FISCAL IMPACT STATEMENT

LS 7409

BILL NUMBER: SB 566

NOTE PREPARED: Feb 13, 2007

BILL AMENDED: Feb 8, 2007

SUBJECT: Medicaid Claims and Psychiatric Facility Funding.

FIRST AUTHOR: Sen. Dillon

FIRST SPONSOR: Rep. C. Brown

BILL STATUS: As Passed Senate

FUNDS AFFECTED: GENERAL
 DEDICATED
 FEDERAL

IMPACT: State & Local

Summary of Legislation: (Amended) This bill requires an insurer to accept a Medicaid claim for services provided a Medicaid recipient for three years after the date the service was provided. The bill specifies the circumstances in which a Medicaid claim may not be denied by an insurer. It also states that notice requirements may be satisfied by electronic or mail submission (current law provides only for certified or registered mail). The bill further requires an insurer to accept the state's right of recovery and assignment of certain rights as required by federal law.

The bill adds alternative settings to the definition of children's psychiatric residential treatment services.

Effective Date: July 1, 2007.

Explanation of State Expenditures:

Explanation of State Revenues: *Medicaid Claims for Services:* The provisions regarding Medicaid claims for services provided to Medicaid recipients that are or were also covered by another insurer bring the state statute into compliance with provisions of the federal Deficit Reduction Act of 2005. This provision may result in additional recoveries of Medicaid reimbursements. The Office of Medicaid Policy and Planning has estimated that annually an additional \$3.2 M could be recovered. Recoveries are distributed between the state and federal government on the basis of the percentage paid by each. The state General Fund recovery is estimated to be \$1.2 M.

(Revised) *Children's Psychiatric Residential Treatment:* The bill would provide that services eligible under the program include treatment services in settings other than institutional settings. This may ultimately

provide for cost savings to the Medicaid program if children can receive services outside of an institutional setting. It may also allow for more intensive care after a period of inpatient care.

The Medicaid Program is jointly funded by the state and federal governments. The state share of program expenditures is approximately 38%. Medicaid medical services are matched by the federal match rate (FMAP) in Indiana at approximately 62%. Administrative expenditures with certain exceptions are matched at the federal rate of 50%.

Explanation of Local Expenditures: (Revised) The bill would allow home and community based services to be included in the services available to children that require an institutional level of care for psychiatric treatment. Depending on individual circumstances, this could result in savings to the counties.

Background: Before the separate PRTS levy was established, counties provided payment for inpatient residential treatment services for children determined to be wards of the court from the county Family and Children's Fund at 100% of the cost. When the PRTS levy was established in CY 2004, the Family and Children's levy was reduced by the amount spent for the inpatient residential treatment services, while the PRTS levy was calculated on what the state Medicaid share of those costs would have been, resulting in a net decrease between the two levies. The separate PRTS levy provided a methodology for leveraging Medicaid funding when available, requiring the county to provide the state share of the Medicaid program cost for all (not just the wards) Medicaid-eligible children under the age of 21 years in the county that are certified for placement in psychiatric residential treatment facilities. (The expenditures paid from this county fund can vary widely, especially for smaller counties. Unlike the Medicaid for Wards levy, the PRTS levy does not have a maximum levy limit. The tax levy for the county PRTS fund is based on the budgeted anticipated costs for the county's children's residential psychiatric services that are equal to the state share of the cost of services that are reimbursable by Medicaid, or about 38% of the total cost of the Medicaid services.

Explanation of Local Revenues: The bill does not influence the amount of local revenue raised for this purpose since there are no changes to how the levy is determined.

State Agencies Affected: Office of Medicaid Policy and Planning, Family and Social Services Administration.

Local Agencies Affected: County Auditors.

Information Sources: Deficit Reduction Act of 2005; Department of Child Services; Office of Medicaid Policy and Planning, Family and Social Services Administration.
