

Notes Re: Proposed Changes – MSFR Pre-rulemaking Workshop – April 24, 2008

The following are proposed changes to Version II of the Strawman Draft Proposed Rule, for which language may need to be developed:

- Proposed confidentiality agreement with OUCC that is filed or given to the OUCC at time of testimony filed that covers discovery requests for that proceeding, unless a confidentiality agreement is already in place – IEA/industry will work with OUCC on drafting compromise language..
- Commission discretion should be retained in setting procedural schedule
 - Response: The Commission already has this discretion and therefore it wasn't necessary to have the language in the rule.
- 1-5-15 (b) – questioned the deletion of this subsection applying only to electric or gas utility – subsection c applies to water utility AWWA Manual
 - Response: Commission staff has checked and subsection (b) should only apply to electric or gas utility; requiring compliance with both subsections (b) and (c) by water utilities would be duplicative
- 1-5-13 – OUCC would like workpapers that support the cost of equity and fair rate of return estimations – industry is willing to provide access (but not copies) to copyrighted and licensed materials – IEA/industry will work with OUCC on drafting compromise language.

NOTE: Additional changes were made to the Strawman Draft Proposed Rule that were agreed upon by the workshop participants and are being distributed with these notes.
