STATE OF INDIANA
INDIANA UTILITY REGULATORY COMMISSION

PETITION FOR APPROVAL OF RATE AND CHARGE DIFFERENCE BETWEEN
PROPERTY WITHIN AND PROPERTY OUTSIDE THE CORPORATE BOUNDARIES
OF ANDREWS {MUNICIPALITY}

Pursuant to Indiana Code § 8-1.5-3-8.3(c), Town of Andrews, {Municipality} by
counsel, requests the Director of the Water and Wastewater Division of the Indiana Utility
Regulatory Commission ("Commission") to approve the rate and charge difference between
property within and property outside the corporate boundaries of Town of Andrews {
Municipality}. In support of its request, Town of Andrews states:

1. The ordinance setting rates and charges for property within and property outside the
municipality's corporate boundaries took effect on (date) _____
2. Attached as "Exhibit A" is a copy of the Ordinance.
3. The works that is the subject of the Ordinance is a (select one):
 - a. water utility works _____
 - b. wastewater utility works ✓
 - c. both water and wastewater utility works _____
4. The percentage difference between the rates and charges imposed on users of the works
for service to property located outside the corporate boundaries of the municipality and to
property located within the corporate boundaries is Variable.
5. If the percentage difference in #4 above varies based upon the amount of consumption,
please provide a chart illustrating the various consumption levels in 1,000 gallon
increments with the corresponding percent surcharge and attach to this Petition.
6. Mike Harburg is counsel of record for Petitioners in this matter and is
duly authorized to accept service of papers in this cause on behalf of Petitioners.

Respectfully submitted,

Attorney for Petitioners

Verification

I, William K. Johnson, affirm under penalties for perjury that the foregoing representations are true to the best of my knowledge, information, and belief.

Signed William K. Johnson {Representative of Municipality}

2004-10

WASTEWATER SERVICE AGREEMENT

This Agreement is entered this 6 day of December, 2004, by and between Norwood Regional Water and Sewer District formed and operating pursuant to IC 13-26 ("District") and the Town of Andrews, Indiana, a municipal corporation ("Town"). The District and the Town shall each be considered a "Party" and shall collectively be referred to as the Parties.

WITNESSETH

WHEREAS, the purpose for which the District was formed is to provide for the improvement and operation of the water utility and sanitary sewer facilities formerly owned by Estates Utilities, Inc. so as to provide for water and/or sewer utility service to customers located within the District, which district boundaries are as on file with the Indiana Department of Environmental Management, and Yake Subdivision located within Huntington RWSD boundaries as on file with the Indiana Department of Environmental Management; and

WHEREAS, the District wishes to retire and remove from service the existing wastewater treatment facilities and substantially rehabilitate or replace the "Collection System" for wastewater.

WHEREAS, the District will need to provide for wastewater treatment service for the wastewater collected through the Collection System; and

WHEREAS, the Town owns and operates a wastewater treatment plant and wastewater collection system (the "Town's System") with capacity currently in excess of that required to process its own wastewater and the Town is willing to provide sewer service to the District for the wastewater collected by the Collection System and discharged into the Town's System, subject, however, to the terms set out in this agreement.

NOW, THEREFORE, in consideration of the premises and the mutual covenants and agreements hereinafter made and set forth, it is mutually agreed by and between the Parties as follows:

**ARTICLE 1
COVENANTS OF THE TOWN**

1.01. Service. Upon the completion and placement in service of the Force Main described in Paragraph 2.01 hereof and throughout the Term of this Agreement, the Town agrees to provide Wastewater Treatment Service to District on the same terms, conditions and limitations as is provided to the presently existing customers of Town's Wastewater Department, except as modified by the terms of this Agreement.

1.01.A. Service shall be provided by the Town to the District for lots that presently exist within the District boundaries as are on file with the Indiana Department of Environmental Management and Yake Subdivision located within Huntington RWSO boundaries as on file with the Indiana Department of Environmental Management.

1.02. Initial Charges. Upon completion of the Force Main, and as a condition of acceptance of Town of wastewater discharge from District, the District shall pay initial charges to the Town as follows:

- (a) a connection charge of Eight Hundred Dollars (\$800.00) will be paid by the District to Town.
- (b) an initial charge of Fifteen Thousand Dollars (\$15,000.00) will be paid by the District to Town.

1.03. Wastewater User Fees. The Town will charge and collect a treatment fee for Wastewater Treatment Service from the District as follows: \$3.07 per 100 cubic feet. The charge may include additional incremental charges based upon volume, strength and character of Wastewater received by Town from District and applicable surcharges. Surcharges and incremental charges are set out in paragraph 1.08.

1.04. Modification of Wastewater User Fees. The parties herein agree that the District shall discharge wastewater wherein the mass of waste does not exceed on a monthly average basis 300 Pounds/Day TSS; 300 Pounds/Day BOD, 30 Pounds/Day NH₃-N. The District agrees that it will continue to pay to Town the Satellite Collection System rate, or the successor to that rate, as established by ordinance adopted by Town. The Town expressly reserves the right to modify its standards, policies and procedures including, but not limited

ORDINANCE 1997- 13
AN ORDINANCE AMENDING WASTEWATER RATES
FOR THE TOWN OF ANDREWS, INDIANA

INDIANA UTILITY
REGULATORY COMMISSION

WHEREAS, the Town Council of the Town of Andrews, Indiana ("Council"), has heretofore established a municipal wastewater works and a schedule of rates and charges to be collected from the owners and/or users of property serviced by that wastewater works, and

WHEREAS, after public notice and due deliberation the Council finds that the existing rates and charges for use of and service rendered by that wastewater works to be too low and are inadequate to provide and maintain the wastewater works in the sound physical and financial condition necessary to render adequate and efficient service. Existing rates and charges are inadequate to provide funds for betterments and improvements and are insufficient to compensate the Town for property taxes that would be paid by the wastewater works if it were privately owned, and

WHEREAS, the laws of Indiana require that adequate fees and charges be collected for the use of and services rendered by the wastewater works, and that those fees be fixed by Ordinance finally adopted after due notice of public hearing, and

WHEREAS, this Council, working with the Town's professional advisers, has gathered, considered, and made public, certain data with regard to financial aspects of these matters,

NOW, THEREFORE, BE IT ORDAINED by this Council after a duly noticed and held public hearing on these matters that the following rates shall apply to owners and/or users of property serviced by the wastewater works:

Wastewater Billing

Each wastewater customer shall be charged \$4.18 per thousand gallons of metered water usage each month plus a monthly base rate in accordance with the following:

<u>Water Meter Size</u>	<u>Monthly Base Rate</u>
5/8" - 3/4"	\$ 8.64
1"	18.54
1 1/4"	28.44
1 1/2"	40.26
2"	67.98
3"	153.62
4"	272.20
6"	608.25

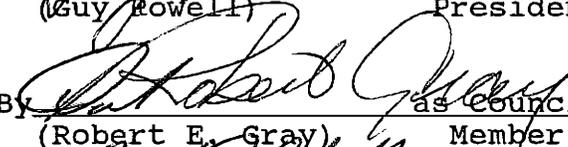

BE IT FURTHER ORDAINED that all previous ordinances establishing wastewater rates and charges in conflict with the foregoing are hereby repealed to the extent of that conflict as of the implementation of this Ordinance.

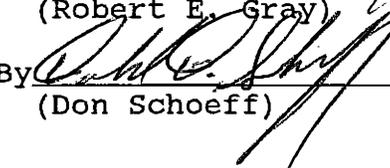

BE IT FURTHER ORDAINED that this Ordinance shall be effective as and for the first full billing cycle after its adoption.

Passed and adopted by the Town Council of the Town of Andrews, Indiana this 29 day of September, 1997.

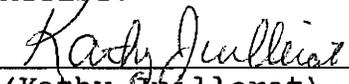

TOWN COUNCIL OF THE TOWN OF ANDREWS,
INDIANA

By  as Council
(Guy Powell) President

By  as Council

Rev. 2/10/11
Discussion Draft

ORDINANCE NO. 2011- 5

**AN ORDINANCE REVISING, RESTATING, AND RELOCATING
WASTEWATER AND STORMWATER DEPARTMENT
PROVISIONS OF THE TOWN CODE AND TOWN ORDINANCES
INTO CHAPTERS 53 AND 55 OF THE CODE OF ORDINANCES**

BE IT ORDAINED BY THE TOWN COUNCIL OF THE TOWN OF ANDREWS, INDIANA, in meeting duly assembled, that the Council determines and declares that the wastewater and stormwater department provisions of the Town's Code of Ordinances, consisting of §172.01 through and including §172.08, and related Town Ordinances are hereby revised, restated, reenacted, codified, reordained and relocated in that Code, all pursuant to law, including but not limited to I.C. §36-1-5, as follows:

“CHAPTER 53 – WASTEWATER DEPARTMENT (revised/restated/reenacted original ordinances and amendments thereof) (Ord. 2011-5, adopted 3/14/2011)

§53.01 REQUIREMENTS

(A) It shall be unlawful to discharge any natural outlet within the Town, or in any area under the jurisdiction of the Town, any sanitary sewage, industrial waste, or other polluted waters, except where suitable treatment has been provided in accordance with subsequent provisions of this Chapter.

(B) Except as hereinafter provided, it shall be unlawful to construct or maintain any privy, privy vault, septic tank, cesspool or other facilities intended or used for the disposal of sewage.

(C) The owner of all houses, buildings, or properties used for human occupancy, employment, recreation or other purposes situated within the Town, and abutting any street, alley or right-of-way in which there is now located or may in the future be located a public sewer or combined sewer of the Town, is required at owner's expense to install suitable toilet facilities therein, and to connect such facilities directly with the proper public sewer in accordance with the provisions of this Chapter, within 90 days after the date of official notice to do so, provided that the public sewer is within 100 feet of the property line. Any sewer lines more than 100 feet will be at the property owner's expense. (Ord. 255, passed 6/2/61; Ord. 428, passed 12/1/82)

§53.02 PRIVATE SEWAGE FACILITIES

(A) Where a public sanitary or combined sewer is not available under the provisions of the proceeding provision, the building sewer shall be connected to a private sewage disposal system complying with all recommendations of the Indiana Board of Health.

(B) At such time as a public sewer becomes available to a property served by a private sewage disposal system as provided in the preceding provision, a direct connection shall be made to the public sewer in compliance with this Chapter, and any septic tanks, cesspools and similar private sewage disposal facilities shall be abandoned.

(C) The owner shall operate and maintain the private sewage facilities in a sanitary manner at all times, at no expense to the Town.

(D) No statement contained in this Chapter shall be construed to interfere with any additional requirements that may be imposed by applicable authority. (Ord. 255, passed 6/2/61)

§53.03 PERMITS, SPECIFICATIONS.

(A) No unauthorized person shall uncover, make any connections with or opening into, use, alter, or disturb any public sewer or appurtenance thereof without first obtaining a written permit from the Clerk-Treasurer.

(B) There shall be two classes of building sewer permits: for residential and commercial service; and for service to establishments producing industrial waste. In either case, the owner or owner's agent shall make application on a form furnished by the Town. The permit applications shall be supplemented by any plans, specifications, or other information considered pertinent in the judgment of the Superintendent. A permit and inspection fee of \$55 for a residential or commercial building sewer permit and \$70 for an industrial building sewer permit shall be paid to the Clerk-Treasurer at the time the application is filed.

(C) All costs and expense incident to the installation and connection of the building sewer shall be borne by the owner. The owner or the person installing the building sewer for the owner shall indemnify the Town from any loss or damage that may directly or indirectly be occasioned by the installation.

(D) A separate and independent building sewer shall be provided for every building; except where one building stands at the rear of another on an interior lot and no adequate private sewer is available or can be constructed to the rear building through an adjoining alley, court, yard, or driveway, the building sewer from the front building may be extended to the rear building and the whole considered as one building sewer.

(E) Old building sewers may be used in connection with new buildings only when they are found on examination and test by the Superintendent to meet all requirements of this Chapter.

(F) The building sewer shall be PVC pipe, ASTM specification or equal; PVC sewer pipe, ASTM specification or equal, or other suitable material

approved by the Superintendent. Joints shall be tight and waterproof. Any part of the building sewer that is located within ten feet of a water service pipe shall be constructed of PVC 35 pipe with slip seal joints. Ductile iron pipes with slip seal joints may be required by the Superintendent where the building sewer is exposed to damage by tree roots. If installed in filled or unstable ground, the building sewer shall be of ductile iron pipe, except that non-metallic material may be accepted if laid on a suitable concrete bed or cradle as approved by the Superintendent.

(G) The size and slope of the building sewers shall be subject to the approval of the Superintendent, but in no event shall the diameter be less than six inches. The slope of such sewer shall not be less than 1/8 inch per foot.

(H) Wherever reasonably possible the building sewer shall be brought to the building at an elevation below the basement floor. No building sewer shall be laid parallel to or within three feet of any bearing wall, which might thereby be weakened. The depth shall be sufficient to afford protection from frost. The building sewer shall be laid at a uniform grade and in straight alignment in so far as possible. Changes in direction shall be made only with properly curved pipes and fittings.

(I) In all buildings in which any building drain is too low to permit gravity flow to the public sewer, sanitary sewage carried by such drains shall be lifted by Superintendent approved artificial means and discharged to the building sewer. No water-operated sewage ejector shall be used.

(J) All excavations required for the installation of a building sewer shall be open trench work unless otherwise approved by the Superintendent. Pipe laying and backfill shall be performed in accordance with ASTM specifications except that no backfill shall be placed until the work has been inspected by the Superintendent or the Superintendent's representative.

(K) All joints and connections shall be made gasket tight and watertight. All piping shall be of schedule 35 PVC or higher grade. Any piping within 300 feet of any wells shall be ductile iron or PVC schedule 80 or higher grade. Any new installation to any type of building shall have at least one clean out between the building and street property line. The sewer of any building or mobile home being torn down, or remodeled for any amount of time shall be plugged and/or made water tight as directed by the Superintendent.

(L) The connection of the building sewer into the public sewer shall be teeing or with rubber scolded sewer tap. Any fitting to make a turn in the sewer line shall be 45 degree or 22 degree. At no time will a 90 degree elbow be allowed.

(M) The applicant for the building sewer permit shall notify the Superintendent when the building sewer is ready for inspection and connection

to the public sewer. The connection shall be made under the supervision of the Superintendent or the Superintendent's representative.

(N) All excavations for building sewer installation shall be adequately guarded with barricades and lights so as to protect the public from hazard. Streets, sidewalks, parkways and other public property disturbed in the course of the work shall be restored in a manner satisfactory to the Superintendent. (Ord. 255, passed 6-2-61)

§53.04 INSPECTION. The Superintendent and other duly authorized employees of the Town bearing proper credentials and identification shall be permitted to enter upon all properties for the purpose of inspection, observation, measurement, sampling, and testing, in accordance with the provisions of this Chapter. (Ord. 255, passed 6-21-61)

(§53.05 THROUGH §53.10 RESERVED)

§53.11 GENERAL PROVISIONS REGARDING INTAKE/DISCHARGE STANDARDS (Ord 1992-2, passed 5/11/92)

53.11.1 Purpose and Policy. This Chapter sets forth uniform requirements for users of the wastewater collection and Publicly Owned Treatment Works hereafter referred to as "POTW" for the Town of Andrews hereafter the "Town" and enables the Town to comply with provisions of applicable state and federal laws. The objectives of this Chapter include:

- (A) To prevent the introduction of pollutants into the POTW that will interfere with the operation of the POTW;
- (B) To prevent the introduction of pollutants into the POTW which will pass through the POTW, inadequately treated, into receiving waters or otherwise be incompatible with the POTW;
- (C) To enhance the likelihood that the quality of the wastewater treatment plan is maintained at a level which allows its use and disposal in compliance with applicable statutes and regulations;
- (D) To protect POTW personnel who may be affected by wastewater and sludge in the course of their employment and to protect the general public;
- (E) To improve the opportunity to recycle and reclaim wastewater and sludge from the POTW;
- (F) To provide for fees for the equitable distribution of the cost of operation, maintenance and improvement of the POTW; and
- (G) To enable the Town to comply with its NPDES permit conditions, sludge use and disposal requirements and any other federal or state requirements to which the POTW is subject.

53.11.2 Administration. Except as otherwise provided herein, the Town's wastewater plant Superintendent shall administer, implement and enforce the provisions of this Chapter. Any powers granted to or duties imposed upon the Superintendent may be delegated by the Superintendent to other Town personnel.

§53.11.3 DEFINITIONS. Unless a provision explicitly states otherwise, the following terms and phrases, as used in this Chapter, shall have the meanings hereinafter designated.

(A) *Act or "the Act".* The Federal Water Pollution Control Act, also known as the Clean Water Act, as amended, 33 U.S.C. 1251 et seq.

(B) *Approval Authority.* A NPDES State with an approved State Pretreatment Program; otherwise, the appropriate Regional Administrator of the U.S. EPA, or his designee.

(C) *Categorical Pretreatment Standard or Categorical Standard.* Any regulation containing pollutant discharge limits promulgated by the U.S. EPA in accordance with Sections 307(b) and (c) of the Act (33 U.S.C. 1317) which applies to a specific category of industrial users and which appear in 40 CFR Chapter I, Subchapter N. Parts 405-471.

(D) *Town.* The Town of Andrews or the Town Council of Andrews.

(E) *Color.* The optical density at the visual wave length of maximum absorption, relative to distilled water. One hundred percent (100%) transmittance is equivalent to zero (0.0) optical density.

(F) *Composite Sample.* The sample resulting from the combination of individual wastewater samples taken at selected intervals based on an increment of either flow or time.

(G) *Environmental Protection Agency or EPA.* The U.S. Environmental Protection Agency or, where appropriate, the term may also be used as a designation for the Regional Water Management Division Director or other duly authorized official of said agency.

(H) *Existing Source.* Any source of discharge, the construction or operation of which commenced prior to the publication of proposed categorical pretreatment standards which will be applicable to such source if the standard is thereafter promulgated in accordance with Section 307 of the Act.

(I) *Grab Sample.* A sample which is then taken from a waste stream on a one-time basis without regard to the flow in the waste stream and without consideration of time.

(J) *Indirect Discharge or Discharge.* The introduction of (nondomestic) pollutants into the POTW from any nondomestic source regulated under Section 307(b), (c) or (d) of the Act.

(K) *Industrial User or User.* A source of indirect discharge.

(L) *Instantaneous Maximum Allowable Discharge Limit.* The maximum concentration (or loading) of a pollutant allowed to be discharged at any time, determined from the analysis of any discrete or composited sample collected, independent of the industrial flow rate and the duration of the sampling event.

(M) *Interference.* A discharge which alone or in conjunction with a discharge or discharges from other sources: (1) inhibits or disrupts the POTW, its treatment processes or operations or its sludge processes, use or disposal; and (2) therefore is a cause of a violation of the Town's NPDES permit or of the prevention of sewage sludge use or disposal in compliance with any of the following statutory/regulatory provisions or permits issued thereunder (or more stringent state or local regulations): Section 405 of the Clean Water Act; the Solid Waste Disposal Act (SWDA), including Title II commonly referred to as the Resource Conservation and Recovery Act (RCRA); any state regulations contained in any state sludge management plan prepared pursuant to Subtitle D of the SWDA; the Clean Air Act; the Toxic Substances Control Act; and the Marine Protection, Research and Sanctuaries Act.

(N) *Medical Waste.* Isolation wastes, infectious agents, human blood byproducts, pathological wastes, sharps, body parts, fomites, etiologic agents, contaminated bedding, surgical wastes, potentially contaminated laboratory wastes and dialysis wastes.

(O) *New Source.*

(1) Any building, structure, facility or installation from which there is or may be a discharge of pollutants, the construction of which commenced after the publication of proposed pretreatment standards under Section 307(c) of the Act which will be applicable to such source if such standards are thereafter promulgated in accordance with that section, provided that:

(a) The building, structure, facility or installation is constructed at a site at which no other source is located; or

(b) The building, structure, facility or installation totally replaces the process or production equipment that causes the discharge of pollutants at an existing source; or

(c) The production or wastewater generating processes of the building, structure, facility or installation are substantially independent of an existing source at the same site. In determining whether these are substantially independent, factors such as the extent to which the new facility is integrated with the existing plant, and the extent to which the new facility is engaged in the same general type of activity as the existing source, should be considered.

(2) Construction on a site at which an existing source is located results in a modification rather than a new source if the construction does not create a new building, structure, facility or installation meeting the criteria of (1), (b) or (c) above but otherwise alters, replaces or adds to existing process or production equipment.

(3) Construction of a new source as defined under this paragraph has commenced if the owner or operator has:

(a) Begun, or caused to begin as part of a continuous onsite construction program:

(i) Any placement, assembly, or installation of facilities or equipment, or

(ii) Significant site preparation work including clearing, excavation, or removal of existing buildings, structures, or facilities which is necessary for the placement, assembly, or installation of new source facilities or equipment; or

(b) Entered into a binding contractual obligation for the purchase of facilities or equipment which are intended to be used in its operation within a reasonable time. Options to purchase or contracts which can be terminated or modified without substantial loss, and contracts for feasibility, engineering, and design studies do not constitute a contractual obligation under this paragraph.

(P) *Noncontact Cooling Water.* Water used for cooling which does not come into direct contact with any raw material intermediate product, waste product, or finished product.

(Q) *Pass Through.* A discharge which exits the POTW into waters of the U.S. in quantities or concentrations which, alone or in conjunction with a discharge or discharge from other sources, is a cause of a violation of any requirement of the Town's NPDES permit (including an increase in the magnitude or duration of a violation).

(R) *Person.* Any individual, partnership, copartnership, firm, company, corporation, association, joint stock company, trust, estate, governmental entity or any other legal entity, or their legal representatives, agents or assigns. This definition includes all federal, state or local governmental entities.

(S) *pH.* A measure of the acidity or alkalinity of a substance, expressed in standard units.

(T) *Pollutant.* Any dredged spoil, solid waste, incinerator residue, sewage, garbage, sewage sludge, munitions, medical wastes, chemical wastes, industrial wastes, biological materials, radioactive materials, heat, wrecked or discharged equipment, rock, sand, cellar dirt, agricultural and industrial wastes, and the

characteristics of the wastewater (i.e. pH, temperature, TSS, turbidity, color, BOD, Chemical Oxygen Demand (COD), toxicity, odor).

(U) *Pretreatment*. The reduction of the amount of pollutants, the elimination of the pollutants, or the alteration of the nature of pollutant properties in wastewater prior to or in lieu of introducing such pollutants into the POTW. This reduction or alteration can be obtained by physical, chemical, or biological processes, by process changes, or by other means, except by diluting the concentration of the pollutants unless allowed by an applicable pretreatment standard.

(V) *Pretreatment Requirements*. Any substantive or procedural requirement related to pretreatment imposed on an industrial user, other than a pretreatment standard.

(W) *Pretreatment Standards or Standards*. Pretreatment standards shall mean prohibitive discharge standards, categorical pretreatment standards, and local limits.

(X) *Prohibited Discharge Standards or Prohibited Discharges*. Absolute prohibitions against the discharge of certain substances; these prohibitions appear in §53.12.1 of this Chapter.

(Y) *Publicly Owned Treatment Works or POTW*. A “treatment works” as defined by §212 of the Act (33 U.S.C. 1292), which is owned by the State or municipality. This definition includes any devices or systems used in the collection, storage, treatment, recycling and reclamation of sewage or industrial wastes and any conveyances which convey wastewater to a treatment plant. The term also means the municipal entity having jurisdiction over the industrial users and responsibility for the operation and maintenance of the treatment works.

(Z) *Septic Tank Waste*. Any sewage from holding tanks such as vessels, chemical toilets, campers, trailers, and septic tanks.

(AA) *Sewage*. Human excrement and gray water (household showers, dishwashing operations, etc.).

(BB) *Significant Industrial User*. Shall apply to: (a) industrial users subject to categorical pretreatment standards; and (b) any other industrial user that: (i) discharges an average of 25,000 gpd or more of process wastewater; (ii) contributes a process wastestream which makes up 5% or more of the average dry weather hydraulic or organic capacity of the treatment plant; or (iii) is designed as significant by the Town on the basis that the industrial user has a reasonable potential for adversely affecting the POTW's operation or for violating any pretreatment standard or requirement.

(CC) *Sludge Load*. Any discharge at a flow rate or concentration which could cause a violation of the prohibited discharge standards in §53.12.1 of this Chapter or any discharge of a non-routine, episodic nature, including but not limited to an accidental spill or a non-customary batch discharge.

(DD) *Standard Industrial Classification (SIC) Code.* A classification pursuant to the Standard Industrial Classification Manual issued by the U.S. Office of Management and Budget.

(EE) *Storm Water.* Any flow occurring during or following any form or natural precipitation, and resulting therefrom, including snowmelt.

(FF) *Superintendent.* The person designated by the Town to supervise the operation of the POTW, and who is charged with certain duties and responsibilities by this Chapter, or that Superintendent's duly authorized representative.

(GG) *Suspended Solids.* The total suspended matter that floats on the surface of, or is suspended in, water, wastewater, or other liquid, and which is removable by laboratory filtering.

(HH) *Toxic Pollutant.* One of 126 pollutants, or combination of those pollutants, listed as toxic in regulations promulgated by the EPA under the provision of §307 (33 U.S.C. 1317) of the Act.

(II) *Treatment Plant Effluent.* Any discharge of pollutants from the POTW into waters of the State.

(JJ) *Wastewater.* Liquid and water-carried industrial wastes and sewage from residential dwellings, commercial buildings, industrial and manufacturing facilities, and institutions, whether treated or untreated, which are contributed to the POTW.

(KK) *Wastewater Treatment Plant or Treatment Plant.* That portion of the POTW designed to provide treatment of sewage and industrial waste.

In this Chapter, "shall" is mandatory; "may" is permissive or discretionary. The use of the singular shall be construed to include the plural and the plural shall include the singular as indicated by the context of its use.

§53.11.4 Abbreviations. The following abbreviations shall have the designated meanings:

BOD	Biochemical Oxygen Demand
CFR	Code of Federal Regulations
COD	Chemical Oxygen Demand
EPA	U. S. Environmental Protection Agency
gpd	gallons per day
l	liter
mg	milligrams
mg/l	milligrams per liter
NPDES	National Pollutant Discharge Elimination System
O&M	Operation and Maintenance
POTW	Publicly Owned Treatment Works
RCRA	Resource Conservation and Recovery Act
SIC	Standard Industrial Classifications

SWDA	Solid Waste Disposal Act (42. U.S.C. 6901, et seq.)
TSS	Total Suspended Solids
USC	United States Code

§53.12 SEWER USE REQUIREMENTS

§53.12.1 Prohibited Discharge Standards. No user shall introduce or cause to be introduced into the POTW any pollutant or wastewater which causes pass through or interference. These general prohibitions apply to all users of the POTW whether or not they are subject to categorical pretreatment standards or any other national, state or local pretreatment standards or requirement. Furthermore, no user may contribute the following substances to the POTW:

(A) Pollutants which create a fire or explosive hazard in the municipal wastewater collection and POTW, including but not limited to wastestreams with a closed-cup flashpoint of less than 140°F (60°C) using the test methods specified in 40 CFR 261.21.

(B) Any wastewater containing pollutants (BOD, etc.) released in a discharge at a flow rate or/ or pollutant concentration which, either singly or by interaction with other pollutants, will cause interference with either the POTW; or any wastewater treatment or sludge process, or which will constitute a hazard to humans or animals.

(C) Any wastewater having a temperature greater than 140°F (60°C), or which will inhibit biological activity in the treatment plant resulting in interference, but in no case wastewater which causes the temperature at the introduction into the treatment plant to exceed 104°F (40°C).

(D) Petroleum oil, nonbiodegradable cutting oil, or products of mineral oil or origin, in amounts that will cause interference or pass through.

(E) Any pollutants which result in the presence of toxic gases, vapors, or fumes within the POTW in a quantity that may cause acute worker health and safety problems.

(F) Any trucked or hauled pollutants, except at discharge points expressly designated in writing by the Town.

(G) Any noxious or malodorous liquids, gases, solids, or other wastewater which, either singly or by interaction with other wastes, are sufficient to create a public nuisance, a hazard to life, or to prevent entry into the sewers for maintenance and repair.

(H) Any wastewater which imparts color which cannot be removed by the treatment process, such as, but not limited to, dye wastes and vegetable tanning solutions, which consequently imparts color to the treatment plant's effluent thereby violating the Town's NPDES permit. Color (in combination

with turbidity) shall not cause the treatment plant effluent to reduce the depth of the compensation point for photosynthetic activity by more than 10 percent from the seasonably established norm for aquatic life.

(I) Any wastewater containing any radioactive wastes or isotopes except as specifically approved by the Superintendent in compliance with applicable State or Federal regulations.

(J) Storm water, surface water, ground water, artesian well water, roof runoff, subsurface drainage, swimming pool drainage, condensate, deionized water, noncontact cooling water, and unpolluted industrial wastewater, unless specifically authorized by the Superintendent.

(K) Any sludges, screenings, or other residues from the pretreatment of industrial wastes.

(L) Any medical wastes, except as specifically authorized by the Superintendent in a wastewater discharge permit.

(M) Any wastewater causing the treatment plant's effluent to fail a toxicity test.

(N) Any wastes containing detergents, surface active agents, or other substances which may cause excessive foaming in the POTW.

Wastes prohibited by this Section shall not be processed or stored in such a manner that they could be discharged to the POTW. All floor drains located in process or materials storage areas must discharge to the user's pretreatment facility before connecting with the POTW.

New connections from storm water inflow sources into the sanitary sewer portions of the Town's sewerage system are hereby prohibited. The Superintendent shall institute procedures to ensure that new sewers and connections to the sanitary sewers are properly designed and connected in that regard.

The Town reserves the right to establish, by ordinance or in wastewater discharge permits, more stringent standards or requirements on discharges to the POTW if deemed necessary to comply with the objectives of this Chapter or the general and specific prohibitions in this Chapter.

§53.12.2 Special Agreements. The Town reserves the right to enter into special agreements with users setting out special terms under which they may discharge to the POTW. In no case will a special agreement waive compliance with a pretreatment standard or requirement. However, the user may request a net gross adjustment to a categorical standard in accordance with 40 CFR 403.15. Such a user may also request a variance from the categorical pretreatment standard from EPA. Such a request will be approved only if the user can prove that factors relating to its discharge are fundamentally different from the factors considered by EPA when establishing that

pretreatment standard. A user requesting a fundamentally different factor variance must comply with the procedural and substantive provisions in 40 CFR 403.13.

§53.12.3 Dilution. No user shall ever increase the use of process water, or in any way attempt to dilute a discharge, as a partial or complete substitute for adequate treatment to achieve compliance with a discharge limitation unless expressly authorized by an applicable pretreatment standard or requirement. The Superintendent may impose mass limitations on users which are using dilution to meet applicable pretreatment standards or requirements, or in other cases when the imposition of mass limitations is appropriate.

§53.12.4 Reduction of storm water inflow/infiltration. The Town Council shall have authority to require an owner of real property to disconnect and/or block off from the Town's sanitary system and/or combined sewerage, any and all downspouts, drains (including yard drains) and/or sewers, the flowage from which consists in whole or material part of storm water.

The Superintendent or other duly authorized representatives of the Town, bearing proper credentials and identification shall be permitted to enter all properties at reasonable times for the purposes of inspection, observation, sampling and/or testing with regard to the implementation of, and compliance with, the provisions of this Chapter.

§53.13 PRETREATMENT OF WASTEWATER

§53.13.1 Pretreatment Facilities. Users shall provide necessary wastewater treatment as required to comply with applicable authority and shall achieve compliance with all categorical pretreatment standards, local limits and the prohibitions set out in Section §53.12.1 above within the time limitations specified by the EPA, the State, or the Superintendent – whichever is more stringent. Any facilities required to pretreat wastewater to a level acceptable to the Town shall be provided, operated, and maintained at the user's expense. Detailed plans showing the pretreatment facilities and operating procedures shall be submitted to the Town for review, and shall be acceptable to the Town before operating procedures will in no way relieve the user from the responsibility of modifying the facility as necessary to produce an acceptable discharge to the Town under the provisions of this Chapter.

§53.13.2 Additional Pretreatment Measures

(A) Whenever deemed necessary, the Superintendent may require users to restrict their discharge peak flow periods, designate that certain wastewater be discharged only into specific sewers, relocate and/or consolidate points of discharge, separate sewage wastestreams from industrial wastestreams, and such other conditions as may be necessary to protect the POTW and determine the user's compliance with the requirements of this Chapter.

(B) Grease, oil and sand interceptors shall be provided when, in the opinion of the Superintendent, they are necessary for the proper handling of

wastewater containing excessive amounts of grease and oil, or sand; except that interceptors shall not be required for residential users. All interception units shall be of type and capacity approved by the Superintendent and shall be so located to be easily accessible for cleaning and inspection. Such interceptors shall be inspected, cleaned and repaired regularly, as needed, by the owner at owner's expense.

(C) Users with the potential to discharge flammable substances may be required to install and maintain an approved combustible gas detection meter.

§53.14 MISCELLANEOUS PROVISIONS REGARDING INTAKE/DISCHARGE STANDARDS

§53.14.1 Tenant Responsibility. Where an owner of property leases premises to any other person as a tenant under any rental or lease agreement, if either the owner or the tenant is a wastewater plant user, either or both may be held responsible for compliance with the provisions of this Chapter.

§53.14.2 Hauled Wastewater

(A) Septic tank waste may be accepted into the POTW at a designated receiving structure within the treatment plant area, under such terms as are established by the Superintendent, provided such wastes do not violate this Chapter or any other requirements established or adopted by the Town. Wastewater discharge permits for individual vehicles to use such facilities shall be issued by the Superintendent.

(B) The discharge of hauled industrial wastes as "industrial septage" requires prior approval and a wastewater discharge permit from the Town. The Superintendent shall have authority to prohibit the disposal of such wastes, if such disposal would interfere with the treatment plant operation. Waste haulers are subject to all other sections of this Chapter.

(C) Fees for dumping septage will be established as part of the Wastewater Department user fee system.

§53.14.3 Vandalism. No person shall maliciously, willfully or negligently break, damage, destroy, uncover, deface, tamper with or prevent access to any structure, appurtenance or equipment, or other part of the POTW. Any person found in violation of this requirement shall be subject to the sanctions set out in §53.14.4 below.

§53.14.4 Violations and Penalties.

(A) Any person found to be violating or failing to comply with any of the provisions of this Chapter shall be served by the Town Marshal with a written notice stating the nature of the violation and providing a ten (10) day time limit for its satisfactory correction. The offender shall, within the period of time stated in the notice, permanently cease all violations.

(B) Any person who shall continue any violation beyond the stated time limit shall be guilty of an infraction and upon a court determination thereof, shall be subject to a fine in an amount of \$25.00. Each day in which any such violation shall continue shall be deemed to constitute a separate offense. Further, any person violating any of the provisions of this Chapter shall be liable to the Town for any and all expense, loss or damage to the Town by reason of such violation.

(C) In cases of a repeated violation or violations, the Town Council may revoke permission to discharge into the sewer system, and affect the discontinuance of water or sewer service, or both, as reasonably determined by the Town to be appropriate in the circumstances.

§53.14.5 Public Nuisances. Any violation of this Chapter, wastewater discharge permits, or orders issued hereunder, is hereby declared a public nuisance and shall be corrected or abated as directed by the Superintendent or the Superintendent's designee.

§53.14.6 Pretreatment Charges and Fees. The Town may adopt reasonable charges and fees for reimbursement of costs of setting up and operating the Town's Pretreatment Program which may include:

(A) Fees for wastewater discharge permit applications including the cost of processing such applications.

(B) Fees for monitoring, inspection, and surveillances procedures including the cost of collection and analyzing an industrial user's discharge, and reviewing monitoring reports submitted by industrial users.

(C) Fees for reviewing and responding to accidental discharge procedures and construction.

(D) Fees for filing appeals.

(E) Other fees as the Town may deem necessary to carry out the requirements contained herein. These fees relate solely to the matters covered by this Chapter and are separate from all other fees, fines and penalties chargeable by the Town.

§53.20 WASTEWATER RATES AND CHARGES

Each wastewater customer shall be charged \$3.52 per thousand gallons of metered water usage each monthly billing period, plus a monthly base rate in accordance with the following:

<u>Size of Meter in Inches</u>	<u>Minimum Monthly Rate</u>
5/8 to 3/4	\$ 8.64
1	\$ 18.54
1 1/4	\$ 28.44
1 1/2	\$ 40.26
2	\$ 67.98
3	\$ 153.62
4	\$ 272.20
6	\$ 608.25

(Ord. 1997-13, passed 9/29/97; Ord. 1999-5)

§53.22 WASTEWATER SURCHARGES (Reserved)

§53.30 WASTEWATER DEPRECIATION FUND

The Clerk-Treasurer shall transfer \$5,000 from wastewater operating to establish the Fund. Thereafter ten percent (10%) of the collected monthly wastewater charges shall be deposited into this Fund each month, all pending further action by the Town Council. (Res. 531, passed 12/27/88)

§53.70 WASTEWATER CONTRACTS

(A) The Town may enter into wastewater collection and/or processing contracts, including but not limited to agreements with non-industrial dischargers for multiple equivalent dwelling units. (Ord. 1999-5, amended 12/6/04)

(B) The Town is party with Norwood Regional Water and Sewer District to a Wastewater Service Agreement dated December 6, 2004. (Ord. 2004-10, passed 12/6/04; Res 2007-04, passed 11/5/07.)

§53.99 PENALTY

(A) Any person violating any of the provisions of this Chapter shall become liable to the Town for any expense, loss, or damage incurred by the Town by reason of that violation.

(B) Any person who shall violate any of the provisions of this Chapter, or continue any violation beyond any time limit provided for remediation, shall be fined in an amount not exceeding \$50 for each violation. Each day in which any such violation occurs or continues shall be deemed a separate offense. (Ord. 255, passed 6/21/61; formerly §172.08 of the Town Code)

CHAPTER 55 – STORMWATER DEPARTMENT” (Reserved) (Ord. 2011-5, adopted __/__/2011)

BE IT FURTHER ORDAINED that two copies of the Andrews Code of Ordinances as so amended shall be kept in the offices of the Town's Clerk-Treasurer for public inspection.

BE IT FINALLY ORDAINED that this ordinance shall be in full force and effect following its adoption and in accordance with applicable law.

Adopted this 14TH day of MARCH, 2011.

TOWN COUNCIL OF THE TOWN OF ANDREWS, INDIANA

Karl Shockome as
(Karl Shockome) President

Raymond Tackett as
