Subject: Energy Efficiency in Indiana

I can't believe our Governor and our Legislators are terminating the **Energize Indiana** program halfway through before the benefits can be realized! Energy conservation is here to stay and to abandon it now is only putting off today what must be done tomorrow! It will not go away! The time is now! Why must we play catch-up? Why must we follow our neighboring states instead of leading? We should at the very least, keep up with the pack! Cancelling this program is so very shortsighted, and it concerns me and my faith in our leaders abilities to serve their constituents best needs! I have lived in Indiana for 56 years, since my birth and I have witnessed many changes. All changes related specifically to energy and the environment were necessary and costly, but it was for the good of the community, for Indiana, for our country! Everyone benefited! These changes will only cost more in the future. You know this to be true! I implore you to do the right thing for Indiana and our nation. Any future plans, or programs must be effective and fair to all citizens, and not just to industry.
Thank you for your time.

Sincerely,

Gary Borgmann, CPD
