service areas. The Applicant also provided information indicating the type, means and location of service that the Applicant proposes to provide.

The Application was filed with the Commission on February 4, 2014. On February 25, 2014, Commission staff advised Applicant that its Application was deemed incomplete because it stated that information services would be offered, but the box to select information services was not properly checked. Commission staff subsequently corresponded with Applicant on April 14, 2014, and April 17, 2014, and explained each time that the Application remained incomplete for the reason stated above. On May 8, 2014, the Presiding Officer issued a Docket Entry to which Applicant responded on May 22, 2014. Finally, on June 2, 2014, Applicant amended and corrected its CTA Application to indicate that it plans to provide information services as well as telecommunications services and video services as described in the Application. Notice of the Application was posted to the Commission’s website. No timely written request for intervention or a hearing was made by any entity during the 30-day posting period, and the Commission has not, on its own motion, determined a need for a hearing in this Cause. Accordingly, no hearing is required in this Cause.

Therefore, based upon the information provided by the Applicant in its Application and subsequent amendment, the Commission finds that a Certificate of Territorial Authority for video, cable TV, Internet, and Voice Over Internet Protocol (“VOIP”) telephone services proposed to be offered within the service areas identified in the Application should be issued to the Applicant, consistent with and subject to the following findings.
