Subject: Energy Efficiency in Indiana

Energy efficiency is THE least cost resource and that the sooner we embrace energy efficiency as the preferred resource option, the sooner Indiana will realize the economic and societal benefits that come from continuing these investments.

Indiana needs to enact strong statewide energy efficiency policy.

Please get Gov. Pence on board with the most energy efficiencies as possible. Our futures depend on it.

Dear Indiana Utility Regulatory Commission,

Recommend to Gov. Pence that Indiana enact strong statewide energy efficiency policy that establishes: - Statewide savings goal similar to those established in the December 2009 order in Cause No. 42693. - A public purpose fund which ALL ratepayers contribute to. - An independent, non-profit Statewide third party administrator to oversee those funds.

Sincerely,

Subject: Enact strong statewide energy efficiency policy

To: Indiana Utility Regulatory Commission
urcccomments@urc.in.gov

Re: Enact strong statewide energy efficiency policy

Electric bills in Indiana are becoming increasingly more expensive, heavily impacting the cost of living and the cost of doing business in Indiana. Using less energy is the cheapest and fastest way to cut those costs.

Indiana's energy efficiency programs (collectively called Energizing Indiana) have been cutting energy costs and creating jobs for over two years. Despite this, the 2014 Indiana General Assembly passed Senate Enrolled Act 340, which will end the Energizing Indiana programs at the end of 2014.

Energy efficiency is the least cost resource and that the sooner we embrace energy efficiency as the preferred resource option, the sooner Indiana will realize the economic and societal benefits that come from continuing these investments.

Gov. Pence should enact strong statewide energy efficiency policy that establishes:

- Statewide savings goal similar to those established in the December 2009 order in Cause No. 42693.
- A public purpose fund which ALL ratepayers contribute to.
- An independent, non-profit Statewide third party administrator to oversee those funds.

Thank you for the opportunity to bring these remarks to your attention.

Yours sincerely,
Robert E. Rutkowski

Gov. Pence,

I am writing to you in hopes that you will enact a statewide energy efficiency policy for the state of Indiana. As you know, Energy efficiency is THE least cost resource and that the sooner we embrace energy efficiency as the preferred resource option, the sooner Indiana will realize the economic and societal benefits that come from continuing these investments.

Dear Indiana Utility Regulatory Commission,

Regarding the IURC's EE/DSM recommendations, please recommend to Gov. Pence that Indiana enact strong statewide energy efficiency policy that establishes: - Statewide savings goal similar to those established in the December 2009 order in Cause No. 42693. - A public purpose fund which ALL ratepayers contribute to. - An independent, non-profit Statewide third party administrator to oversee those funds.

Sincerely,

Subject: Energy Efficiency Program

To Whom It May Concern:

Please enact a strong energy efficiency program for Indiana as soon as possible.

I am enjoying saving money with the light bulbs and water saving showerheads that we received from the earlier program and I want Indiana to be able to compete with other states in attracting businesses to provide more jobs. Thank you,

Jane Stowe

Subject: Strong state wide energy efficiency program

To whom it may concern,

Hello,my name is Jeffrey Steen. I'm 45 yrs old and have been a resident of Indiana all my life. I suffered a bad accident several yrs ago that left me unable to work,and disabled. I have received help with the paying of my bills in the past by our energy assistance program here in Adams county,and every yr received a letter informing me that I qualified for free winterazation of my home because I qualified for energy assistance. I never let anyone do the work on my home because it was a fairly new Habitat for Humanity home and I didn't believe I needed it and the funds should be given to someone who needed it more than I did. But it was nice knowing there was something there if I truly needed it. I'm thinking about applying again this yr so I can get the help that I think I need now with a few doors and such. So I'm hoping you will figure out a way to give Mr Pence what he wants and be able to keep the energy assistance available for us who will need it this winter. One thing I wanted to mention,is that I thought it would be a good idea if people who are disabled and maybe receiving some sort of public assistance already would automatically be qualified for the energy assistance program,and the home winterazation without having to apply for everything separately. Being disabled,I do have trouble going out and even shopping for groceries,or other little errands.it would be wonderful if I didn't have to travel the 20 minutes there and back to apply for the other things I will need that's available. I urge you to please send Mr Pence the building blocks for a strong state wide energy efficiency program. Thank you so much for your time.

Sincerely
Mr steen

Dear Indiana Utility Regulatory Commission,

Regarding the IURC's EE/DSM recommendations, please recommend to Gov. Pence that Indiana enact strong statewide energy efficiency policy that establishes: - Statewide savings goal similar to those established in the December 2009 order in Cause No. 42693. - A public purpose fund which ALL ratepayers contribute to. - An independent, non-profit Statewide third party administrator to oversee those funds.

Sincerely,

Subject: Electricity rate structure survey
Attachments: Comparison of electric rate structures - US - IUPUI Lugar Center for Renewable Energy.pdf

Dear Chairman, Commissioners, and Counsel of the Indiana Utility Regulatory Commission,

Please find attached a survey of electric rate structures across the United States. This was compiled in 2013 as part of a research project and illustrates a reasonably comprehensive sample of different rate structures. The purpose of providing these is to offer ideas and example for consideration in your deliberations regarding demand-side management.

Best regards,

Peter

Electricity Rate Structures

Different utilities have different rate structures.

Most utilities have a **basic charge** which is applied to all bills each month. The **demand charge** (for peak power draw in kilowatts) and the **energy charge** (for total consumption in kilowatt-hours) are added to that basic charge to compute a monthly electric bill.

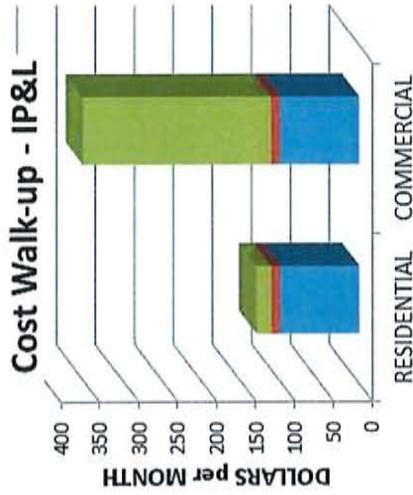

This document presents graphical representation of rate structures sampled from a nationwide survey. *Note that most states offer a choice of meters between “demand charge” and “time-of-day” energy charge (see “Choose Meter” on slides 4-9, 12, 15-17).*

Case Studies

- Indiana (see page 18)

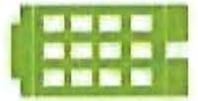

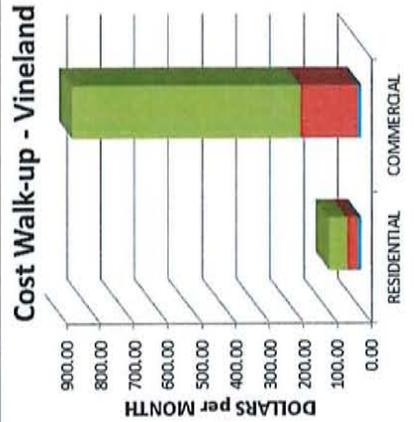

Profile	Peak Power Demand kilowatts	Total Energy Consumption kilowatt-hours	IP&L (Indiana)				Effective Rate -cents per kWh
			Base Charge	Demand Charge	Energy Charge	TOTAL	
RESIDENTIAL	4.5	720	103.33	10.55	19.30	133.18	18.5
COMMERCIAL	25	9000	103.33	10.55	241.20	355.08	3.9
INDUSTRIAL	650	180000	103.33	10.18	4824.00	4937.51	2.7

These calculations of hypothetical monthly bills for homes, businesses, and factories are intended to illustrate how electricity rate structures affect prices paid by consumers. Similar studies can be done for the 12 examples illustrated herein.

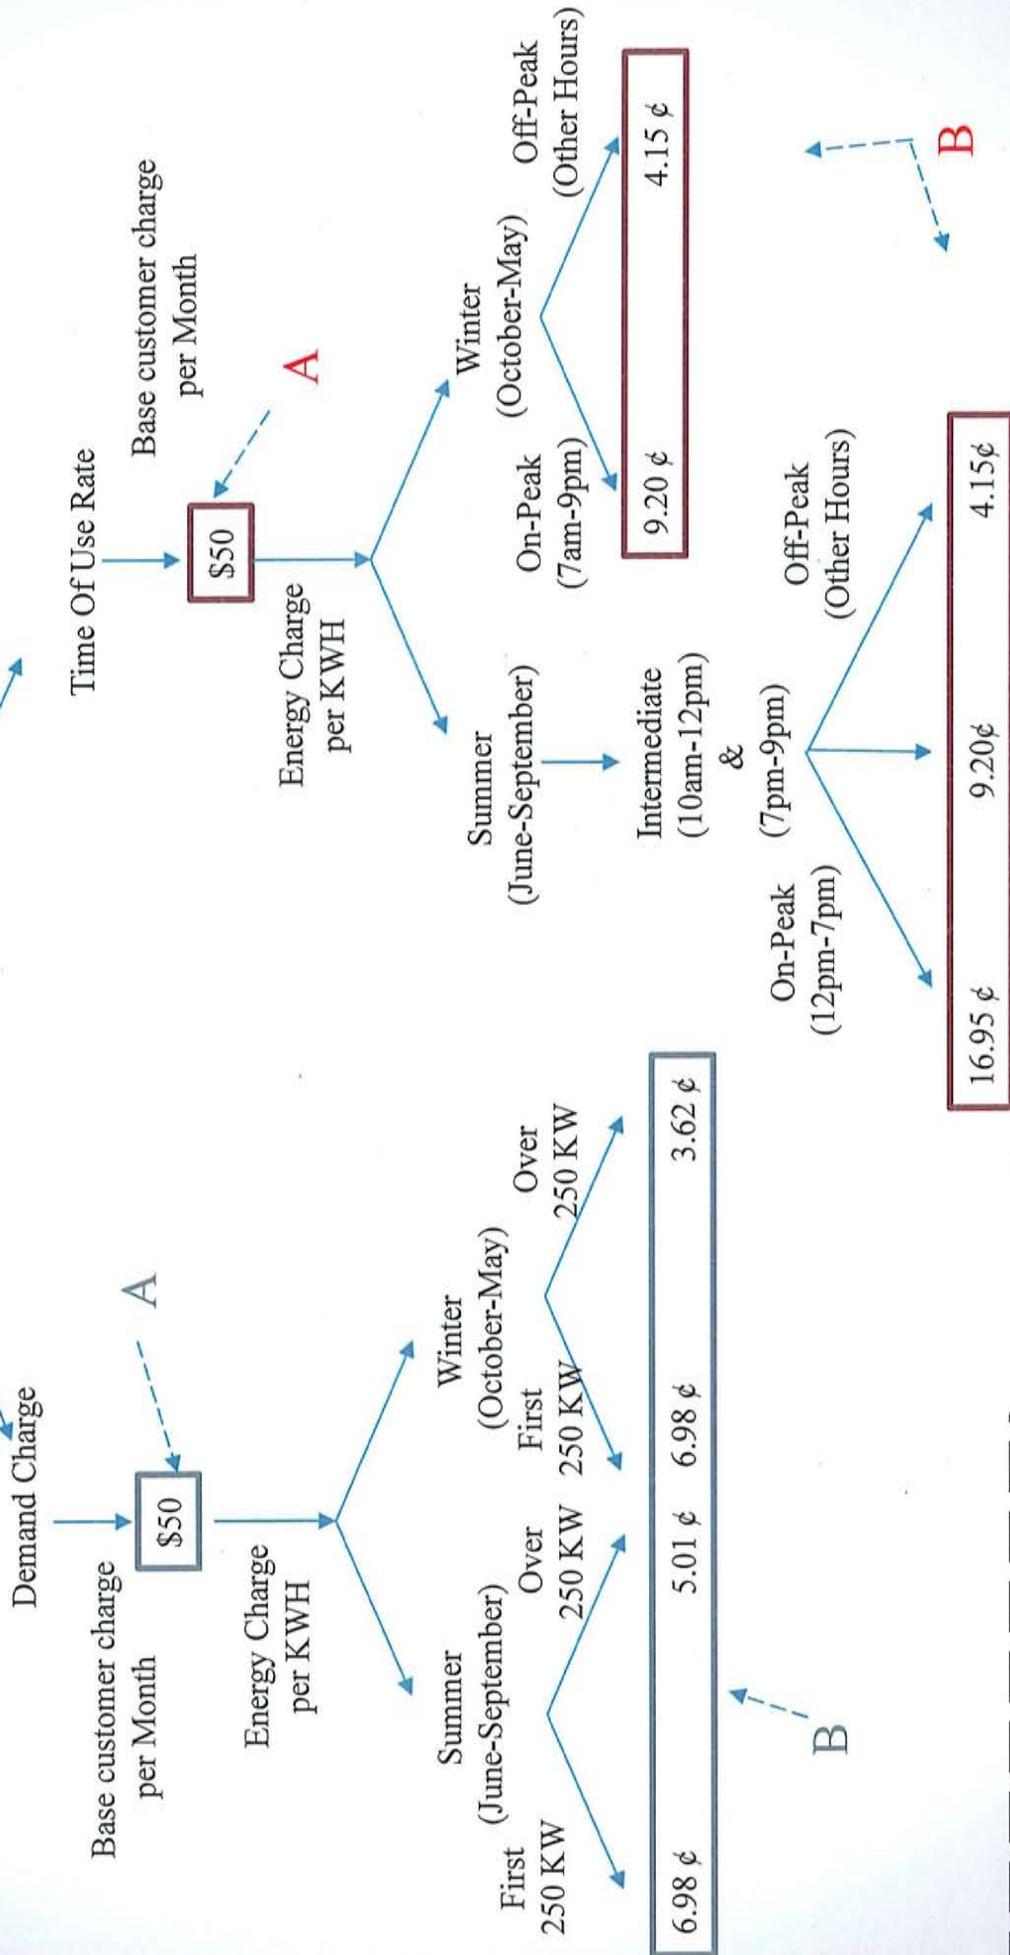

- New Jersey (see page 10)

Profile	Peak Power Demand kilowatts	Total Energy Consumption kilowatt-hours	Vineland Municipal - New Jersey				Effective Rate -cents per kWh
			Base Charge	Demand Charge	Energy Charge	TOTAL	
RESIDENTIAL	4.5	720	11.20	30.42	54.00	95.62	13.3
COMMERCIAL	25	9000	11.20	169	675.00	855.20	9.5
INDUSTRIAL	650	180000	11.20	4394	13500.00	17905.20	9.9

Subject: Re: Indiana needs energy efficiency

Attn: beth krogel roads

Governor Pence needs to enact policy that meets the following goals:

1. Statewide savings goal similar to those established in the December 2009 order in Cause No. 42693.
2. A public purpose fund which ALL ratepayers contribute to.
3. An independent, non-profit Statewide third party administrator to oversee those funds.

Energy efficiency:

- costs far less than the construction of unnecessary and expensive new power plants,
- creates jobs, spurs economic development, and keeps Indiana dollars in Indiana,
- reduces environmental compliance costs, and
- reduces the need to import fuel for energy production.

Do the right thing for our kids' future.
