TITLE

(X6) DATE

Any deficiency statement ending with an asterisk (*) denotes a deficiency which the institution may be excused from correcting providing it is determined that other safeguards provide sufficient protection to the patients. (see instructions.) Except for nursing homes, the findings stated above are disclosable 90 days following the date of survey whether or not a plan of correction is provided. For nursing homes, the above findings and plans of correction are disclosable 14 days following the date these documents are made available to the facility. If deficiencies are cited, an approved plan of correction is requisite to continued program participation.

	<p>diet as ordered, notify physician and family as needed, offer substitutions if indicated, Registered Dietician as needed, and snacks upon request.</p> <p>The weights summary indicated, on 2/9/22, the resident weighed 128.5 lbs.</p> <p>On 3/31/22, the resident weighed 115.8 lbs, which was a 9.88% weight loss from her prior weight on 2/9/22.</p> <p>On 5/23/22, the resident weighed 104.2 lbs, which was a 18.91% loss from her weight on 2/9/22, and a 10.02% weight loss from her weight on 3/31/22.</p> <p>The clinical record lacked documentation of any revision to the resident's care plan to address her actual weight loss.</p> <p>4. The clinical record for Resident F was reviewed on 5/25/22, at 1:36 p.m. The diagnoses included, but were not limited to, irritable bowel syndrome with constipation, dementia, gastro-esophageal reflux disease (GERD), type 2 diabetes mellitus, dysphagia, cognitive communication deficit, aphasia, weakness, vitamin deficiency, and chronic fatigue.</p> <p>The Quarterly MDS assessment, dated 3/31/22, indicated the resident was moderately cognitively impaired and she had a weight loss of 5% or more within the last month or 10% or more within the last 6 months without a physician prescribed weight loss program.</p> <p>The Quarterly Nutritional Risk Review, dated 1/26/22, indicated the resident had no weight loss and was stable at 181 lbs with a BMI of 31</p>		<p><i>housekeeping staff</i>). The Director of Nursing/Designated Administrative Nursing staff will complete care plan and weight loss reviews using the Care Plan and Nutritional Weight Loss Quality Review Audit Tool, to validate that resident who are identified as having weight loss have accurate nutritional assessments and care plan interventions to meet residents individual needs related to weight loss. Any concerns identified during the quality reviews will be addressed at the time of the review and additional education will be completed at that time. The Care Plan and Nutritional Weight Loss Quality Review Audit will be completed once a week for all identified residents "with 5 % weight loss in 30 days, 7.5% weight loss in 90 days and 10% weight loss in 180days" for twelve weeks. These audits will include all residents identified with triggered weight loss. The results of the Audits will be submitted to the Quality Assurance Performance Improvement Committee monthly. The QAPI Committee will determine if additional education or competencies are required, based on the compliance reported from the Quality Reviews. Following the initial twelve-week review, Audits will continue twice a month for all at risk residents until 100%</p>

	<p>she was working on revamping the shower schedules to fit the resident's preferences a little bit better. It was a lengthy process to make it all work. She was not aware of any issues with showers being completed, but had been talking to staff about filling out the shower sheets. If a resident refused their shower she would like them to offer it three different times, have the nurse go in if the resident refused, and offer a shower or bed bath. If they still refused with the nurse then she would like them to try to get anything, a partial bed bath or something. She would really like them to notify family if they continued to refuse. The current shower schedule had most residents getting a bath twice weekly, and some three times a week. Staff should be documenting it on their shower days. She was trying to start a process and get things put into place and was lucky she found the shower sheets that she did, because there were piles everywhere. She had seen Resident B's shower sheets reflected he only had one shower in 30 days.</p> <p>The most current Bathing policy, provided on 5/25/22 at 1:41 p.m. by the Executive Director, included, but was not limited to, "... Policy: To cleanse the skin and to promote circulation... Procedure... 1. Verify bath schedule or need... Bed Bath... Complete Bath- Involves washing resident's entire body... Partial Bath- Involves face, hands, underarms, perineum, back and buttocks (assistance as needed)..."</p> <p>This Federal tag relates to Complaints IN00377396, IN00377613, and IN00377290.</p> <p>3.1-38(a)(2)</p>

	<p>The clinical record lacked documentation of any nutritional assessments or interventions until 5/4/22.</p> <p>The SWAT (Skin and Weight Assessment Team) note for weight loss, dated 5/4/22, indicated the resident had a 5% weight change. The resident's diet was regular pureed with thin liquids. No new nutritional interventions were indicated aside from continue to monitor. Recommendations indicated to continue weekly weights.</p> <p>The Quarterly Nutritional Risk Review, dated 5/4/22, indicated the resident had a weight loss of more than 5% in the last month or 10% in the last six months and was not on a prescribed weight loss regimen. Her diet order was changed to pureed, however no further nutritional interventions were implemented at the time.</p> <p>During an interview, on 5/25/22 at 12:50 p.m., the RD indicated there was nothing on Resident F between December of 2021 and April of 2022. In December 2021, she had an annual assessment, but then she started that weight loss in December and further on until her present weight. She didn't see anything in between December and when she started as the RD in April. In April the resident's intake was slightly decreased, however she declined any additional interventions at that time. On 5/4/22 she saw the resident again and speech therapy changed her diet to pureed which might make it easier for her to eat, and since then her weight had come up. The resident should have had an assessment probably in January. Speech changed her diet to a puree diet.</p> <p>3. The clinical record was reviewed for Resident H on 5/25/21, at 9:48 a.m., The diagnoses included, but were not limited to, dementia, lobar</p>		<p>Participants were required to complete a Post test for competency.</p> <p>On 6/1/22, the Executive Director and Director of Nursing reviewed the procedure for "S.W.A.T (Skin and weight loss meeting) "and found the policy to be acceptable. The intradisciplinary team is responsible for completing weekly wound and weight meetings. This team is lead by the Dietitian or Administrative Nursing staff each week.</p> <p>On 6/1/22 Residents with triggered weight loss were reviewed by the MDS Coordinator to determine if any of the identified residents required a significant change MDS.</p> <p>(Facility Intradisciplinary team members will not be allowed to work after the date of compliance unless they have successfully completed all assigned education).</p> <p>p paraid="1579190430" paraeid="{932541f0-8523-4168-b</p>

	<p>liquids with an inner lip plate and lidded cup. Oral intake of 76% providing 1,900 kcal, 72 g (grams) and protein + 35%. Bedtime snacks offered. The resident was reweighed to confirm a weight loss of -10& x 90 days and -12.5 x 180 days.</p> <p>4. The clinical record was reviewed for Resident B, on 5/24/21 at 10:48 a.m., The diagnoses included, but were not limited to, malignant neoplasm of bronchus and lung, dementia, schizoaffective disorder, liver disease, acute kidney disease, and chronic obstructive pulmonary disease</p> <p>The Quarterly MDS (Minimum Data Set) assessment, dated 2/2/22, indicated the resident was severely cognitively impaired. He required total dependence with bathing and personal hygiene with the assistance of one staff member.</p> <p>The physician's order indicated a frozen nutritional treat with a start date of 2/3/22. General diet mechanical soft texture and thin consistency with a start date of 4/27/22. Health shake three times a day between meals and at bedtime with a start date of 2/3/22. Double protein three times a day for weight monitoring with a start date of 3/18/22. Med pass 2.0 90 ml (milliliter) three times day for supplement with a start date of 1/26/22. Mirtazpine 15 mg (milligram) by mouth at bedtime for appetite stimulant with a start date of 2/24/22.</p> <p>The care plan, dated 4/20/21, indicated Resident B was at risk for weight loss related to decline in overall health related to lung cancer and poor intakes. The interventions include, but were not limited to, diet as ordered, notify physician and family as needed, offer substitutions if indicated,</p>		<p>during the quality reviews will be addressed at the time of the review and additional education will be completed at that time. The Care Plan and Nutritional Weight Loss Quality Review Audit will be completed once a week for all identified residents "with 5 % weight loss in 30 days, 7.5% weight loss in 90 days and 10% weight loss in 180days" for twelve weeks. These audits will include all residents identified with triggered weight loss. The results of the Audits will be submitted to the Quality Assurance Performance Improvement Committee monthly. The QAPI Committee will determine if additional education or competencies are required, based on the compliance reported from the Quality Reviews. Following the initial twelve-week review, Audits will continue twice a month for all at risk residents until 100% compliance has been determined by the QAPI committee. (A minimum of seven months must be completed).</p>

	<p>weight change in 30 days the computer would trigger the weight loss and management would be informed.</p> <p>During an interview on 5/25/22 at 11:55 a.m., RD indicated if there was a significant weight loss a nutritional assessment should have been done. The resident would be added to the SWAT management team. Meals would be monitored, and weights weekly. The nutritional assessments would be done quarterly unless there was a change in the resident's weight status. Resident H should have had a nutritional assessment and follow ups when there was a significant loss of 5% in 30 days, 7.5% in 90 days and 10% weight loss in 180 days. She should have had a nutritional assessment and interventions added in February.</p> <p>The most current S.W.A.T. Program (Skin and Weight Assessment Team) policy, provided on 5/25/22 at 1:37 p.m., by the Executive Director, included, but was not limited to, "... It is the policy of this facility to assess the nutritional status of each resident. SWAT is designed to aggressively review and address those residents exhibiting significant weight change or skin breakdown. These residents will be monitored through this team effort on a weekly basis, involving all applicable disciplines to best cater to the improvement of the resident's nutritional status... This team will appropriately determine clinical and dietary interventions to best address each resident's needs... Indicators determining implementation of SWAT monitoring... 5% or more weight change (undesirable) in 30 days... 10% or more weight change (undesirable) in 180 days..."</p> <p>This Federal tag relates to Complaint</p>
