TITLE

(X6) DATE

Any deficiency statement ending with an asterisk (*) denotes a deficiency which the institution may be excused from correcting providing it is determined that other safeguards provide sufficient protection to the patients. (see instructions.) Except for nursing homes, the findings stated above are disclosable 90 days following the date of survey whether or not a plan of correction is provided. For nursing homes, the above findings and plans of correction are disclosable 14 days following the date these documents are made available to the facility. If deficiencies are cited, an approved plan of correction is requisite to continued program participation.

	<p>(Resident name) was not observed reaching or grabbing anything while in the dining room. Review of medical records from the Emergency Room showed that it was not certain if resident choked on food. Stroke could be a factor. Conclusion: chest X-ray did not show any airway obstructions and neither any resistance nor obstructions when e-tube (endotracheal tube) was inserted."</p> <p>The investigation with staff interviews were reviewed. RN #1 indicated the following: the resident was sitting between two tables. There was one nurse and one CNA in the dining room. CNA #4 called the nurse over to check Resident #B out. The resident was spitting food out of his mouth, his color was fine. The nurse removed food from his mouth which was a piece of bread/bun. RN #1 took the resident out of the dining room and to his room, the resident was gagging. RN #1 went to get a suction machine. The RN placed the resident at the nurse's station and his color was turning. CNA #6 went to see if the resident was a code. CNA #6 indicated he was CPR. CNA #7 performed the Heimlich maneuver on the resident. RN #1 and CNA #7 laid the resident on the floor. RN #1 could not get the ambu bag to work from the crash cart and unable to hook up the oxygen</p>

	<p>from the tank on the crash cart. CNA #6 started manual breathing. RN #1 and LPN #3 neither nurse knew how to call the Code Blue over head. CNA #6 and CNA#7 continued CPR and 911 was called at 6:19 p.m.</p> <p>CNA #6's interview indicated she had seen Resident #B at the nurses's station. CNA #7 and LPN #3 performed the Heimlich on the resident. The resident started to turn blue. The resident was placed on the floor in the hallway and her and CNA #7 began CPR. A finger sweep was performed and a packet of butter was removed from his mouth. CNA #6 indicated no Code Blue was called over head. Both CNAs performed CPR for the resident.</p> <p>CNA #5's interview indicated the resident took two bites of his food and gagged. He was in the dining room. No condiments were on the table when he was at dinner. His tray was out of reach when served.</p> <p>LPN #3's interview indicated the resident was removed by RN #1 from dining room. Noted he had difficulty breathing. The Heimlich maneuver was done by CNA #7. LPN #3 got the crash cart. RN #1 was looking for the ambu bag and could not find masks. CNA #6 called</p>

	<p>911. CNA #6 did a finger sweep and removed a packet of butter. CNA #6 and CNA #7 performed CPR.</p> <p>Interview with the Director of Nursing on 2/24/15 at 1:58 p.m., indicated she was not on duty at the time of the incident. She indicated the Assistant Director of Nursing took the staff statements. She further indicated CNA #6 did check the resident's code status before calling 911. The DoN indicated the Code Blue was not called overhead by the staff involved. She indicated she could not confirm the statement related to the ambu bag, whether it didn't work or RN #1 didn't know how to use the bag. She indicated she had not investigated that. The DoN indicated there were problems with the crash cart. She indicated the oxygen tank was empty and not sure if there was an ambu bag or not on the cart. The DoN indicated the CNAs performed the CPR as RN #1 was overseeing them. She indicated after the incident, she had implemented a policy for the crash carts to be checked every night on the midnight shift and then weekly by the Medical Record staff to ensure they were supplied and the oxygen tanks were filled. She indicated she did not do any additional inservicing on policies to staff in regards to responding to an emergency situation such as choking and when to</p>

	<p>and noted."</p> <p>The incident report form provided by the Director of Nursing was reviewed. The incident date was 2/3/15 at 6:00 p.m., with a follow up investigation dated 2/11/15. "Resident #C was in the dining room and was noted with her hand waving. The staff immediately responded to the resident and initiated the Heimlich maneuver. RN was present in the dining room and assessed. Resident was noted to have respiration, breathing through her nose with nasal secretions noted. Resident was also noted to have jaw and mouth clinched at this time. RN directed care and resident was transported to her room for further care. Resident was placed on her side. Resident's mouth was unclenched at this time and the nurse was able to visualize food substance near front of mouth. The nurse performed a finger sweep and retrieved the particle of food. Resident was responsive and able to answer questions, such as the nurse's name and her place of residence correctly. Resident was suctioned and retrieved a lot of secretions from oral cavity no other food particles obtained. Resident was conversing with staff without any distress noted at this time. Resident then repeated that she was tired three times and then started shaking, the jaw tightened and the eyes were focused</p>

	"On 11/27/14 at 1 p.m., this resident (Resident #B) was observed with productive cough with no shortness of breath. Physician made aware orders received for breathing treatment. Oxygen saturations remains between 92-95% on room air. No distress noted. Was sitting near nurses station without discomfort. Vital signs remain stable. Resident assisted to dining room just before 6 p.m. with staff member as per care plan to prevent resident grabbing at objects near him. He was placed at table but meal not within reach. CNA confirmed correct diet of mechanical soft was provided to resident. At 6:15 p.m. CNA #5 called to nurse to check on (Resident name) since he was observed having difficulty swallowing his food. The nurse assessed the resident and instructed him to spit food out. Resident removed from dining room and placed by nurses station where nurse assessed and remained with resident. Resident was noted to have color change and breathing difficulties. Staff proceeded to do Heimlich maneuver, but resident eventually became unresponsive, resident placed on floor and CPR initiated, as food in mouth visualized staff did mouth sweep to remove visible food. 911 called. All staff that was interviewed confirmed that (Resident name) was not observed reaching or grabbing anything while at

	<p>the dining room. Review of medical records from the Emergency Room showed that it was not certain if resident choked on food. Stroke could be a factor. Conclusion: chest X-ray did not show any airway obstructions and neither any resistance nor obstructions when e-tube (endotracheal) was inserted."</p> <p>The investigation with staff interviews were reviewed. RN #1 indicated the following: the resident was sitting between two tables. There was one nurse and one CNA in the dining room. CNA #4 called the nurse over to check Resident #B out. The resident was spitting food out of his mouth, his color was fine. The nurse removed food from his mouth which was a piece of bread/bun. RN #1 took the resident out of the dining room and to his room, the resident was gagging. RN #1 went to get a suction machine. The RN placed the resident at the nurse's station and his color was turning. RN #1 and CNA #7 laid the resident on the floor. CNA #6 and CNA#7 began CPR. and 911 was called.</p> <p>CNA #6's interview indicated she had seen Resident #B at the nurses's station. CNA #7 and LPN #3 performed the Heimlich on the resident. The resident started to turn blue. The resident was</p>

	<p>1. On 2/23/15 at 12:15 p.m., during the lunch meal, Dietary Cook #1 was observed serving food onto resident's plates behind a steam table in the main dining room. The Dietary Cook was observed wearing a pair of gloves to both of her hands. She was observed touching the utensils, the plates, bowls, and other items on the steam table with her gloved hands. Continued observation throughout the meal the Dietary Cook kept touching and pushing up her glasses on her face with her right gloved hand, at no time after she would touch her glasses, did she remove her gloves, wash hands, and apply new gloves. Further observation indicated a CNA had requested a hot dog from the cook for a resident. The Dietary Cook opened up the bag of hot dog buns with her gloved hands, removed a bun with a gloved hand opened it up and picked up a hot dog with the other gloved hand. She did not use utensils for any of the food. She then was asked by another staff member for a hamburger for one of the residents. She reached into the hamburger bun bag, grabbed the bun with the same pair of gloved hands and then picked up the hamburger with her gloved hands. She did not use any utensils again with the hamburger. Continued observation indicated she still had not changed her gloves and continued to touch the plates,</p>		<p><i>compliance.</i></p> <p><i>Preparation and/or execution of this plan of correction does not constitute admission or agreement by the provider of the truth of the facts alleged or conclusions set forth in the statement of deficiencies. 	<p>The CNA placed her gloved hand on the back of the resident's head, again, this was the same pair of gloves that were used for incontinence care. The CNA then put the resident's soiled clothes and brief in bags and removed her gloves and walked out of the resident's room. The CNA did not wash her hands or use alcohol gel prior to leaving the room.</p> <p>The CNA then proceeded to walk into the soiled utility room and disposed of one bag and walked immediately out. She then proceeded to the janitor closet and disposed of another bag. She walked immediately out of the room and then proceeded down the hall and rearranged items on the resident's over bed table in the hall. The CNA was not observed to wash her hands or use an alcohol gel.</p> <p>Interview with the Administrator and Nurse Consultant on 2/26/15 at 11:30 a.m., indicated the CNA should have changed her gloves after incontinence care was provided and that she should have washed her hands after removing her gloves prior to leaving the room.</p> <p>2. On 2/23/15 at 1:44 p.m., two plastic pink wash basins were stacked on top of each other and on the floor underneath the bathroom sink in Room 303. Two residents resided in this room.</p>		<p>2) How the facility identified other residents:</p> <p>Rounds were completed to determine if any other wash basins or urine collection devices were improperly stored and corrected if necessary. Any resident receiving ADL assistance could be affected. Staff (including CNA #3) was reeducated on the need to use proper hand washing and proper glove use, and proper storage of wash basins and urine collection devices</p> <p>3) Measures put into place/ System changes:</p> <p>Infection control audits will be performed at least 5 times per week on varied shifts to ensure proper hand washing, glove use, and equipment stored properly with oversight by DON or designee (see attached.)</p> <p>4) How the corrective actions will be monitored:</p>
