(b) Persons listed in section 1 of this rule shall be eligible to apply to the fund for reimbursement from the fund according to the following formula:

- (1) Determine the number of payments that were owed under IC 13-23-12-1 on all regulated tanks at the facility from which a release occurred, beginning with the date that the fees for each tank first became due under IC 13-23-12 and continuing until the date on which the release occurred.
- (2) Determine the number of payments actually made under IC 13-23-12-1 on all regulated tanks at the facility from which a release occurred, beginning with the date each tank became regulated under IC 13-23 and continuing until the date on which the release occurred. Divide the number of payments actually made by the number of payments due as determined in subdivision (1).
- (3) Determine the amount of money the person would have received from the fund if all payments due on the date the release occurred had been paid when due and multiply the amount by:
 - (A) the percentage determined in subdivision (2), if the percentage is fifty percent (50%) or more; or
 - (B) zero (0), if the percentage determined in subdivision (2) is less than fifty percent (50%).

(c) Payments that were made or could have been paid four (4) times per year under IC 13-23-12-3 count as one (1) payment for purposes of this section.

(d) A person who acquires ownership or operation of an underground petroleum storage tank under IC 13-23-8-4.5(2) may not become eligible for reimbursement from the fund for any releases reported after the date that the commissioner receives the "Intent to Acquire UST and Reinstate Eligibility" form unless the person does the following:

- (1) Submit an "Intent to Acquire UST and Reinstate Eligibility" form (Form) as prescribed by the commissioner at least sixty (60) days prior to acquiring ownership or operation of an underground petroleum storage tank. This form will be kept confidential up to the earlier of the following:
 - (A) The date of the transfer of the property.
 - (B) The administrator's receipt of the monies as owed under subsection (e).
 - (C) Ninety (90) days after the administrator receives the Form.

The administrator will provide a listing of environmental penalties, interest due to the fund, and fees due to the prospective purchaser and the property owner within forty-five (45) days of receipt of the Form.

(2) Pay all applicable tank fees, including past due fees, interest, and penalties, for each tank not more than thirty (30) days after the transaction whereby the person acquires ownership or operation of each tank.

(3) The seller of the underground petroleum storage tank site is liable for any and all unpaid tank fees, interest, and penalties that are assessed by the administrator in accordance with subsection (e). The purchaser is to collect all past due tank fees, interest, and penalties from the noncompliant seller and remit to the administrator the full amount of the assessment for the subject underground petroleum storage tank provided by the administrator in accordance with subsection (e) prior to a release. The timely remittance of these monies is a condition of fund eligibility for the purchaser.

(e) Persons listed in section 1 of this rule who fail to pay tank fees when due are subject to payment of interest and penalties

UNDERGROUND STORAGE TANK FINANCIAL ASSURANCE BOARD

on those fees in order to become eligible for the fund. Interest and penalties due include the following:

- (1) Penalties and interest due the department of state revenue.
- (2) All past due underground storage tank fees under IC 13-23-12.
- (3) An environmental penalty as specified in subsection (f)(2). This penalty will be distributed into the fund and into the petroleum trust fund in accordance with IC 13-23-12-7(b).
- (4) Interest will be charged for the missed fee or fees at the percent per year based on subsection (f) and IC 6-8.1-10-1 until all fees due have been paid in full for each tank. This interest will be deposited into the fund.

Payment of all fees, interest, and penalties due within thirty (30) days of the date of transfer of the subject property is a requirement for fund eligibility for the purchaser.

(f) In addition to all past due fees owed, the amount of interest and penalties owed by a particular owner or operator is to be determined by the following formula:

- (1) Interest, under IC 6-8.1-1-1 and IC 6-8.1-10-1, as follows:

$$\text{Number of delinquent days} \times \text{daily interest rate} = \text{interest due}$$

Interest will be calculated according to IC 6-8.1-10-1.

- (2) Penalty as follows:

(A) For sites containing only tanks that were never registered, or sites containing only tanks for which no tank fees were paid when due, the penalty will be calculated at two thousand dollars (\$2,000) under IC 13-23-12-7(a) per petroleum underground storage tank per year that passes after each year's fee is due. The table (as an example) or the following formula (to calculate any length of time) may be used to calculate the penalty per tank:

Where:

- n = Total number of years late.
- Y_{ij} = Each year with an unpaid fee or a fee that was paid at least one (1) year late.
- Y_o = First year a fee was unpaid or paid at least one (1) year late.
- m = Most recent year where tank fees were unpaid or paid at least one (1) year late.

$$(2000) \left(\sum_{j=Y_o}^m \left(\sum_{i=1}^n Y_{i,j} \right) \right) = \text{penalty}$$

Year due	1 year past year due	2 years past year due	3 years past year due	4 years past year due
Year 1	2,000	2,000	2,000	2,000
Year 2		2,000	2,000	2,000
Year 3			2,000	2,000
Year 4				2,000
Total per tank	2,000	6,000	12,000	20,000

(B) For sites with tanks that are registered but not all fees have been completely paid, the penalty will be calculated at one thousand dollars (\$1,000) per petroleum underground storage tank for each missed fee payment. If a quarterly fee payment is missed, the penalty is applied at one-fourth ($\frac{1}{4}$) the amount listed in the table. The following table is an example of how penalties must be paid per tank:

Year due	1 year past year due	2 years past year due	3 years past year due	4 years past year due
Year 1	1,000	1,000	1,000	1,000
Year 2		1,000	1,000	1,000
Year 3			1,000	1,000
Year 4				1,000
Total per tank	1,000	2,000	3,000	4,000

(C) The penalty is incurred:

- (i) nine (9) months after the fee is due; or
- (ii) three (3) months after the final quarterly installment is due.

Subsequent penalties are calculated yearly and are cumulative as specified in clause (A).

(D) Penalties will not be collected for fees due before December 1, 2001.

Affected: IC 13-12-3-4; IC 13-23-3-2; IC 13-23-8-4

Sec. 5. (a) Reimbursable costs, excluding third party liability claims, are actual monetary amounts paid or incurred for work performed:

- (1) consistent with an approved or deemed approved CAP or under one (1) or more of the provisions of IC 13-23-8-4(b); and
- (2) subject to each of the following conditions:

(A) Credits, rebates, refunds, or other similar payments made to the owner or operator or received by the owner, operator, or applicant must be subtracted from the costs submitted for reimbursement.

(B) The work performed was consistent with:

- (i) site characterization;
- (ii) an approved CAP; or
- (iii) emergency measures, as defined in 328 IAC 1-1-5.1.

(C) The work performed under the CAP has been determined to be cost effective under section 1.3 of this rule.

(D) The work performed has been determined to be reasonable under 328 IAC 1-1-8.3.

(E) The work was performed as described in subsection (b) or (e), or both, and is not described in subsection (d).

(b) Persons listed in section 1 of this rule may employ a certified contractor under IC 13-23-3-2 or may use the owner's or operator's personnel to perform all or part of a corrective action and may seek payment from the fund for the following reimbursable costs of the type described as follows:

- (1) Site characterization costs, which include:

- (A) research;
- (B) field time;
- (C) report writing; and
- (D) clerical support;

but only after the site characterization has been approved by the administrator.

(2) Lodging and per diem costs in accordance with the most current Indiana department of administration financial management circular covering state travel policies and procedures. Mileage shall be calculated at the federal rate for a privately owned automobile under 41 CFR 301-10.303, in effect on December 15, 2003. Sales of the Code of Federal Regulations are handled by the Superintendent of Documents, P.O. Box 371954, Pittsburgh, PA 15250-7954.

(3) Soil and water sampling for petroleum and petroleum constituents only as necessary to achieve closure under rules of the solid waste management board at 329 IAC 9.

- (4) Costs for machinery and equipment if prorated based on the normal expected life of the item and the length of time the item was used for a single corrective action. In no event will the fund pay for purchases of machinery and equipment in excess of the market cost of leasing the item for a corrective action. Examples of equipment charges that can be made to the fund are disposable bailers and sample bottles.
- (5) Costs for materials and supplies, such as:
 - (A) disposable protective equipment;
 - (B) building materials, such as:
 - (i) piping; and
 - (ii) cement; and
 - (C) preservatives.
- (6) Governmental administrative fees for local, state, or federal permits necessary for corrective action.
- (7) Provision of alternate water supply. This cost must have been previously approved by the administrator.
- (8) Any other reimbursable costs the administrator finds to be necessary.
- (9) Costs associated with transitioning a site to RISC if these costs would be less than the costs to complete the remediation under rules of the solid waste management board at 329 IAC 9.
- (10) Only one (1) markup may be taken on any item. Markup of no more than ten percent (10%) of the unit rate or the lowest bid will be reimbursed except for the following:
 - (A) Travel costs, including mileage, per diem, and lodging.
 - (B) Personnel costs, not including labor rates for subcontractors.
 - (C) Utilities for temporary facilities.
 - (D) Governmental administrative fees for local, state, or federal permits.
 - (E) Equipment and supplies not purchased or rented specifically for use at a facility or that are not part of the approved remedial technology.
- (11) The fair market value of the cost to obtain access to off-site property if necessary for site characterization or corrective action.
- (12) Costs for emergency measures including the following as determined to be appropriate by the administrator:
 - (A) Evacuation and relocation of a building resident or residents.
 - (B) Ventilation of a building or utility conduit.
 - (C) Installation and maintenance of an alternate water or treatment system for contaminated drinking water.
 - (D) Recovery of free product as necessary to eliminate a release to a utility conduit.
 - (E) Installation of a system to mitigate free product migration, actual or potential drinking water impacts, or vapor intrusion into a building or a utility conduit.
 - (F) Other emergency measures required by the department.
- (c) The approval of the site characterization and the corrective action plan under rules of the solid waste management board at 329 IAC 9 is not a determination that the actual costs incurred under the site characterization or the CAP are reimbursable costs under this rule.
- (d) The following costs are not reimbursable from the fund:
 - (1) Costs from releases that occurred before April 1, 1988.
 - (2) Costs incurred more than twenty-four (24) hours prior to the date and time the release has been reported under the spill reporting rule in effect at the time of the release.
 - (3) Costs of repair, upgrading, or replacement of an underground petroleum storage tank or its associated equipment.
 - (4) Costs of environmental investigation and remediation not directly related to a release from a qualifying underground storage tank. Ineligible costs include the cost of testing for nonpetroleum contamination and the cost of vapor or ground water monitoring devices that are not associated with corrective action.
 - (5) Costs that exceed reimbursable costs even if incurred pursuant to an approved CAP.
 - (6) The cost of equipment purchases other than those costs routinely required to implement a corrective action plan. Examples of these not reimbursable purchases include:
 - (A) drilling rigs;
 - (B) earth moving equipment;
 - (C) photoionization detectors;

UNDERGROUND STORAGE TANK FINANCIAL ASSURANCE BOARD

- (D) explosimeters; and
- (E) hand tools.
- (7) The cost of cosmetic improvements, including the repair or replacement of blacktop or concrete, unless directly associated with corrective action.
- (8) Lost income or reduced property values unless part of a third party liability claim.
- (9) Interest or finance charges.
- (10) Contractor costs not directly related to corrective action activities, such as preparing cost estimates.
- (11) Fines or penalties imposed by local, state, or federal governmental agencies.
- (12) Punitive or exemplary damages.
- (13) Any costs for remediation of contamination not shown to be at concentrations exceeding the risk integrated system of closure as described in IC 13-23-8-4(a)(4)(A)(ii) (RISC) industrial cleanup standards with the following exceptions:
 - (A) Ground water contamination affecting a public or private drinking water well on-site or off-site.
 - (B) Off-site contamination at concentrations exceeding RISC residential cleanup standards, not including roadways, railroads, or other property not currently used as residential property.
- (14) Any costs related to the excavation and disposal of more than one thousand five hundred (1,500) tons of soil unless:
 - (A) alternative remediation techniques have been considered;
 - (B) excavation and disposal was shown to be the most cost effective remediation option; and
 - (C) the soil removal is part of a CAP approved or deemed approved by the administrator.
- (15) Any other cost not directly related to site characterization, corrective action, or third party liability or otherwise determined not to be reimbursable under this rule as a result of a financial or technical review.
- (16) If a release has occurred before the tank or tanks were registered, and the tank or tanks were not registered within thirty (30) days from the time the tank or tanks were first put into use, a claim is not reimbursable from the fund by the administrator. Tanks are considered "in use" when the tank contains or has ever contained a regulated substance and has not been closed under 329 IAC 9-6.
- (17) Any costs to purchase equipment, which was previously purchased and the cost was previously reimbursed from the fund.
- (18) Any costs incurred after receipt of notice by the administrator under section 1.3(d) of this rule that the approved CAP is not successfully remediating the site, except the following costs necessary, until such time as the modified CAP is approved, to:
 - (A) Develop the modified CAP, including pilot studies or additional investigation.
 - (B) Demobilize the corrective action system currently at the site.
 - (C) Abandon monitoring, extraction, or other wells associated with the CAP.
 - (D) Maintain compliance with applicable regulations and permits, including quarterly ground water monitoring.

CORRECTIVE ACTION TECHNOLOGIES

UNDERGROUND STORAGE TANK FINANCIAL ASSURANCE BOARD

The maximum costs for the work done for corrective action, except excavation, will be allowed on the basis of the lowest of three (3) comparable, competitive bids for the work specified in the corrective action plan. Bids for the work specified in the CAP must include bids for installation and labor; however, separate bids may be obtained for cost of installation and labor. Copies of the request for proposal (RFP) for implementation of CAP that was sent to each vendor must be submitted. The administrator can approve costs based on less than three (3) bids if a demonstration is provided to the administrator that lower costs for the specified work is not possible or practical.

Lease or rental on equipment will not be reimbursed above the purchase price.

Rule 4. Prioritization of Claims

328 IAC 1-4-1 General procedure for prioritization

Authority: IC 13-23-8-1; IC 13-23-8-4.5; IC 13-23-8-5; IC 13-23-11-7

Affected: IC 13-23-9-4

Sec. 1. (a) The following shall apply in the event the unencumbered balance, less the unpaid, approved claims for reimbursable costs and third party liability claims, in the fund falls below:

- (1) Twenty-five million dollars (\$25,000,000), the releases will be categorized according to this section.
- (2) Five million dollars (\$5,000,000), the prioritized claims, based on the categorized releases, will be paid according to section 4 of this rule.

The administrator may invoke these procedures prior to the unencumbered fund balance, less the unpaid, approved claims for reimbursable costs and third party liability, falling below the amounts specified in subsection (a)(1) or (a)(2) [subdivision (1) or (2)].

(b) All claims or parts of claims submitted to the administrator for an emergency measure, as defined under 328 IAC 1-1-5.1, will be paid first. If the claim or part of the claim is for work performed that has not been determined to be an emergency measure as defined under 328 IAC 1-1-5.1, the claim or part of the claim for that work will be paid according to the category of the release as determined in subsection (c).

(c) After the initial site characterization, further site investigation, or a corrective action progress report is completed, the release will be placed in the lowest numbered category for which it qualifies as follows, and all claims for reimbursement of costs and third party liability shall be paid in numerical order of the release category subject to the release recategorization provisions under section 3 of this rule:

- (1) If the administrator determines, based on the most recent information submitted to the administrator, that one (1) of the following has occurred and it is attributable to the release, then the release is considered a category 1 release and claims for that release shall be paid after all approved claims for emergency measures are paid as provided in subsection (b):

- (A) Petroleum or petroleum constituents are detected in a structure or a utility conduit, such as a storm sewer, sanitary

sewer, or utility conduit, that exceed ten percent (10%) lower explosive limit (LEL).

(B) Vapors for petroleum or petroleum constituents are detected in an inhabitable building in levels greater than long term, risk-based exposure for contaminants of concern.

(C) Petroleum or petroleum constituents are detected in a drinking water well at or above maximum contamination levels (MCLs) or RISC residential ground water cleanup objectives at the point of compliance or at the tap.

(2) If the administrator determines, based on the most recent information submitted to the administrator, that one (1) of the following has occurred and is attributable to the release, then the release is considered a category 2 release and claims for that release shall be paid after all approved claims for category 1 releases are paid as provided in subdivision (1):

(A) Petroleum or petroleum constituents are detected in free phase in a thickness of at least one (1) foot in any one (1) well, or at least one (1) inch in two (2) or more wells where the wells are at least twenty (20) feet apart, provided that the wells are not screened in the underground storage tank cavity backfill.

(B) Petroleum or petroleum constituents are detected in surface water above water quality standards under rules of the water pollution control board at 327 IAC 2.

(3) If the administrator determines, based on the most recent information submitted to the administrator, that one (1) of the following has occurred and is attributable to the release, then the release is considered a category 3 release and claims for that release shall be paid after all approved claims for category 2 releases are paid as provided in subdivision (2):

(A) Petroleum or petroleum constituents are detected off-site in ground water at concentrations exceeding RISC cleanup standards appropriate for the land use of the off-site location.

(B) Petroleum or petroleum constituents are detected off-site in soil at concentrations exceeding RISC cleanup standards appropriate for the land use of the off-site location.

(C) Petroleum or petroleum constituents are present in free phase in a thickness of at least one-sixteenth ($\frac{1}{16}$) inch in any well.

(D) Petroleum or petroleum constituents, attributable to a gasoline release, are detected in the ground water at concentrations exceeding RISC cleanup standards for the appropriate land use. For the purposes of this clause, gasoline has the meaning set forth in 45 IAC 12-1-7.

(4) If the administrator determines, based on the most recent information submitted to the administrator, that one (1) of the following has occurred and is attributable to the release, then the release is considered a category 4 release and claims for that release shall be paid after all approved claims for category 3 releases are paid as provided in subdivision (3):

(A) Petroleum or petroleum constituents are detected in on-site ground water at concentrations exceeding RISC industrial cleanup standards in two (2) or more wells, where the wells are at least twenty (20) feet apart, where neither well is screened in the underground storage tank cavity backfill.

(B) Petroleum or petroleum constituents are detected in on-site soil at concentrations exceeding RISC industrial cleanup standards in at least two (2) boring holes at least twenty (20) feet apart.

(5) A release that does not qualify as a category 1, 2, 3, or 4 category will be considered a category 5 release.

(6) Claims in the same category will be paid in chronological order according to the date and time received by the administrator as indicated by the date and time stamped by the administrator on the claim submitted to the administrator.

(d) Releases shall be initially categorized according to those conditions that existed at the time the first claim was submitted after prioritization was initiated.

(e) Claims determined to be unreimbursable may be revised and resubmitted to the fund. The date and time of the revised claim for the purposes of [subsection] (c)(6) shall be based on the date and time that the fund administrator receives the revised claim as indicated by the date and time stamped by the administrator on the claim submitted to the administrator.

(f) An applicant may request a review of a denial of payment using the procedures set forth in IC 13-23-9-4.

(g) Categorization of a release or placement of a claim on a priority list does not constitute a commitment to reimburse corrective action or third party liability costs. 328 IAC 1-4-3 Recategorization of releases

Authority: IC 13-14-8

Affected: IC 13-23-9-2; IC 13-23-9-4

Sec. 3. (a) To assure the efficient administration of the fund, the administrator may recategorize a release at any time that it is determined a release has been incorrectly categorized:

(1) The administrator will notify the applicant by mail of the new category.

(2) The applicant may petition the administrator to be put in a lower number category, with category 1 being the lowest, based on new information.

(3) If the administrator approves placement in a lower number category, the applicant may seek reimbursement under the new category for any costs incurred subsequent to the placement in the new category.

(4) If the administrator approves placement in a higher number category with 5 being the highest category, the applicant has fifteen (15) days after the date of the notification to submit current costs under the new category.

(b) Releases may be recategorized based on:

(1) the current environmental conditions;

(2) information indicating the elimination or abatement of the condition or conditions that led to the placement of a release in a category;

(3) other information available to the administrator demonstrates that recategorization is appropriate; or

(4) the discovery of the event that led to the placement in a lower category with category 1 being the lowest.

(c) Except as provided in section [sic., sections] 1.5 and 3(a) of this rule, the priority of a claim is determined by the category of the release at the time the claim is approved by the administrator and by section 1(c)(6) of this rule. Authority: IC 13-14-8

Affected: IC 13-23-7-2; IC 13-23-9-2; IC 13-23-9-4

Sec. 4. After priority payment under section 1(a)(2) [of this rule] is initiated, the total amount reimbursed from the fund in any calendar month must not exceed the fund revenue of the previous month, less the administrative expenses of the fund. However, the administrator must adjust the total amount reimbursed from the fund in any calendar month as necessary to maintain a fund balance of at least five million dollars (\$5,000,000). For purposes of this section, "fund revenue" means any or all sources of money as described in IC 13-23-7-2. Affected: IC 13-23-9-4

Sec. 5. (a) At any time after the administrator has invoked prioritization procedures, the administrator may discontinue the categorization of releases and the prioritization of claims if the administrator determines that the unencumbered balance, less the

unpaid, approved claims for reimbursable costs and third party liability is greater than twenty-five million dollars (\$25,000,000).

(b) In the event that monies are deposited in or appropriated to the fund in an amount exceeding twenty-five million dollars (\$25,000,000) in any calendar month, the administrator shall first apply such monies to restore the balance of the fund to an unencumbered balance, less the unpaid, approved claims for reimbursable costs and third party liability, of twenty-five million dollars (\$25,000,000). In that event, the administrator shall discontinue the prioritization procedures. (*Underground Storage Tank Financial Assurance Board; 328 IAC 1-4-5; filed Aug 30, 2004, 9:40 a.m.: 28 IR 141*)
