312 IAC 9-5-9 Reptile captive breeding license

Authority: IC 14-22-2-6; IC 14-22-26-3; IC 14-22-34-17

Affected: IC 14-22

Sec. 9. (a) This section establishes the reptile captive breeding license and sets the requirements for a person who wishes to apply for and maintain the license.

(b) The application must be made on a department form.

(c) The annual fee for a license under this section is fifteen dollars (\$15).

(d) An application for a license under this section must be made within thirty (30) days of the effective date of this section for a reptile described in subsection (e) and possessed by the applicant before the effective date of this section. Any subsequent license application must be made within five (5) days after the applicant took possession of the first reptile described in subsection (e) and taken for captive breeding purposes.

(e) A reptile captive breeding license authorizes a person who holds the license to possess, breed, and sell the snakes listed in this section. In the following list, where both scientific names and common names are provided, common names are for public convenience, but the scientific names control:

(1) Midland rat snake, also known as the black rat snake (*Elaphe spiloides*).

(2) Western fox snake (*Elaphe vulpina*).

(3) Eastern hognose snake (*Heterodon platirhinos*).

(4) Prairie kingsnake (*Lampropeltis calligaster calligaster*).

(f) Captive breeding stock other than a reptile described in subsection (e)(9) must be identified with an individually unique passive integrated transponder. A transponder must be implanted in each specimen. The type of transponder shall be approved by the commission. The imbedded transponder's code and other required information concerning the general health and condition of the animal must be provided on a departmental form, and be verified by a supervising veterinarian, within fourteen (14) days after obtaining the animal.

(g) A reptile held under this section must be confined in a cage or other enclosure that makes escape of the animal unlikely. Each animal must be provided with ample space and kept in a sanitary and humane manner. Animals and cages must be made available for inspection upon request by a conservation officer.

(h) Each animal possessed under this section must be lawfully acquired. No more than four (4) animals of each species described in subsection (e) may be collected annually from the wild. A receipted invoice, bill of lading, or other satisfactory evidence of lawful acquisition for animals not taken from the wild shall be presented to a conservation officer upon request. A person licensed under this section who collects an animal from the wild must document, on a departmental form, when and where the animal was collected. The animal must be fitted with a passive integrated transponder within fourteen (14) days of taking possession.

(i) A person licensed under this section must not possess an animal larger than the maximum sale length described in this subsection unless the animal is fitted with a transponder as part of the breeding stock of the person. The records shall include the species and number of animals captured, received, or sold and the birth dates of captive born animals. In addition, the records shall include the complete name and complete address of the person from whom an animal was purchased or to whom an animal was sold. The records shall be maintained at the place of business of the license holder for at least two (2) years after the end of the license year. Upon request by a conservation officer, the license holder must make the records available for inspection.

(k) A person licensed under this section must not release to the wild a captive breeder or the offspring of a captive breeder. *(Natural Resources Commission; 312 IAC 9-5-9; filed Jul 9, 1999, 5:55 p.m.: 22 IR 3675; readopted filed Jul 28, 2003, 12:00 p.m.: 27 IR 286; filed Sep 23, 2004, 3:00 p.m.: 28 IR 545; filed May 25, 2005, 10:15 a.m.: 28 IR 2950)*

The cage or enclosure must provide the turtle with ample space for exercise and to avoid overcrowding. Each turtle shall be handled, housed, and transported in a sanitary and humane manner. Mature male and female turtles of the same species must be caged separately. Upon request by a conservation officer, an applicant must make any cage or enclosure available for inspection.

- (1) may enter the premises of the permit holder at all reasonable hours to inspect:

- (A) those premises; and
 - (B) any records relative to the permit;

(2) shall immediately notify the permit holder if the inspection reveals a turtle is being kept under unsanitary or inhumane conditions; and

(3) may make a second inspection after ten (10) days to determine if any permit deficiency has been corrected that was reported to the permit holder.

- (n) A permit expires on June 30 of the year the permit was issued.

 - (9) Impoundment gear shall be marked at the end of the pot and at the end of each lead and wing with a buoy and flag. These buoys shall have a staff extending not less than five (5) feet above the surface of the water. An orange flag not less than twelve (12) inches square shall be affixed to the upper end of each staff. The base of each marker buoy shall legibly bear the license number in letters not less than two (2) inches high. Additional surface markers may be used by the license holder.
 - (10) The license holder shall remove all fish from each impoundment net at least once every seventy-two (72) hours, weather permitting.

 - (e) Requirements for the use of a designated captain are as follows:
 - (1) The holder of a commercial fishing license must designate an individual as captain of a boat operated by the license holder. A designated captain must be on-board each commercial fishing boat of the license holder while the boat is being used for an activity related to commercial fishing. Each applicant to be a designated captain must demonstrate, to the satisfaction of the department, each of the following on a departmental form:

(1) No person is eligible to receive or hold a commercial fishing license except as provided under IC 14-22-14.

(2) A person who holds a commercial fishing license may renew the license if the person is otherwise eligible to hold a commercial fishing license under IC 14-22 and this rule. License renewal will not be granted unless the person completes an application on a departmental form and the completed form and payment for the renewal fee are received by the department by February 1 of the year for which the license is sought. Licenses which are not renewed are permanently removed from the licensing system.

(3) No license may be transferred except upon prior consent of the director. Transfer shall be granted after delivery of a departmental form (with payment of the processing fee) establishing to the satisfaction of the director that the person to whom the transfer is to be made otherwise qualifies to hold a license under IC 14-22 and this article. If the person to whom the transfer is to be made holds an interest in another commercial fishing license at the time of the transfer, the second license is valid; the person is considered to have surrendered the first license. The first license is permanently removed from the licensing system and must, upon issuance of the new license, be immediately returned to the department.

A license exchange shall be granted after delivery of a completed departmental form and payment of the exchange processing fee. Upon issuance of the new license, the former license shall be immediately returned to the department.

(6) Upon the death or legal determination of incompetence of an individual license holder, a court may designate a family member (who would qualify for intestate succession from the decedent or incompetent under the principles set forth in IC 29-1-2) as the applicant for the same class license as held by the decedent or incompetent.

Notwithstanding subdivision (2), the director shall issue a new license to the designated applicant, if the applicant qualifies to hold a license under IC 14-22 and this article. If an individual designated under this subdivision does not submit a completed application on a department form by February 1 of the year immediately following the year in which the original license is valid, or within ninety (90) days after the death or incapacity of the individual to whom the license is issued, whichever is later, the license is permanently removed from the licensing system.

(g) A license holder shall keep legible and accurate daily fishing records on a departmental form of the following:

- (1) The pounds and species of fish caught.
- (2) The dates, locations, and depths fished.
- (3) The type, quantity, and dimensions of gear used.

Each form must be submitted to the director or the director's representative before the sixteenth day of the month following the month in which the fish were taken.

(i) A person who transfers or merges a license is responsible for submitting daily catch record for fish taken before the effective date of the transfer or merger. A person who receives a license is responsible for submitting daily catch records for fish taken beginning with the date of the transfer or merger.

(j) The director or the director's representative may, at any reasonable time, inspect the daily fishing records required under subsections (g) through (h) or IC 14-22-14-23. A license holder shall allow the director or the director's representative to obtain catch

Sec. 13. (a) A person must not take, possess, transport, barter, sell, or purchase a raptor for falconry purposes or to practice falconry except as provided under this section.

(b) A license under this section expires the last day of February of the third year following the year in which the license is issued.

(c) An application to practice falconry must be completed upon a departmental form. Before a license may be issued, the applicant must do each of the following:

(1) Correctly answer at least eighty percent (80%) of the questions on a supervised examination covering basic biology, care, and handling of raptors and laws relating to the practice of falconry.

(2) Establish that the applicant has also completed an application for a federal falconry permit.

(3) Meet any other requirements contained in this article.

(d) A license to practice falconry is subject to the following conditions:

(1) No species of raptor may be taken in Indiana which is classified as threatened or endangered under:

(A) 50 CFR 17.11 (October 1, 1995); or

(B) 312 IAC 9-4-14.

(2) A golden eagle (*Aquila chrysaetos*) may not be used unless prior written authorization is obtained from the U.S. Fish and Wildlife Service.

(3) By July 31 of each year, the license holder must complete on a departmental form and submit to the division a report which

includes the following information:

- (A) A list of raptors possessed by the falconer on June 30 of the year in which the report is filed by species, marker number, sex (if known), age (if known), and the date and where or from whom acquired.
- (B) A list of all raptors possessed or acquired since the previous annual report, but no longer possessed, by:
 - (i) species;
 - (ii) marker number;
 - (iii) sex (if known);
 - (iv) age (if known); and
 - (v) the date and where or from whom acquired.

The list shall also indicate to whom the raptor was given or whether the raptor escaped, died, or was released and when the event occurred.

(4) A raptor may not be acquired, released, or disposed of unless federal Form 3-186A (Migratory Bird Acquisition/Disposition Report) is completed and a copy sent to the department within five (5) days of the transaction. Only a legally possessed raptor which was bred in captivity may be purchased, sold, or bartered.

(e) Before a license is issued, the raptor housing facilities and equipment of the applicant shall be inspected by the division or by a conservation officer and found to meet the following standards:

(1) Facilities shall consist of indoor facilities (mews) or outdoor facilities (weathering area) sufficient to protect the raptors from exposure, predators, or other undue disturbance, including the following:

(A) Mews shall be large enough to allow easy access to care for the raptors. If more than one (1) raptor is to be housed, the raptors shall be tethered or separated by partitions. The area for each bird shall be large enough to allow a full extension of its wings. There shall be at least one (1) window, protected on the inside by vertical bars which are spaced more narrowly than the width of the bird's body, and a secure door that can be easily closed. The floor of the mews shall allow easy cleaning and shall be well drained. Adequate perches shall be provided.

(B) The weathering area shall be fenced and covered with netting and wire or roofed to protect the birds from disturbances and attack by predators. The enclosed area shall be large enough to ensure the birds cannot strike the fence if flying from the perch. Protection from excessive sun, wind, and inclement weather shall be provided for each bird. Adequate perches shall be provided.

(2) Equipment shall include the following:

(A) A pair of Alymeri jesses or a similar pliable, high quality leather or suitable synthetic material to be used when a raptor is flown free. A traditional one (1) piece jesses may be used on a raptor when not being flown.

(D) A weathering area perch of an acceptable design for each raptor.

(E) A reliable scale or balance for weighing a raptor held and graduated to increments of not more than one-half ($\frac{1}{2}$) ounce (fifteen (15) grams).

(f) A person licensed under this section must maintain all facilities and equipment at or above the standards established under subsection (e).

(g) A raptor may be transported or held in a temporary facility for not more than thirty (30) days. The temporary facility must be provided with an adequate perch and shall protect the raptor from extreme temperatures and excessive disturbances.

(h) A numbered, nonreusable marker must be obtained from the department before a person acquires a raptor. The marker must be attached to the raptor immediately upon acquisition. The alteration, counterfeiting, or defacing of a marker is prohibited. A falconer may remove the rear tab on a marker and smooth any imperfect surface, if the integrity of the marker and the numbering are not affected. The loss or removal of a band must be reported to the U.S. Fish and Wildlife Service on federal Form 3-186A and a copy of the form sent to the department within five (5) days of the loss or removal.

(i) There are three (3) classes of falconry licenses:

- (1) apprentice;
- (2) general; and
- (3) master.

Particular requirements are applicable to each of the classes of licenses which are supplemental to the general requirements provided under this section.

(j) The particular requirements applicable to an apprentice class falconry license are as follows:

- (1) The applicant must be at least fourteen (14) years of age.
- (2) An individual who holds a general, master, or equivalent class falconry license must agree to sponsor the apprentice. An individual may not sponsor more than three (3) apprentices at a time.
- (3) The license holder shall not possess more than one (1) raptor and shall not obtain more than one (1) raptor for a replacement during any twelve (12) month period.
- (4) The apprentice shall possess only an American kestrel (*Falco sparverius*) or a red-tailed hawk (*Buteo jamaicensis*).

(4) The license holder may not take, transport, or possess a golden eagle or any species listed as endangered or threatened by the U.S. Fish and Wildlife Service or under 312 IAC 9-4-14.

(l) The particular requirements applicable to a master class falconry license are as follows:

(1) An applicant must have at least five (5) years of experience in the practice of falconry at the general class level or its equivalent. Only those years in which an applicant possessed a raptor and used the bird for falconry practices constitute experience.

(2) A license holder shall not possess more than three (3) raptors and shall not obtain more than two (2) raptors for replacement birds during any twelve (12) month period.

(3) Notwithstanding subsection (d)(1), a license holder may possess not more than one (1) raptor which is classified as endangered or threatened as part of the three (3) raptor limitations provided in subdivision (2).

(m) The following restrictions apply to taking a raptor from the wild for use in falconry:

(1) A nonresident can lawfully take a raptor in Indiana only if:

(A) the nonresident has a master class falconry license or a general class falconry license issued from the state of residence; or

(B) the state which issued the license described in clause (A) allows a resident of Indiana, who has a master class falconry license or a general class falconry license, to take a raptor in that state.

(2) Young birds not yet capable of flight (eyasses) may only be taken by a general or master falconer Friday through Monday beginning with the first Friday in May and continuing for a total of eleven (11) consecutive taking periods, provided that at least one (1) eyas remains in the nest. No more than one (1) eyas may be taken by a general falconer and no more than two (2) eyasses may be taken by a master falconer.

(3) First year (passage) birds may be taken only from September 18 through January 31 of the following year.

(4) Notwithstanding subdivisions (2) through (3), a marked raptor can be retrapped.

(5) Only an American kestrel or a great horned owl (*Bubo virginianus*) may be taken if more than one (1) year of age.

(6) Notwithstanding the restrictions contained in this subsection, any raptor other than a species classified as endangered or threatened, taken under a depredation or other special purpose permit, may be used for falconry by a general or a master falconer.

(n) A license holder shall obtain prior written approval from the department before a raptor species not indigenous to Indiana is intentionally released to the wild. Before a raptor is released, the marker provided under subsection (h) shall be removed and surrendered to the department. A standard federal bird band shall be obtained from the department or a person licensed as a bird bander by the U.S. Fish and Wildlife Service and attached to the bird before release.

(o) Another person may care for the birds of a falconry license holder for not more than thirty (30) days, if a written authorization from the permit holder accompanies the birds, the person is otherwise authorized to possess a raptor, and the raptor is accompanied by a properly completed federal Form 3-186A. If the transfer exceeds thirty (30) days, prior written approval must also be secured from the department. A temporary transfer under this subsection will not be approved by the department for more than ninety (90) days.

(p) Feathers that are molted or from birds held in captivity which die may be retained or exchanged by a falconer only for imping purposes.

(q) A person, other than a falconer issued a license under this section, must not hunt or possess a wild animal taken with the aid of a raptor.

(r) The bag limits and seasons for taking wild animals by the use of a raptor are as follows:

(1) The season for hunting and possessing:

(A) rabbits, quail, and pheasants is from September 1 through February 28 of the following year; and

(B) squirrels is from August 15 through February 15.

(2) The daily bag limit per raptor is two (2) rabbits, one (1) quail, one (1) squirrel, and one (1) pheasant, except during the seasons for these wild animals established under 312 IAC 9-3 and 312 IAC 9-4, when the daily bag limits established under those provisions apply.

(3) The season and bag limits for taking waterfowl and migratory birds are those set forth in 312 IAC 9-4.

(4) A falconer whose raptor kills an animal that is not in season or is in excess of a bag limit must leave the dead animal where killed, but the raptor may feed upon the dead animal before leaving the site.

(s) A raptor possessed under this section may not be used for display or educational purposes except according to a permit issued under section 9(f) of this rule.

(t) A falconry license holder may not propagate raptors without a permit issued by the U.S. Fish and Wildlife Service with a copy of the permit and federal reports provided to the department. Written permission must be obtained from the department before a raptor bred in captivity is released in Indiana. No interspecific hybrid shall be intentionally released.

(u) A person may possess a raptor which was lawfully acquired before July 23, 1992, even though not in conformance with a requirement of this section, if the raptor is properly identified with a marker supplied by the U.S. Fish and Wildlife Service. *(Natural Resources Commission; 312 IAC 9-10-13; filed May 12, 1997, 10:00 a.m.: 20 IR 2732; readopted filed Jul 28, 2003, 12:00 p.m.: 27 IR 286)*

(b) A separate permit is required for each individual wild animal and applies only to the location stated in the permit.

(c) A permit issued under this rule expires one (1) year from the date of issuance. If a timely and sufficient application is made for a permit renewal under section 3 of this rule, however, the permit does not expire until the department has entered a final determination with respect to the renewal application.

(1) A game breeder license issued under 312 IAC 9-10-4.

(2) A scientific collector permit issued under 312 IAC 9-10-6.

(3) A mammal or bird rehabilitation permit issued under 312 IAC 9-10-9.

(e) This rule does not apply to the lawful taking or possessing of a wild animal as follows:

(b) A person who wishes to possess a wild animal, described as Class I or Class II under section 5 of this rule, must obtain a permit under this rule before the person takes possession of the animal.

(c) A person who wishes to possess a wild animal, described as Class III, must satisfy IC 14-11-4 and obtain a permit under this rule before the person takes possession of the animal. In addition to any procedural requirements, a notice under this subsection must also describe the following:

- (1) The species of the wild animal.
- (2) Where the animal will be possessed.

(d) A permit application must include a written verification from a licensed veterinarian that the animal appears to be free of disease, appropriately immunized, and in good health.

(e) An application must present a plan for the quick and safe recapture of the wild animal if the animal escapes or, if recapture is impracticable, for the destruction of the animal. After notification by the department of an intention to issue a permit, but before the permit is issued, the applicant must obtain the equipment needed to carry out the recapture and destruction plan. The nature and extent of the recapture plan and the equipment needed are dependent on the danger the escaped animal poses to persons, domestic animals, livestock, and other wildlife in the vicinity of the escape.

(f) A permit holder who possesses a Class III wild animal must notify the department immediately after the discovery of any escape of the animal.

(g) A permit application must be completed on a department form and accompanied by a fee in the amount of ten dollars (\$10).

(B) Appropriate handling, tranquilization, and euthanasia was provided under veterinarian guidance.

(C) Nutrition and diets.

(d) A conservation officer may reinspect the cages or enclosures at any time. The conservation officer shall attempt to give a permittee a twenty-four (24) hour notice prior to the reinspection, but, if the officer is unsuccessful in contacting the permittee, the officer may proceed with the scheduled inspection without making any further attempts to notify anyone. No notice is necessary if the officer has reason to believe the health and safety of the animal is in danger if there is a delay. (g) If sunlight is likely to cause overheating or discomfort to an animal, sufficient shade shall be provided to protect any animal kept outdoors from direct sunlight.

(h) If the ambient air temperature falls below that needed for good health of the animal, an artificial heat source must be provided that is sufficient to maintain the required ambient air temperature.

(i) If a pool of water is required or used, the floor space occupied by the pool is in addition to the required minimum floor space, unless otherwise specified in the license.

(j) Night quarters, holding pens, and nesting boxes may not be used as primary housing.

(k) All chain link or welded wire edges shall be smoothly secured to prevent injury to the animals.
