(b) The following definitions shall apply throughout this rule:

(3) "Bogus sample" means any air sample that is altered, diluted, stored, or is filtered human breath, or which is obtained from a device such as, but not limited to, an air compressor, hot air dryer, balloon, or manual air pump, and is provided by an individual attempting to start or continue to operate a vehicle equipped with an IID.

(4) "Breath or blood alcohol concentration" or "BAC" means the amount of alcohol in a person's breath sample submitted to an IID, which shall be measured by grams of alcohol per:

(A) one hundred (100) milliliters of blood; or

(B) two hundred ten (210) liters of breath.

(5) "Circumvention" means the attempted or successful bypass of the proper functioning of an IID, including, but not limited to, the operation of a vehicle without a properly functioning IID, the push start of a vehicle equipped with an IID, disconnection or alteration of the IID, the introduction of a bogus sample other than a deep-lung sample from the driver of the vehicle, introduction of an intentionally contaminated or altered breath sample, continued operation of the interlock vehicle after the IID detects a fail level of breath alcohol.

(6) "Fail level" means a BAC that meets or exceeds .02 or a lower level set by the originating court.

(7) "Ignition interlock device" or "IID" has the meaning set forth in IC 9-13-2-76.

(8) "Lessee" means a person who has entered into an agreement with a manufacturer or ASP to lease an IID.

(9) "Manufacturer" means the person, company, or corporation producing IIDs, and certifies service providers who are qualified to service, install, monitor, calibrate, and provide information on IIDs.

(10) "Originating court" means the Indiana court that issued the order that requires an individual to operate only vehicles equipped with IIDs.

(11) "Restricted operator" means a person whose driving privileges are restricted to operating only motor vehicles equipped with an approved, functioning IID.

(12) "Tampering" means any act or attempt to disable or circumvent the legal operation of an IID.

(13) "Violation reset" means the condition caused by the failure of the operator of a vehicle to perform a test or retest as required, or by the operator's inability to achieve such test or retest results at the lower of the maximum allowable alcohol concentration as set by the originating court or .02 BAC, the IID and the vehicle in which it is installed must be returned to the IID manufacturer or ASP to be reset.

(Bureau of Motor Vehicles; 140 IAC 1-8-0.5; filed Oct 7, 2008, 10:23 a.m.: 20081105-IR-140080215FRA; readopted filed Nov 3, 2014, 1:43 p.m.: 20141203-IR-140140375RFA)

140 IAC 1-8-1 Minimum standards, specifications and features

Authority: IC 9-14-8-3

Affected: IC 9-30-5-8; IC 9-30-8

Sec. 1. Each court in Indiana that has authority to order the installation of IIDs shall order the installation of IIDs that must meet the following minimum standards and specifications for the following:

(1) Features, as follows:

(A) The IID shall automatically render the vehicle inoperable if the result of the breath sample given to start the vehicle is at the fail level.

(B) The IID shall be designed to permit a restart within two (2) minutes of a vehicle's stalling or when the vehicle's ignition has been turned off.

(C) The IID shall automatically and completely purge residual alcohol before allowing subsequent tests.

(D) The IID shall be installed in such a manner that it will not interfere with the normal operation of the vehicle after it has been started.

(E) Each IID shall be provided with an ample supply of disposable mouth pieces designed to minimize the introduction

of saliva into the IID.

(F) Each IID shall be uniquely serial numbered.

(G) Along with any other information required by the BMV or an originating court, all reports to an originating court concerning a particular IID shall include the name, address, and driver's license number of the lessee, the IID's unique serial number, and the name, address, telephone number (toll free), and contact person of the manufacturer or the ASP that is furnishing the report.

(H) Each IID shall record each time the vehicle is started, the results of the tests, how long the vehicle was operated, and any indication of bypassing or tampering with the device. Such information shall be included in reports to the originating court.

(I) Each IID shall require the operator of the vehicle to submit to a retest within ten (10) minutes of starting the vehicle. Retesting shall continue at intervals not to exceed sixty (60) minutes after the first retest.

(J) If a retest is not performed when called for by the IID, or if a breath sample is submitted that is at the fail level, the IID shall automatically enter a violation reset condition. An IID that enters a violation reset condition, and the vehicle in which it is installed, must be returned to the manufacturer or the ASP to be serviced within five (5) days or the vehicle must be rendered inoperable. The manufacturer or the ASP shall notify the originating court of such violation reset conditions in a format acceptable to the originating court within five (5) days of servicing the IID.

(2) IID security. The IID manufacturer and its ASP or ASPs shall take all reasonable steps necessary to prevent tampering or physical circumvention of the IID. These steps shall include the following:

(A) Special locks, seals, and installation procedures that prevent, and records evidence of, tampering or circumvention attempts, or both.

(B) The ASP will affix to the device a label containing the following notation: "Warning - This device has been installed under the laws of the State of Indiana. Attempts to disconnect, tamper with, or circumvent this device may subject you to civil and/or criminal penalties. For more information, call (insert manufacturer's or ASP's toll free number).".

(C) No owner or employee of a manufacturer or ASP may authorize or assist with the disconnection of an IID, or enable the use of any emergency bypass mechanism or any other bypass procedure that allows a person restricted to use the vehicle equipped with a functioning IID, to start or operate a vehicle without providing all required breath samples.

Sec. 3. (a) Each lessee shall have the IID examined by the manufacturer or by an ASP for correct calibration and evidence of tampering at intervals not to exceed sixty-five (65) days, or more often as may be ordered by the originating court.

(b) The IID must be calibrated for accuracy according to the manufacturer's procedures. All data contained in the device's memory must be downloaded and the manufacturer or the ASP, or both, shall make a hard copy or electronic equivalent of the client data and the results of each examination. Any evidence of noncompliance, violations, or signs of tampering or circumvention shall be reported as requested by and in a format acceptable to the originating court. All information obtained from each inspection shall be retained by the manufacturer or ASP for two (2) years from the date the IID is removed from the vehicle.

(c) Each IID must be capable of being preset, by the manufacturer or by an ASP, at any fail level from .02 through .08 BAC (plus or minus .005 BAC). The actual setting of each IID, unless otherwise mandated by the originating court, shall be .02 BAC.

The capability to change this setting shall be made secure by the manufacturer or by an ASP.

(d) Each IID must meet or exceed the minimum test standards in sections one and two of the model specifications for breath alcohol ignition interlock devices (BAIID) as published in the Federal Register, Volume 57, Number 67, Tuesday, April 7, 1992, on pages 11774 – 11787*, or as rules are adopted.
