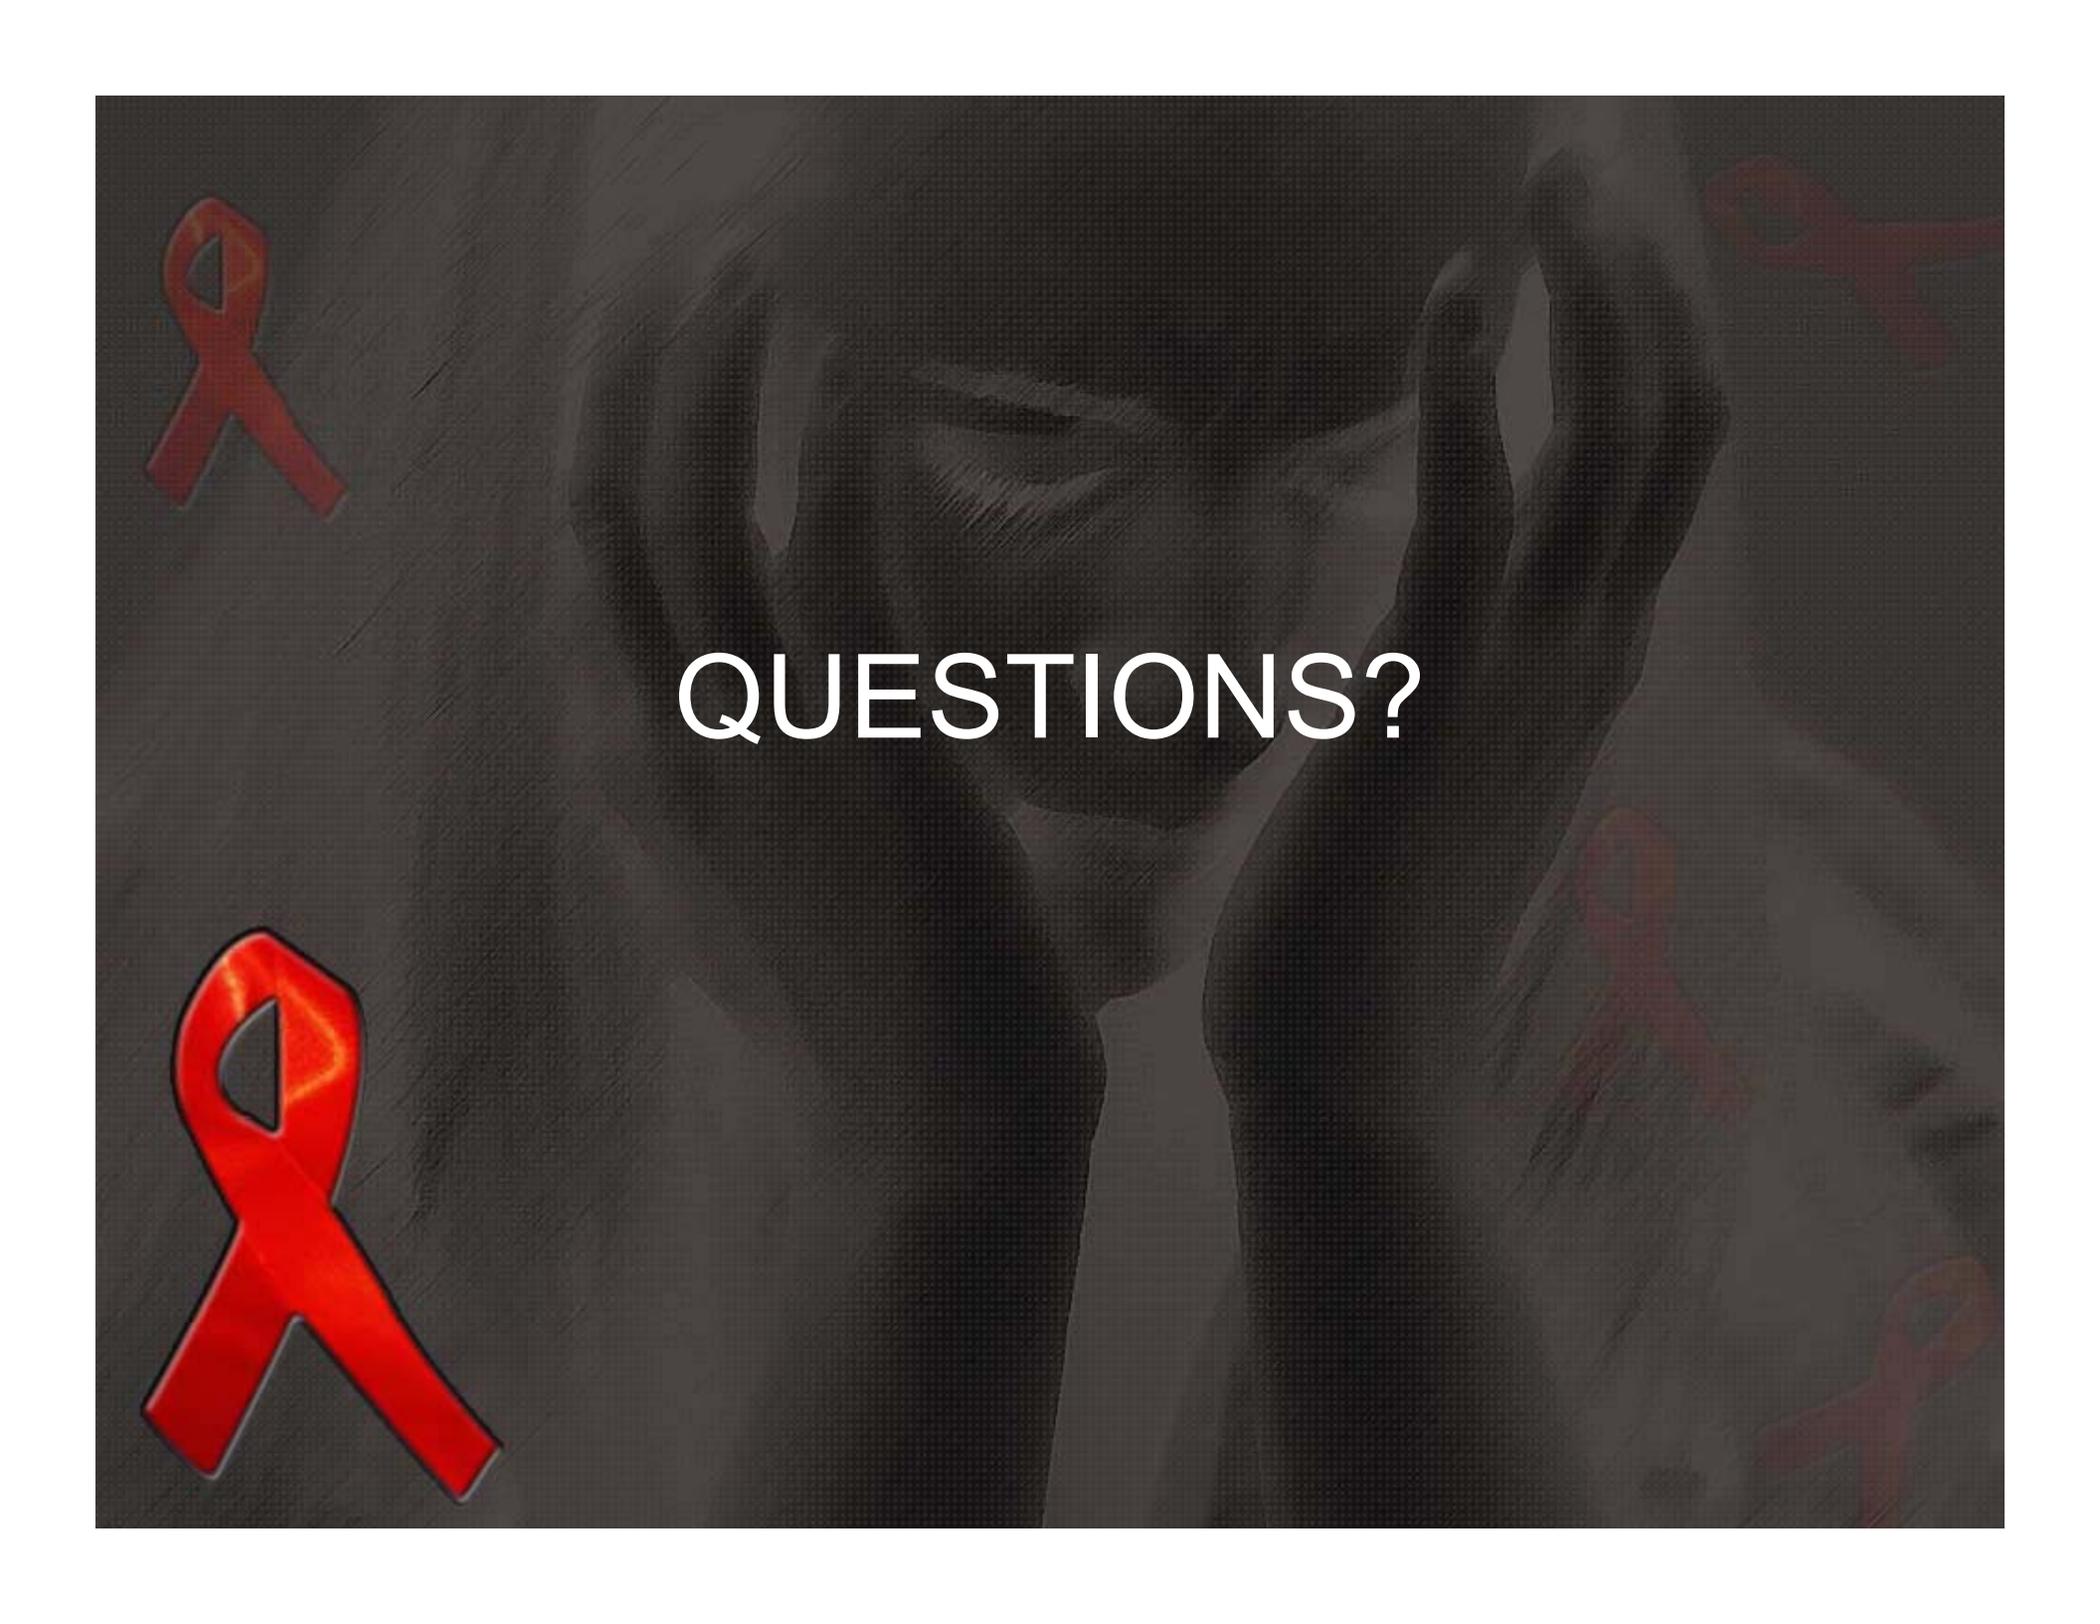

Who are the key partners in implementing this plan?

- **Federal Departments:**
 - **Health and Human Services (HHS)**
 - **Office of the Secretary (OS)**
 - **Centers for Disease Control and Prevention (CDC)**
 - **Substance Abuse and Mental Health Services Administration (SAMHSA)**
 - **Health Resources and Service Administration (HRSA)**
 - **US Housing for Urban Development (HUD)**
- **State and Local Governments**
- **Nongovernmental Partners**
- **The Presidential Advisory Council on HIV/AIDS (PACHA)**

Planning Prevention in Indiana

- Priority Populations
 - Interventions
 - Services
 - STD
 - Viral Loads/CD4 counts
