Leadership Conference

Registration is now open for the upcoming ISDH Healthcare Leadership Conference. The Indiana State Department of Health (ISDH) is leading a state collaborative initiative to prevent healthcare associated infections. The Indiana Healthcare Associated Infection Initiative is a two-year initiative to promote the prevention of healthcare associated infections. The ISDH Healthcare Leadership Conference scheduled for March 2, 2010, will focus on healthcare associated infections and serve as a kick-off for the Initiative.

Pioneer Network Dining Symposium Background Paper

The Food and Dining Side of the Culture Change Movement: Identifying Barriers and Potential Solutions to Furthering Innovation in Nursing Homes

Dining Symposium Background Paper Now Available for Download

Prepared by Carmen Bowman, MHS under contract with the Centers for Medicare & Medicaid Services (CMS), The Food and Dining Side of the Culture Change Movement: Identifying Barriers and Potential Solutions to furthering Innovation in Nursing Homes is intended to provide

the history of the culture change movement as it pertains to food and dining, including current research regarding food and dining issues and innovations. Also included is a review of relevant federal long term care regulations, the Food and Drug Administration Food Code and the Center for Disease Control and Prevention infection control guidelines affecting nursing homes' food service.

"The issues surrounding new and innovative ways of serving food in the nursing home weave in and out of regulatory requirements. Thus, both the issues as well as the regulations are presented here together intertwined along with highlighting what is missing and recommending what might be helpful." --Carmen Bowman, Author

Don't miss this opportunity to download the background paper for *Creating Home in the Nursing Home II -- A National Symposium on Culture Change and the Food and Dining Requirements*. Even if you can't attend, this resource will provide you with a wealth of information about dining innovations and culture change.

Recalls

Cardiac Science Automated External Defibrillators (Powerheart, CardioVive, CardioLife models)

[Posted 02/09/2010]: Cardiac Science Corporation and FDA notified healthcare professionals and consumers of a recall because the automated external defibrillator (AED) may not be able to deliver therapy during a cardiac resuscitation attempt, which may lead to serious adverse events or death. These AEDs were manufactured in a way that makes them potentially susceptible to failure under certain conditions. Each of the approximately 12,200 devices affected in this recall can be confirmed at the Cardiac Science Web site, www.cardiacscience.com/AED195. The affected AEDs were manufactured or serviced between October 19, 2009 and January 15, 2010 and include the following models - Powerheart 9300A, 9300E, 9300P, 9390A, 9390E, CardioVive 92532 and CardioLife 9200G and 9231. Each affected AED should immediately be removed from service since it may not deliver the expected therapy. From FDA Web site: [Cardiac Science Automated External Defibrillators \(Powerheart, CardioVive, CardioLife models\): Recall](#)

BD Q-Syte Luer Access Devices: Recall

BD Q-Syte Luer Access Devices

BD Nexiva Closed IV Catheter Systems

Acacia IV Extension Sets with BD Q-Syte Luer Access Device

[Posted 02/09/2010] BD, Acacia Inc. (known as MPS Acacia), and FDA notified healthcare professionals of the recall of certain lots of these devices. The BD Q-Syte Luer Access Device is a needleless valve manufactured by BD, intended for use with other infusion therapy products in the administration of fluids into the intravenous system. Use of the recalled devices may cause an air embolism or leakage of blood or therapeutic product which may result in serious injury or death. The REF/catalog and lot numbers which were sold in the US are noted in the firm's press release. The affected lots were distributed from November 2008 through November 2009. From FDA Web site: [BD Q-Syte Luer Access Devices: Recall](#)

Nipro GlucoPro Insulin Syringes: Recall

Nationwide recall of all GlucoPro Insulin Syringes. These syringes may have needles that detach from the syringe. If the needle becomes detached from the syringe during use, it can become stuck in the

insulin vial, push back into the syringe, or remain in the skin after injection. This recall includes all product codes and lot numbers with expiration dates before 2011-11 (November 1, 2011). Product was distributed nationwide, including Puerto Rico. Consumers who have GlucoPro Insulin Syringes should stop using and return them to point of sale for reimbursement. Read the complete MedWatch 2010 Safety summary, including a link to the firm press release: [Nipro GlucoPro Insulin Syringes: Recall](#)

Any adverse events that may be related to use should be reported to the FDA's MedWatch Safety Information and Adverse Event Reporting Program online [at www.fda.gov/MedWatch/report.htm], by phone 1-800-332-1088, or by returning the postage-paid FDA form 3500 [which may be downloaded from the [MedWatch "Download Forms"](#) page] by mail [to address on the pre-addressed form] or fax [1-800-FDA-0178].

State Laboratory Newsletter

For those of you with an interest in laboratory issues, the Indiana State Department of Health Laboratory periodically publishes a newsletter on laboratory activities. The most recent issue of *The LAByrinth*, ISDH Laboratory Newsletter, is available at <http://www.in.gov/isdh/24567.htm>.

I look forward to seeing you at the March 2, 2010 ISDH Healthcare Leadership Conference as we kick off the Indiana Healthcare Associated Infection Initiative.

Terry Whitson
Assistant Commissioner
Indiana State Department of Health
