Sec. 6. (a) The commissioner may:

- (1) revoke or modify a permit issued under this article if cause exists under IC 13-15-7-1 or if the solid waste processing facility is used for purposes other than those specified in the permit; and
- (2) request an updated application if necessary.

When a permit is modified, only the conditions subject to modifications are reopened and subject to review under IC 13-15-7 and IC 4-21.5-3-7. If a permit is revoked, the entire permit is reopened and subject to revision, and if the permit is reissued, it may be for a new term.

(b) If the facility is located in an area not suitable for the operation of a solid waste processing facility as specified under this article, the commissioner shall consider this issue as a sufficient basis for denying the modification or for revoking the permit unless the permittee demonstrates to the commissioner that continued use of the facility will not pose a threat to human health or the environment.

(c) Except as provided under 329 IAC 11-3-4, to request a change in the facility permit, the permittee shall request that the commissioner modify the permit. The permittee shall submit the requested modification and rationale for the modification. If the commissioner determines that the requested modification is consistent with the standards established in this article, the commissioner shall grant the modification. Only the conditions subject to modification are reopened. The commissioner shall give notice of the determination on the modification in accordance with IC 13-15-7 and IC 4-21.5-3-7. Affected: IC 13-11-2-254; IC 13-19-3; IC 13-30-6-7

Sec. 14. (a) All transfer stations must be operated in a manner that minimizes the inclusion of liquids and does not allow vectors into the permitted waste stored, processed, and shipped from the transfer station. Such management practices include, but are not limited to, the following:

(1) All facility floors and the loading bay tunnel must be maintained so as to prevent standing water within the facility structure. All drainage and liquids originating from:

(A) storage, handling, and processing MSW;

(B) cleaning floors; or

(C) washout water from a MSW vehicle;

must be properly directed to a sanitary sewer, a holding tank constructed and operated in accordance with any applicable local approvals, or the equivalent of a sanitary sewer or holding tank.

(2) The facility tipping floor and loading bay tunnel must be cleaned daily while the facility is in operation by wash-down or other alternative method approved by the commissioner to prevent buildup of residue or waste, odors, and other nuisance conditions with all residuals being removed and disposed of properly. Litter must be collected daily or as needed to keep facility clean.

(3) Any MSW that is stored overnight at the facility, except nonputrescible waste that has been segregated for recycling, must be removed from the site the following operating day except for holidays and weekends. Any MSW stored overnight must be stored in a manner to:

(A) promote vector control; and

(B) prevent odors and other nuisance conditions.

(b) The following operating conditions apply to all Indiana transfer stations:

(1) Transfer stations that operate by discharging MSW directly from one (1) vehicle into a below the floor opening must have truck wheel curbs or an equivalent backup safety device or procedure.

(2) Solid waste that has been segregated and designated as waste to be recycled must be:

(A) stored in clearly identified containers or permitted areas; and

(B) maintained in a safe, sanitary, and orderly manner.

A record of the type and quantity of MSW shipped off-site for reuse or recycling must be maintained.

(3) Wastewater liquids collected under subsection (a)(1) must be emptied as necessary and properly disposed of whenever necessary to prevent overflow of the holding tank.

(4) An up-to-date copy of the plans and specifications approved by the department in granting the permit must be maintained

on-site.

(Solid Waste Management Board; 329 IAC 11-13.5-14; filed Jun 28, 2010, 2:11 p.m.: 20100728-IR-329060070FRA)

Sec. 15. The following conditions apply to all Indiana transfer stations that hold a valid permit under this article and are authorized to accept segregated infectious waste:

(1) Infectious waste must be stored in a manner that:

(A) preserves the integrity of containers; and

(B) is not conducive to rapid microbial growth and putrefaction.

The maximum duration for storage or containment of infectious waste must be limited to seven (7) days unless the department grants prior written approval for a longer period based on specific circumstances.

(2) Storage and containment of infectious waste must be in:

(A) a secure, vector free, and dry area separate from other solid waste at the facility; and

(B) such a manner and location that eliminates the possibility of exposure to:

(i) the environment;

(ii) facility personnel; and

(iii) the public.

Infectious waste must not be mixed with, or come into contact with, other solid waste. In addition, storage areas must protect infectious waste from weather, be ventilated to the outdoors, be accessible only to authorized persons, and be marked with prominent warning signs. The warning signs must include the nationally recognized biohazard symbol, Unicode U+2623, and be easily read from a distance of twenty-five (25) feet. Outside storage areas containing infectious waste must be locked to prevent unauthorized access.

(3) Infectious waste received by the facility must be packaged and labeled in accordance with the rules of the state department of health at 410 IAC 1-3, and the packaging and labeling must be maintained by the facility.

(4) Containers used to contain other containers of infectious waste must be marked with prominent warning signs or conspicuously labeled with the biohazard symbol or the word "INFECTIOUS".

(5) In addition to the requirements of this section, infectious waste must be labeled and packaged in accordance with applicable United States Department of Transportation regulations.

(6) Infectious waste must be transported and delivered to a facility that:

(A) holds a valid permit under this article and is authorized by the department in writing to accept and treat the waste; or

The incidental transfer of small amounts of whole waste tires at a transfer station is allowed if the owner, operator, or permittee of that transfer station complies with one (1) of the following options:

(1) The numeric standard described in subsection (b).

(2) A procedure that meets the criteria in subsection (c).

(b) The numeric standard for incidental transfer of whole waste tires is not more than one (1) visible whole waste tire for each two hundred fifty (250) tons of MSW, as defined at 329 IAC 10-2-115, or not more than two (2) tires per day for transfer stations that transfer less than two hundred fifty (250) tons of waste per day.

(c) In lieu of complying with the numeric standard in subsection (b), an owner, operator, or permittee of a transfer station must develop and follow a written procedure. This procedure must:

- (1) be kept at the transfer station;
- (2) be designed to minimize the transfer of whole waste tires by ensuring that those tires that do not meet the definition of incidental transfer at 329 IAC 11-2-15.1 are removed from the MSW;
- (3) designate by position and describe the duties of the person who is responsible for minimizing transfer of whole waste tires;
- (4) provide clear instructions to transfer station employees who handle waste tires and haulers for handling whole waste tires;
- (5) contain a system for:
 - (A) identifying haulers who deliver whole waste tires to the transfer station; and
 - (B) notifying those haulers that the disposal of whole waste tires is prohibited;
- (6) provide for proper storage and disposal or recycling of tires removed from MSW; and
- (7) document reduction in the numbers of whole waste tires incidentally transferred at that transfer station.

Sec. 1. (a) A quarterly tonnage report of solid waste received at the solid waste processing facility must be submitted to the commissioner by the owner, operator, or permittee of that facility.

(b) The report required by subsection (a) must be submitted:

- (1) For all facilities required to report, except on-site incinerators, on or before the fifteenth day of the month immediately following the end of the calendar quarter being reported. If the submittal date falls on a Saturday, Sunday, or national or state legal holiday, the submittal date will be the next day that is not a Saturday, Sunday, or holiday.
- (2) For on-site incinerators, annually, on or before the fifteenth of January. If the submittal date falls on a Saturday, Sunday, or national or state legal holiday, the submittal date will be the next day that is not a Saturday, Sunday, or holiday.

(3) For purposes of this subsection, "on-site" means a facility that accepts solid waste generated within the facility boundary and may also accept solid waste generated at various locations owned by the same parent company that owns the facility. The term does not include an incinerator that is on-site and permitted by rule under 329 IAC 11-19-2.

(c) The report required by subsection (a) must be submitted by the owner, operator, or permittee of the permitted solid waste processing facility that is open to accept solid waste for processing unless one (1) of the following applies:

(1) The owner, operator, or permittee of the solid waste processing facility has:

(A) ceased accepting solid waste for a period of at least one (1) calendar quarter; and

(B) sent written notification to the commissioner indicating the initiation of final closure under 329 IAC 11-16 if applicable.

(2) The solid waste processing facility is not required to obtain a permit under this article.

(3) The solid waste processing facility is only required to obtain a permit by rule under 329 IAC 11-19-2(a).

(d) The solid waste hauler shall provide the owner, operator, or permittee of the solid waste processing facility with the origin or origins of the solid waste delivered to the solid waste processing facility. The hauler shall estimate, by percent, the type and amount of solid waste originating in each county and state, or country if other than the United States, if the load contains solid waste from more than one (1) county, state, or country.

(e) The owner, operator, or permittee of the solid waste processing facility shall submit the quarterly tonnage report, required under subsection (a) as follows:

(1) On the most current paper or electronic report form prescribed by the department. The owner, operator, or permittee may obtain a quarterly tonnage report form from the department. The form:

(A) may be photocopied or electronically copied by the owner, operator, or permittee of the solid waste processing facility; and

(B) in its most current format, may be computer generated by the owner, operator, or permittee of the solid waste processing facility.

(2) The original of each paper report must be signed by the facility owner, operator, or permittee as certification of report accuracy.

(3) Each report must be accurate, legible, and complete.

(4) Each electronic report must contain a unique identification code assigned to the permitted facility owner, operator, or permittee by the commissioner as certification of report accuracy and authenticity.

(5) The type and usage of electronic reporting formats other than described in subdivision (1) must be approved by the commissioner.

(ii) Construction/demolition debris.

(iii) Pollution control waste.

(iv) Other solid waste.

(f) If the owner, operator, or permittee of the solid waste processing facility ascertains that there is an error or errors in any report previously submitted as required by subsection (a), a revised report reflecting the correct information must be submitted in the same format as the original submission. The revised report must:

(1) have "Amended" written or typed at the top of each page of the resubmitted report; and

(2) be submitted before or with the submission of the next quarterly tonnage report after ascertaining the error.

(g) Copies of reports required by this section must be maintained on-site by the facility owner, operator, or permittee for three (3) years after the submittal date of the report and be made available during normal operating hours for on-site inspection and photocopying by a representative of the department.

(h) The facility owner, operator, or permittee shall maintain the documentation on-site to substantiate reports required by this section. Such documentation must be maintained by the facility owner, operator, or permittee for three (3) years after the report's submittal date and be made available during normal operating hours for on-site inspection and photocopying by a representative of the department.

(i) Failure to submit reports and copies as required by this section, or maintain copies of reports and records as required by this section, constitutes an operational violation under 329 IAC 11-1-1.

Rule 20. Infectious Waste Incinerators; Additional Operational Requirements

329 IAC 11-20-1 Operational requirements

Authority: IC 13-14-8-7; IC 13-15-2; IC 13-19-3

Affected: IC 13-11-2; IC 13-19-3; IC 36-9-30

Sec. 1. (a) The following additional operational requirements apply to all infectious waste incinerators:

- (1) A solid waste incinerator that is used to burn infectious waste, except an existing incinerator equipped with an afterburner and achieving zero (0) opacity, must be a multiple chamber incinerator. Infectious waste incinerators must maintain a temperature of one thousand eight hundred (1,800) degrees Fahrenheit with a residence time of one (1) second in the secondary chamber.
- (2) Any solid waste incinerator that is used to burn antineoplastic agents must maintain a temperature of one thousand eight hundred (1,800) degrees Fahrenheit with a residence time of one and one-half (1½) seconds in the secondary chamber. As used in this rule, "antineoplastic agents" means chemotherapy drugs, or compounds used in the treatment of cancer, which are not subject to regulation under 329 IAC 3.1. Containers or other items containing residues of antineoplastic agents must not be considered antineoplastic agents.
- (3) Infectious waste incinerators constructed after January 1, 1988, must be equipped with an automatic mechanical loading device, and an interlock system must be provided to prevent charging until the secondary chamber exit temperature of one thousand eight hundred (1,800) degrees Fahrenheit is established.
- (4) Batch incinerators, fully loaded while cold and never opened until the burn cycle is complete, must incorporate a lockout system that will prevent ignition of the waste until the exit temperature of the secondary chamber or the afterburner reaches one thousand eight hundred (1,800) degrees Fahrenheit and prevent recharging until the combustion and burndown cycles are complete.
- (5) No waste must be charged to an incinerator other than a batch incinerator until the secondary chamber or afterburner has achieved a minimum temperature of one thousand eight hundred (1,800) degrees Fahrenheit. The secondary chamber or afterburner must achieve and maintain the required minimum temperature for fifteen (15) minutes before charging begins.
- (6) During shutdowns, the secondary chamber or afterburner minimum temperature of one thousand eight hundred (1,800) degrees Fahrenheit is to be maintained using auxiliary burners until the wastes are completely combusted and the burndown cycle is complete.
- (7) Residue from an infectious waste incinerator must be disposed of in accordance with 329 IAC 10.
- (b) All infectious waste incinerators that are not in compliance or not able to comply with the requirements of this rule must

submit a detailed timetable for the modification of the facility necessary to bring the unit into compliance. This timetable must be submitted within one hundred eighty (180) days of April 13, 1996.

(c) All infectious waste incinerators must be in compliance with this rule within eighteen (18) months of April 13, 1996, unless a written extension has been granted by the commissioner. *(Solid Waste Management Board; 329 IAC 11-20-1; filed Mar 14, 1996, 5:00 p.m.: 19 IR 1948; filed Jan 9, 1998, 9:00 a.m.: 21 IR 1732, eff one hundred eighty (180) days after filing with the secretary of state; readopted filed Jan 10, 2001, 3:25 p.m.: 24 IR 1535; filed Jul 14, 2004, 9:15 a.m.: 27 IR 3975; errata filed Aug 9, 2004, 10:45 a.m.: 27 IR 4023; readopted filed May 14, 2007, 1:53 p.m.: 20070523-IR-329070138BFA)*
