Appendix C: Map of Indiana

HIV Prevention Community Planning Regional Map

9/2002

Appendix D: Ethnic and Racial Definitions

Categories developed in 1997 by the Office of Management and Budget (OMB) that are used to describe groups to which individuals belong, identify with, or belong in the eyes of the community. The categories do not denote scientific definitions of anthropological origins. The designations are used to categorize U.S. citizens, resident aliens, and other eligible non-citizens.

Individuals are asked to first designate ethnicity as:

- [Hispanic or Latino](#): A person of Cuban, Mexican, Puerto Rican, South or Central American, or other Spanish culture or origin, regardless of race.
- Not Hispanic or Latino

Second, individuals are asked to indicate all races that apply among the following:

- [American Indian or Alaska Native](#): A person having origins in any of the original peoples of North and South America (including Central America) who maintains cultural identification through tribal affiliation or community attachment
- [Asian](#): A person having origins in any of the original peoples of the Far East, Southeast Asia, or the Indian Subcontinent, including, for example, Cambodia, China, India, Japan, Korea, Malaysia, Pakistan, the Philippine Islands, Thailand, and Vietnam.
- [Black or African American](#): A person having origins in any of the black racial groups of Africa.
- [Native Hawaiian or Other Pacific Islander](#): A person having origins in any of the original peoples of Hawaii, Guam, Samoa, or other Pacific Islands.
- [White](#): A person having origins in any of the original peoples of Europe, the Middle East, or North Africa.
