

# 2010 Property Tax Report

## Marion County

### with comparisons between 2007 and 2010

Legislative Services Agency

July 2010

This report describes property tax changes in Marion County between 2009 and 2010, with comparison to changes between 2007 and 2010. The report also shows the overall changes to property tax levies and property assessments since the recent property tax reforms have been implemented. Explanatory information is provided to highlight changes that are unique to Marion County and those that have occurred throughout the state. Statewide averages are based on data from all counties except Lake and LaPorte.

### Comparable Homestead Property Tax Changes in Marion County

	2009 to 2010		2007 to 2010	
	Number of Homesteads	% Share of Total	Number of Homesteads	% Share of Total
<b>Summary Change in Tax Bill</b>				
Higher Tax Bill	42,070	20.3%	2,752	1.3%

Note: Percentages may not total due to rounding.

The average homeowner saw a 13.8% tax bill decrease from 2009 to 2010.

Homestead taxes in 2010 were still 43.7% lower than they were in 2007, before the property tax reforms.

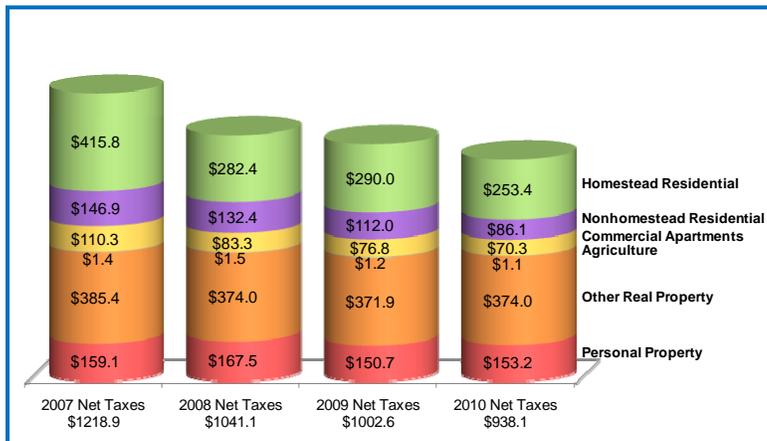

98.5% of homeowners saw lower tax bills in 2010 than in 2007.

58.8% of homeowners saw tax decreases of between 1% and 19% from 2009 to 2010. The largest percentage of homeowners have seen between a 30% and 49% decrease in their tax bills from 2007 to 2010.

### Marion County Overview

The much larger-than-average decline in homeowner tax bills was due to two main factors. Property tax levies decreased 2.4% in Marion County in 2010, compared to the state average increase of 2.4%. Indianapolis Public Schools saw an increase in its levy, due to a debt service fund which was passed by referendum. Indianapolis also increased its fire protection levy. But many other units decreased their levies, including Perry Township and the Lawrence, Perry, Pike, Warren, and Washington Township School Corporations. Marion County homeowners benefitted more from the one percent property tax cap than did homeowners in the average county, primarily because Marion County tax rates tend to be higher than the state average. The assessed value of commercial and industrial real property fell in Marion County in 2010, resulting in a tax shift to homeowners, but this was not enough to offset the factors that decreased homeowner taxes.

**Comparison of Net Property Tax by Property Type  
(In Millions)**

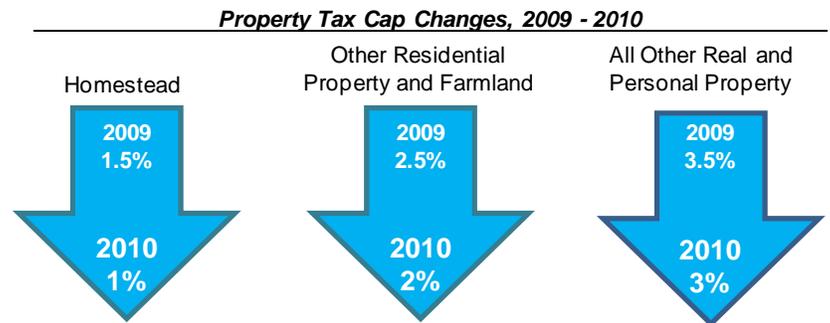

Net tax bills for all taxpayers decreased 6.4% in Marion County from 2009 to 2010. This was greater than the statewide reduction of 1.4%. In 2010 apartment owners saw an 8.5% decrease in tax bills. This large decrease was due mainly to the tightening of the tax caps from 2.5% to 2% for rental housing. The tightening of the tax caps also affected nonhomestead residential property (mostly small rental residences), which saw a 23.1% decrease in tax bills. Other real and personal property, mostly

commercial and industrial land, buildings, and equipment, saw a minimal increases in tax bills of 0.6% and 1.7%, respectively, in 2010. This was mainly because of slight increases in net assessed values for business real and personal property. The tax increases were tempered by the tightening of the tax caps from 3.5% to 3%. Despite the 4% increase in the base rate of farmland from \$1,200 to \$1,250 per acre, agricultural business property saw a 15.3% decrease in tax payments in 2010. This tax reduction is mostly due of the tightening of the tax caps from 2.5% to 2% for farmland.

### 2010 Property Tax Policy Changes

**Property Tax Caps.** Property tax caps tightened to their permanent levels. The tighter caps meant more taxpayers were eligible for tax cap credits. This resulted in greater reductions in property tax revenue for local governments.

**State Homestead Credits.** State homestead credits were reduced by 43% between 2009 and 2010 as part of a scheduled phaseout. The average statewide credit rate fell from 8% to 5% as a result. The credit will be eliminated in 2011.

### Tax Cap Credits

Tax cap credits in Marion County in 2010 amounted to 7.9% of the total property tax levy. The statewide average was 6.3%. The larger percentage loss in the county was partly due to higher-than-average tax rates in Marion County and to the county having a larger share of its net assessed value in the 2% cap category. The tax rate exceeded \$2 in 51 of 61 taxing districts, which qualified a large amount of residential property for circuit breaker credits. Commercial and industrial properties in the 3% tax cap category qualified for credits in 18 tax districts where tax rates exceeded \$3. Tax rates and home values were high enough for 23% of homesteads in the county to qualify for circuit breaker credits in the 1% category.

**2010 Circuit Breaker Credits by Cap Category  
Marion County Total \$79,244,942**

1%	2%	3%	Elderly
\$25,878,885	\$41,690,591	\$11,650,316	\$25,151
32.7%	52.6%	14.7%	0.0%

Marion County, Franklin Township Community Schools, and Indianapolis Public Schools saw the largest revenue losses from the tax caps in 2010. As a percentage of their total levies, Beech Grove City and the Beech Grove Public Library lost the most, at over 30%, each. Losses were greatest for units that overlapped Beech Grove City, because these tax districts had the highest tax rates.

### The Effects of Recession

In Marion County the recession has affected the economy, though less than in most Indiana counties. The recession created upward pressure on property tax bills in several ways. The unemployment rate rose from 4.5% in December 2007 to 9.3% in July 2009. Job losses and income declines contributed to a 1.9% drop in local income tax revenue. Because part of this revenue is used for property tax relief, local property tax credit rates declined in Marion County in 2010.

**Marion County Gross Assessed Value by Property Type**

Property Type	Gross AV 2009	Gross AV 2010	Gross AV Change
Homesteads	31,307,371,135	29,800,965,460	-4.8%
Other Residential	7,569,251,500	7,336,381,200	-3.1%
Ag Business/Land	44,704,100	45,433,200	1.6%
Business Real/Personal	24,849,257,829	24,724,065,036	-0.5%
<b>Total</b>	<b>\$63,770,584,564</b>	<b>\$61,906,844,896</b>	<b>-2.9%</b>

In addition, the recession reduced new construction, so less new property was added to assessment roles. The recession also reduced some property values, which affected assessed values through annual trending. Lower assessed values may result in higher tax rates for local taxpayers. In those instances where taxpayers' bills are limited by the caps, the higher rates may result in higher circuit breaker credits, causing increased revenue losses for local governments.

In Marion County, the gross assessed value of homesteads and other residential property fell 4.8% and 3.1%, respectively, in 2010. Agricultural and other real and personal property had modest changes. The total gross assessed value in Marion County fell 2.9%. This was lower than the state average increase of 0.6%.

The tables on the following pages illustrate 2007 – 2010 levy comparisons, 2010 tax rates and credit rates, and 2010 circuit breaker losses by taxing unit.

**Marion County Levy Comparison by Taxing Unit**

Notes: A *Taxing District* is a geographic area of a county where taxing units overlap, so the sum of the taxing unit tax rates is the total district rate.

The *Tax Rate* is the gross levy divided by net assessed value, in dollars per \$100 assessed value.

The *State Homestead Credit* is the HEA1001-2008 special rate, which will be eliminated after 2010.

The *LOIT, COIT, and CEDIT* credits are funded by local income taxes.

The *Net Tax Rate for Homesteads* is calculated by reducing the tax rate by the various credit percentages.

Notes: Circuit breaker tax cap credits are tax savings for taxpayers and revenue losses for local government units. Circuit breaker credits are highest in tax districts with the highest tax rates. These are usually districts that include cities or towns because the municipal tax rate is included in the district tax rate. This means that most circuit breaker credits are in cities and towns and in units that overlap cities and towns.

**Circuit Breaker Credit Types:**

*Homesteads* are owner-occupied primary residences and include homestead land and buildings in the 1% tax cap category. Owner-occupied mobile homes and agricultural homesteads are included in this category. This category only includes credits on the portion of the property that qualifies as a homestead.

*Other Residential/Farmland* includes small rental housing units, larger commercial apartments, second homes, long-term care facilities, and farmland, in the 2% tax cap category.

*All Other Real/Personal* is commercial, industrial, and utility land and buildings, and business equipment, including agricultural equipment, in the 3% tax cap category. This category also includes credits on the portion of homeowner properties that do not qualify as a homestead.

*Elderly* includes credits for the 2% annual limit on homestead tax bill increases for low-income homeowners, age 65 and over.

The *Total Levy by Unit* is gross property taxes levied, before all tax credits. For TIF districts, this amount represents the TIF proceeds before circuit breaker credits. This information is included to allow comparison to the circuit breaker revenue losses.

Numbers may not total due to rounding.
